

SAI KRISHNA GOLI

Atlanta, GA | 989-402-7174 | saikrishnagoli@icloud.com | www.saikrishnagoli.com

PROFESSIONAL SUMMARY

- 5+ years of experience in data analytics, business intelligence, systems analysis, and operational reporting across public-sector, technology, and manufacturing environments.
- Hands-on experience using Python, SQL, SQL Server, MySQL, AWS Glue, Apache Spark, AWS S3, and Azure Data Factory to transform data and support reliable analytics workflows.
- Hands-on experience developing Power BI dashboards and reports from scratch, including data preparation, dimensional data modeling, KPI design, DAX measures, visualization, publishing, and ongoing support.
- Experienced in supporting ERP and public-sector systems, including functional testing, reporting enhancements, access configuration, and system implementation.
- Hands-on experience creating reports and dashboards using Power BI, Tableau, SSRS, Crystal Reports, and Cognos.
- Skilled in developing Power BI and Tableau dashboards that communicate trends, performance drivers, and actionable business insights.
- Skilled in developing SQL queries, automated data pipelines, data-quality controls, reusable reports, and Power BI/Tableau dashboards for operational and leadership decisions.
- Proven ability to improve reporting efficiency by automating manual processes and optimizing data pipelines using SQL, Python, AWS Glue, and Azure Data Factory.
- Experienced in evaluating operational processes, monitoring KPIs, identifying performance gaps, and recommending improvements.
- Lean Six Sigma Green Belt certified with a master's degree specializing in Business Data Analytics.

TECHNICAL SKILLS

Data Analysis: Data Cleaning, Data Validation, Trend Analysis, KPI Analysis, Root Cause Analysis, Statistical Analysis, Data Integrity

Business Analysis: Requirements Gathering, Business Requirements Documentation, Stakeholder Interviews, Process Mapping, Gap Analysis, Root Cause Analysis

SQL and Databases: SQL, SQL Server, MySQL, Joins, Aggregations, Subqueries, Timestamps, Data Transformation, Stored Procedures

Programming: Python, Pandas, NumPy, R

Visualization and Reporting: Power BI, Tableau, SSRS, Crystal Reports, Cognos, Microsoft Excel

Data Engineering & Cloud: ETL/ELT, Azure Data Factory, AWS Glue, AWS S3, Data Lakes, Data Warehousing, Batch Ingestion, File and Database Integration, Workflow Orchestration

Project Tools: Jira, Confluence, Azure DevOps, Microsoft Office, Agile, Requirements Gathering, Process Mapping

Systems and Compliance: Tyler New World ERP, Data Security, Access Control, CJIS Compliance

Testing and Delivery: User Acceptance Testing, Test Planning, Test Cases, Defect Tracking, Regression Testing, Solution Validation, Release Support

Data and Reporting: Microsoft Excel, PivotTables, XLOOKUP, INDEX/MATCH, PowerPoint, SQL, Power BI, Tableau, SSRS, Crystal Reports, Cognos

Integration & Application Concepts: REST APIs, CDC, Kafka Streaming, Microsoft Power Platform, Power Apps, Power Automate, and OutSystems - foundational knowledge

PROFESSIONAL EXPERIENCE

Business Systems Analyst
Unified Government of Athens-Clarke County, Athens, GA

January 2025 – Present

- Analyze operational and reporting requirements for public safety and county systems, translating stakeholder needs into functional specifications and system improvements.
- Develop and optimize SQL queries and ad hoc reports to extract, aggregate, and transform operational data for management and compliance reporting.
- Design and maintain Power BI reporting solutions to track operational KPIs, system activity, and department performance metrics across multiple business units.
- Analyze data workflows across operational systems, reporting tools, and databases to improve data accuracy, reliability, and overall reporting efficiency.
- Administer and support BI and reporting platforms including SSRS, Crystal Reports, Cognos, and custom-built dashboards for over 1,000 enterprise users.
- Collaborate with vendors, department stakeholders, and internal IT teams to document business requirements, test solutions, resolve incidents, and continuously improve system processes.
- Performed data integration, data validation, and reconciliation to ensure high data quality and reporting accuracy.
- Supported mission-critical public sector systems handling sensitive and confidential information, ensuring data security, compliance, and system reliability.
- Perform functional, integration, permission, and configuration testing for Tyler Technologies New World ERP, Enterprise Mobile, and public safety applications.
- Supported Azure-based enterprise applications, system integrations, and production environments.
- Troubleshoot complex application, hardware, software, database, interface, access, and network-related issues across jail and courthouse locations.

