

Andrew S. Phung

Cranston, RI | 401-419-0070 | aphung28@gmail.com | linkedin.com/in/andrew-phung/

EDUCATION

University of Rhode Island, Kingston, RI

May 2019

Bachelor of Science in Computer Engineering

- Minors: Computer Science and Mathematics
- Dean's List scholar

TECHNICAL SKILLS

Proficient in Microsoft Windows, Linux, Microsoft Office, web-based applications, Java, C++, Mathematica, MATLAB, Multisim, ML, Prolog, HTML, CSS, JavaScript, Python, Cisco Webex, Microsoft Teams, Jira, Aha, Clarity, Rally, Power BI, COBOL, JSON, Confluence, Storylane, Docusign, Datadog, Slack, Salesforce

PROFESSIONAL EXPERIENCE

Numerated Growth Technologies (acquired by Moody's Corporation), Boston, MA

Client Support Engineer

May 2024 – January 2025

- Provided technical assistance and support to Numerated's banking clients, in relation to Numerated's lending products and services
- Effectively troubleshoot and fixed technical issues in a timely manner, while escalating critical issues to the appropriate internal departments – resolved 100% of my assigned technical support cases
- Documented the different types of unique processes needed to most efficiently resolve issues within each respective bank's configuration of their UAT and production environments

Fidelity National Information Services, Jacksonville, FL

Technical Analyst

June 2019 – June 2023

- Performed a variety of developmental coding and testing tasks while collaborating with internal stakeholders and company executives
- Researched and analyzed design documents, processes, and procedures to resolve business issues
- Managed and organized Aha backlog, Jira repository, and Rally agile tool on the next generation banking product management team
- Progressed product roadmap prioritization by handling migrations and automated integration between items within each project management tool

University of Rhode Island, Kingston, RI

ELECOMP Capstone Design Consultant

September 2018 – May 2019

- Counseled a Capstone design team on the software tasks of their bench automation project

PROJECT EXPERIENCE

Storylane Tutorials

- Created step-by-step tutorials using Storylane to distribute to each bank that exhibited the full process and capabilities of applying for each lending product available at Numerated

Modern Banking Platform Client Dashboards

- Utilized Power BI to produce dashboards that exhibited all data and metrics relevant to each MBP client of FIS

Modern Banking Platform Idea Portal and Workspace

- Configured, optimized, and integrated an idea portal and workspace in Aha that was used for company-wide input of internal enhancement requests, clients' enhancement requests, and product feedback at FIS

Capstone Design

- Created a switch mode power supply small signal development tool that enables the design and enhanced simulation of buck and boost regulator configurations by calculating the recommended values for each of the design components

The Joy of Programming

- Built a portfolio website with the use of HTML and CSS

Classistance

- Worked in a team of four to build a mobile application for academic management and enhancement, including work with the user interface and Unified Modeling Language (UML)
