

SRIKANTH THALLAPALLY

Atlanta, GA • 334-220-2184 • t.srikanth0306@gmail.com

Professional Summary

A highly motivated and results-driven Software Engineer with 3+ years of experience in designing, developing, and deploying applications. Skilled in applying software engineering principles to optimize business operations and enhance productivity. Expertise in implementation and well-versed in collaborating with stakeholders to translate business needs into effective technical solutions.

Professional Experience

ML Data Associate

July 2020 – November 2022

Amazon, Hyderabad, India

- Collaborated on Amazon Scout: Contributed to the development of Amazon Scout, an autonomous delivery system, by integrating data pipelines and optimizing algorithms for object detection and navigation.
- Executed Data Annotation and Labeling: Managed data annotation and labeling for training machine learning models, enhancing the precision of object recognition and navigation algorithms.
- Contributed to the Tron Project: Engaged in the Tron project to enhance automated delivery tracking. Developed and maintained data pipelines using Apache Kafka and Spark, enabling real-time monitoring and analytics of delivery processes.
- Cross-Functional Collaboration: Coordinated with engineering and analytics teams to streamline project workflows, ensuring seamless integration of ML models into production systems and driving improvements in machine learning processes.
- Enhanced the Robin Process: Managed data input for the Robin system, focusing on customer service automation improvements. Leveraged tools like AWS Lambda and API Gateway to facilitate smooth data handling and system integration.
- Supported Model Testing and Development: Provided precise data annotations and feedback for model testing, utilizing version control systems like Git and testing frameworks to ensure the accuracy and reliability of machine learning models.

Software Developer

August 2018 - May 2020

V.S IT Solutions, Hyderabad, India

- Maintained application stability by diagnosing and resolving production issues, working closely with the QA team to ensure the delivery of error-free code in an agile environment.
- Optimized ETL pipeline performance and interactions with large-scale data sources, enhancing code efficiency and achieving a 26% improvement in unit testing performance.
- Improved integration with external systems using SOAP and REST services, leading to a 30% reduction in production support tickets and a 50% faster payment processing rate.
- Deployed and managed web servers using Kubernetes, Docker, and Nginx, applying agile methodologies to drive continuous improvement.
- Redesigned and upgraded the application UI, providing a modern, high-quality user experience as part of a comprehensive application migration.

Technical Skills

Programming Languages: HTML, CSS, Java, C, Python, JavaScript, React, Selenium

Frameworks and Technologies: Spring Boot, Gradle, Maven, Pega, AWS, Hibernate, JBoss

Databases: SQL, PostgreSQL, Oracle, Microsoft SQL Server Management Studio

Tools: Tableau, Rally, Jira, ER Studio, Postman, ServiceNow, Tomcat, Git
