

Thushal Bharadwaj Nelamane Venkatesh

Virginia, USA | tvenkb@gmail.com | (703) 594-6142

[Portfolio](#) | [GitHub](#) | [LinkedIn](#)

Experienced in **network security, SIEM implementation, and automation**. Proven track record in **threat detection, incident response, and security tools implementation**.

EDUCATION

Bachelor of Science in Information Technology - Information Security Concentration

George Mason University, Fairfax, VA | May 2023

CERTIFICATIONS & SKILLS

- **Certifications:** CompTIA Security+, Palo Alto Network based certs., TryHackMe SOC I
- **Security Tools:** Wazuh SIEM, Elastic Stack, Snort IDS/IPS, CrowdSec, Palo Alto Firewalls
- **Technical:** Python, PowerShell, SQL, Selenium, AWS, Terraform, Docker, Ansible
- **Systems:** Red Hat Linux, Windows, Unix
- **Tools:** Jira, Confluence, SharePoint, Git, Github

PROFESSIONAL EXPERIENCE

IT Network and Cybersecurity Intern | TDS Telecom (Remote)

May 2023 - May 2024

- **Reduced threat detection time by 60%** through **Elasticsearch/Kibana security monitoring**.
- **Developed 400+ Kali Linux command detection rules** in Elastic SIEM, enhancing SOC visibility.
- **Automated device integration** with Python and REST APIs, improving efficiency by **90%**.
- **Streamlined system management** by creating comprehensive security documentation and **Selenium automation scripts**, reducing operational delays.
- Designed a **manifest for firewall decommissioning**, ensuring **zero policy collisions**.
- **Improved Elasticsearch data accuracy with 0 errors** using **grok parsing for log ingestion**.

IT Student | Great Oaks Cleaning Solution (Remote)

December 2022 – May 2023

- Developed a **secure LAMP stack web app**, following **OWASP guidelines**.
- Implemented a **security-focused customer engagement system**, increasing conversions by **40%**.

PERSONAL PROJECTS

2024-2025

Invoke-AI-Tool | CLI Automation for AI Troubleshooting

- Developed a **command-line tool** to automate sending **clipboard content (text/screenshots)** directly to AI websites (**Kimi, Gemini**) through **Chromium-based browsers**, eliminating manual copy-paste workflows.
- Implemented **XPath management** and **user data profile integration** to maintain **session persistence** across browser launches.
- Packaged for **Ubuntu-based distros** (e.g., **Linux Mint**) with a **.deb installer**, reducing **setup time by 90%**.

Automation & Security Infrastructure

- Developed a **browser extension** using **JavaScript, Chrome Extensions API, and Kimi AI API** to analyze user history and generate a personalized composite compatibility score (0-100), saving user engagement time.
- Built a **comprehensive security lab** with **Crowdsec, SNORT IDS/IPS, and Wazuh SIEM**.
- Created a **Python-based financial analyzer script** for **investment guidance**, including **dollar cost averaging and back-testing of strategies**.

PROFESSIONAL DEVELOPMENT

November 2023

Clifford Chance Cyber Security Global Job Simulation

- Formulated **defensive strategies** for a client with **data center operations for approximately 10,000 records**.

AWS APAC Solutions Architecture Virtual Experience

- Designed **scalable Elastic Beanstalk hosting**; presented **cost breakdowns** in layman's terms.

JPMorgan Chase & Co. Cybersecurity Job Simulation

- Built **85% accurate spam classifier** and tightened **access controls**, reducing unauthorized attempts by **30%**.