Data Analyst, Digital & Devices

September 2019 – July 2022

Amazon, Hyderabad, India

- Designed and developed scalable ETL pipelines using Python and SQL to process large operational datasets.
- Served as a subject matter resource and trained 7–9 team members on systems, troubleshooting procedures, reporting practices, and day-to-day support activities.
- Built recurring reports and interactive dashboards in Power BI and Tableau to track case volume, resolution trends, product issues, and team performance metrics.
- Supported analysis of billing, refund, payment, and subscription-related cases to improve escalation visibility, reporting accuracy, and customer experience.
- Built automated data processing workflows that reduced manual reporting efforts by 30%.
- Performed data validation and root-cause analysis to improve reporting reliability, data quality, and executive decision-making.
- Documented reporting logic, recurring issues, and process improvement opportunities to support long-term operational efficiency and knowledge transfer.
- Supported production reporting environments by troubleshooting ETL failures and resolving data issues.

Data Analyst (Contract)

March 2019 – August 2019

Clasc, Hyderabad, India

- Analyzed business and user data to identify reporting gaps, dashboard improvement opportunities, and product usage trends supporting strategic decision-making.
- Built SQL queries and Excel-based reports to support recurring business analysis, KPI tracking, and stakeholder reporting requirements.
- Performed data quality checks, validation, and cleanup to improve reporting accuracy, completeness, and consistency across multiple data sources.

- Collaborated with cross-functional teams to gather requirements, support User Acceptance Testing (UAT), and improve dashboard usability and adoption.
- Automated recurring reports using SQL and Python scripts, reducing manual reporting effort and improving report delivery timelines.

Business Data Analyst

April 2018 – February 2019

Republic Tools, Hyderabad, India

- Supported workshop operations by tracking job orders, production status, material usage, billing activity, and delivery timelines for over 200 active projects.
- Built Excel and SQL-based reports to monitor pending jobs, production KPIs, monthly revenue performance, and operational delays.
- Worked with management and shop-floor staff to identify bottlenecks, improve order tracking workflows, and reduce manual follow-ups.
- Helped digitize manual reporting processes for invoices, customer orders, job-work status updates, and production tracking.
- Supported day-to-day operations within a manufacturing and machining environment, working with workshop personnel and CNC programmers.
- Developed a digital billing and receipt solution using SQL and JavaScript to improve transaction tracking and record accuracy.

EDUCATION

Master of Science in Information Systems

August 2022 – May 2024

Central Michigan University, Mt. Pleasant, MI | GPA: 3.72/4.00

Bachelor of Technology in Computer Science

September 2014 – June 2018

CMR Technical Campus, Hyderabad, India | GPA: 3.55/4.00

CERTIFICATIONS

- Lean Six Sigma Green Belt
- Celonis Process Mining: From Theory to Execution
- Microsoft Certified: Azure Data Engineer Associate (In Progress)

KEY PROJECTS

Personal Systems & Analytics Portfolio (www.saikrishnagoli.com)

- Designed and built a custom portfolio application using Next.js to organize professional experience, systems projects, and analytics work.
- Implemented modular components, routing, and structured content architecture to clearly present technical skills and project outcomes.

YouTube Data Analysis Pipeline

- Built a cloud-based data lake using Amazon S3 and developed end-to-end ETL workflows using AWS Glue and Apache Spark.
- Analyzed video performance, engagement trends, and audience behavior to generate actionable insights for content strategy.
- Developed interactive Power BI dashboards to visualize KPIs and improve reporting visibility for stakeholders.

Pharma Life Project

- Developed a pharmaceutical inventory management application using Python, Tkinter, and MySQL to automate inventory tracking, prescription records, and sales reporting, improving operational efficiency by 40%.
