EDUCATION

The University of Texas at Dallas

Master of Science in Management Information Systems

August 2024 - May 2026

GPA - 3.54/4.0

SRM Institute of Science and Technology

Bachelor of Technology in Computer Science and Engineering (AI&ML)

August 2020 - June 2024

GPA - 3.6/4.0

SKILLS

Programming & Tools: Python, R, SQL, NoSQL, Pandas, NumPy, Snowflake, Azure Synapse, SQL Server, DynamoDB, Git.

Analytics & BI: Data Visualization, Data Analysis, Power BI (DAX), Tableau, plotly, ggplot2, KPI design, A/B testing, Data Storytelling, Dashboarding, Timeseries Analysis, Trend Analysis, Statistics, Data Management.

Cloud & Data Engineering: ETL/ELT, Azure Data Factory, Pyspark, ADLS, CI/CD, AWS (S3, Lambda, CloudWatch, RDS, API Gateways, Data Warehousing).

Key Attributes: Agile, Scrum, SDLC, Data Governance (RBAC, Encryption, Catalog), Data Quality (Validation Rules), Jira, Confluence, MS Office 365, Stakeholder Management, Documentation, Reporting, Project Planning, Operations Management.

Certifications

AWS Solutions Architect(www.credly.com/badges/4437625a-45b9-4ca9-ba67-e1a816b09a5e/public_url)

PROFESSIONAL WORK EXPERIENCE

Nagamani Auto Finance (NAF) - Business Operations Analyst Intern

May 2024 - August 2024

- Prioritized cases using an Excel scoring model (DPD, ticket size, PTP history); lifted monthly recovery 18% for 3 months and resolved 90+ DPD by 6% points.
- Designed an EMI/delinquency tracker (pivots, SLA flags, conditional formats) reduced overdue-detection time 75% (48 hours to under 12 hours) and accelerated first outreach.
- Standardized WhatsApp/SMS/email scripts and cadences; increased right-party contact 22% and promise-to-pay conversions 12%.
- Audited 10,000+ Auto Cloud records and coordinated follow-ups, compressed reconciliation errors 35%, achieved 100% audit readiness, cut missed follow-ups 30% & raised first-contact-within-24h 62% to 85%.

PROJECTS

NBA Schedule & Performance Analytics

July 2025 - August 2025

- Engineered 4-in-6 density logic and per-82 normalization across 2014–2024; in the 2024–25 draft identified 26 OKC 4th game played in 6 consecutive nights vs league average 25.1.
- Developed an interactive visualizer (road miles into game, B2B flag, 4-in-6 ring) for OKC and DEN, enabled coaches to scan dense stretches in under 5 minutes.
- Estimated schedule impact via logistic modeling of rest/density/travel; reported BKN defensive eFG% 54.3% overall 53.5% when opponent on 2nd B2B and team schedule-wins deltas

Customer Sales Pipeline Optimization with Azure & Snowflake

March 2025 - June 2025

- Engineered parameterized ELT in Azure Data Factory to ingest 2.5M+ Adventure Works rows into Snowflake, added row-count, RI, and null checks to hit 99.9% accuracy and sub-10-minute refresh SLAs.
- Designed a star-schema mart and authored 20+ dbt models, Optimised BI workloads query runtime 45% and decreased SQL prep steps 65%.
- Implemented Azure DevOps CI/CD with gated releases, RBAC, column-level encryption, and lineage, refined manual promotions 70% and improved governed access.

Blood Donor Retention Analytics

December 2025 - February 2025

- Aggregated donation events with SQL (joins, CTEs, date logic) and defined KPIs, established a single source of truth with zero conflicting KPIs.
- Trained logistic regression and random forest models with feature engineering, predicted churn at 83% accuracy, prioritizing high-risk segments.
- Published an interactive Tableau dashboard (filters, drilldowns); informed a campaign plan projected to lift retention 15% in target cohorts.

Dynamic Pricing Simulation using Python

October 2024 - November 2024

- Modeled price elasticity and demand curves in pandas/NumPy with scenario testing, identified tiers projected to raise margins 10%, visualized sensitivity and revenue trade-offs in Tableau.
- Documented assumptions, data sources & enabled to approve an A/B plan in one review cycle.
