

Sravya Amrutha | Healthcare Data Analyst

Indianapolis, IN | +1 (317)-702-6329 | asravya46@gmail.com | [LinkedIn](#)

SUMMARY

Experienced Healthcare Data Analyst with over 5 years of expertise in analyzing and interpreting large healthcare datasets to drive informed decision-making and improve patient outcomes. Skilled in developing and deploying interactive dashboards using Power BI and Tableau, optimizing data pipelines with SQL and Python, and applying statistical methods like regression analysis and hypothesis testing. Proficient in machine learning techniques, including predictive modeling and time series forecasting. Adept at ensuring HIPAA compliance and enhancing operational efficiency through automation. Proven track record in supporting clinical trials and healthcare initiatives with actionable insights that lead to cost reductions and improved care strategies.

TECHNICAL SKILL

Programming & Scripting: Python (Pandas, NumPy, Scikit-learn), SQL, R, Excel (Advanced Functions, Pivot Tables)
Data Visualization & BI Tools: Power BI, Tableau, QlikView, Google Data Studio
Data Warehousing & ETL Tools: Snowflake, AWS Redshift, Apache Kafka, Talend, Apache Spark
Machine Learning & Analytics: Predictive Modeling (Logistic Regression, Random Forest, XGBoost, Time Series Forecasting), Regression Analysis, A/B Testing, Clustering
Healthcare-Specific Technologies: HIPAA Compliance, ICD-10/DRG Coding, HL7
Databases: PostgreSQL, MySQL, Microsoft SQL Server, Google BigQuery
Cloud Platforms: AWS (S3, EC2, Lambda, Redshift), Microsoft Azure (Azure Synapse, Data Factory)
Statistical Analysis & Modeling: Hypothesis Testing, ANOVA, Time Series Forecasting, Survival Analysis
Tools & Frameworks: Jupyter, VS Code, PyCharm, GitHub, Git, Docker (basic knowledge)
Business Intelligence & Reporting: SQL-based reporting, Tableau Dashboards, Excel Macros, Power BI
Version Control & Collaboration: Git, GitHub, Bitbucket
Data Pipeline & Automation: Apache Airflow, Azure Data Factory

PROFESSIONAL EXPERIENCE

Healthcare Data Analyst **Jun 2024 – Jun 2025**
United HealthCare | Indianapolis, USA

- Analyzed and interpreted large-scale healthcare datasets to identify trends, improve patient outcomes, and optimize operational workflows, leading to a 20% improvement in decision-making efficiency.
- Developed interactive dashboards using Power BI and Tableau to deliver real-time insights for healthcare stakeholders, reducing report generation time by 30%.
- Collaborated with cross-functional teams to design and implement predictive models that improved patient readmission prediction accuracy by 15%, supporting value-based care initiatives.
- Utilized SQL and Python for ETL processes, ensuring data integrity across multiple databases, reducing data inconsistencies by 25%.
- Conducted statistical analyses, including hypothesis testing and regression analysis, to inform strategic decisions and provide actionable insights for healthcare improvements.
- Implemented HIPAA-compliant data processing workflows, ensuring secure access to sensitive health data and reducing security breach risks by 10%.
- Presented findings to senior leadership, contributing to data-driven strategies that resulted in a 12% reduction in patient care costs over six months.

Healthcare Data Analyst **Dec 2023 – May 2024**
Syneos Health | USA

- Supported data collection and analysis for clinical trials, improving the accuracy and efficiency of reporting outcomes by 18%.
- Performed data cleaning and preprocessing tasks, working with large datasets to ensure high-quality data for clinical trial analysis.
- Assisted in the development of dashboards and visualizations for stakeholders, aiding in the evaluation of clinical trial progress and patient outcomes.
- Utilized SQL to extract, transform, and load (ETL) clinical data, reducing data processing time by 20% while maintaining accuracy.

Healthcare Data Analyst **Aug 2018 – Jul 2022**
Mphasis | India

- Led the design and development of advanced data models to optimize healthcare operations, driving a 10% improvement in operational efficiency across the organization.
- Developed and maintained automated reporting systems using SQL and Tableau, reducing reporting time by 40% and ensuring timely delivery of insights to leadership.
- Implemented predictive analytics and machine learning algorithms to forecast healthcare trends, increasing forecasting accuracy by 22%.
- Provided data-driven insights to healthcare providers, improving patient care strategies and reducing the number of unnecessary medical tests by 15%.
- Collaborated with data engineers and business analysts to design scalable data pipelines, ensuring seamless data flow across multiple platforms and reducing data processing times by 30%.

EDUCATION

Masters in MSITM | Campbellsville University-Louisville **May 2024**
