SUMMARY

Experienced and skilled Cybersecurity professional with a strong background in Information security. I bring 2.5+ years of experience in Information Security, cloud technologies and full stack development. Strong technical background, with expertise in cloud computing platforms like AWS, Azure and experience in integrating identity solutions Azure AD and Ping. Certified AWS Developer-associate and COMPTIA Security+ with hands on experience in serverless architecture, database security and automation. Skilled in threat hunting using IDR, Vulnerability Management, Secure authentication protocols and SIEM.

WORK EXPERIENCE

Information Security Specialist, *AdaptHealth*

Jan 2024 – present | Orlando, United States

- **Implemented** responsive user interfaces, improving accessibility compliance by 20% and enhancing user experience for internal and external stakeholders.
- **Optimized** network infrastructure by auditing configurations and applying **Quality of Service** principles, reducing system downtimes by 25%.
- **Utilized** Rapid7 and SentinelOne for proactive alert monitoring, reducing threat response times by 30% and minimizing network disruptions.
- **Automated** security and administrative tasks using PowerShell and VB Scripts, including report generation, scheduled task management, and Azure Active Directory (AD) details retrieval.
- **Aggregated** and **analyzed** alerts using Python and custom ETL pipelines, **advising** leadership on strategies that reduced incident recurrence by 40%.
- **Developed** custom queries and **automation** workflows to optimize security incident monitoring and response in **ZScaler & R7 SIEM**.
- **Collaborated** with MSPs and performed **vulnerability remediation** on all internal Azure Servers and Intune Endpoints leading to 36% reduction in Risk score and submitted biweekly reports to **Audit** team.
- **Authored** and **maintained** detailed documentation for security systems, **compliance policies**, and workflows, reducing onboarding time for new team members.
- **Enhanced** code quality, consistency, and adherence to secure development best practices, ensuring security protocols were met.
- **Resolved** access control issues in Active Directory through **analysis** and adjustment of privileged accounts and security groups.

Software Engineer Intern, *ITIS Pro LLC*

Aug 2024 – Dec 2024 | Atlanta, United states

- **Understood** and produced the technical specifications for new or existing systems.
- **Collaborated** with the team in designing, architecting, implementing, and testing phases.
- **Developed** JEE Web applications using available tools & technologies.
- **Designed** and implemented scalable enterprise web applications using Spring Boot, JEE, and AWS services (S3, DynamoDB, Lambda), improving system scalability by 30%.
- **Collaborated** with an **agile** team of 8 engineers, using tools like Jira for sprint planning, to deliver projects 15% faster than projected timelines.
- **Integrated** Dynatrace for monitoring and optimized application performance, reducing response times by 20%

Associate Software Engineer, *Cognizant*

Jan 2021 – Jan 2022 | Bangalore, India

- **Developed** and **optimized** ETL pipelines using Azure Data Factory and PySpark, enhancing data processing efficiency by 40%.
- **Designed** and deployed Spark applications with Spark-SQL for real-time data aggregation, providing actionable insights into customer behavior.
- **Built** interactive dashboards using Amazon QuickSight, streamlining client reporting and enabling better decision-making.
- **Automated** data workflows using Python scripts, reducing manual intervention and data processing times by 40%.
- **Maintained** and monitored data pipelines, ensuring 99.9% data flow reliability across production environments.

SKILLS

Certifications: AWS Developer-Associate, COMPTIA Security+, HIPAA Privacy & Security | **Skillset:** SIEM & IDR, IAM, Incident Response, Data Loss Prevention, Access Control, TCP/IP, Alert Monitoring, Risk Assessment, Vulnerability Management, Data Security, Endpoint Security, Software Asset Inventory & Management, Log Analysis & Query Development, Data Base Security, Data Classification, Security Awareness Training, KPIs & SOPs, Scripting & Automation, Compliance and audit reports | **Programming:** Java, SQL, Python | **Scripting:** PowerShell, VB script | **Tools:** Rapid7, Sentinelone, ZScaler, Symantec DLP, Splunk, Active Directory, Service Now, JIRA, FreshService | **Databases:** MySQL, Microsoft Azure Studio

EDUCATION

MS in Computer Science (Minor in CyberSecurity)

Jan 2022 – May 2023 | Kansas City, United States

PROJECTS

House Party Music Player Spotify Room, Skills: Python, React.js, Django

House Party Music Player is a collaborative full stack web application developed with React.js and Django. It enables users to create and join rooms for a shared music playback experience. By integrating with the Spotify Web API, this application offers real-time music control and authentication.

AWS Serverless Website, Skills: AWS Lamba, Amazon API Gateway and DynamoDB

Use of various cloud services to implement the web-based application and making it available to the users specific to the region that it is implemented for. It is a simple serverless web application using AWS components – AWS Lambda, Amazon API Gateway, Amazon DynamoDB, Amazon Cognito and AWS Amplify Console.

Information Security using Play Color Cipher, Skills: Play Color Cipher, RSA Algorithm, Cryptanalysis, Brute Force & Birthday attacks

An innovative cryptographic mechanism based on play color cipher is used for encryption and decryption of message by using RSA algorithm for key transmission.
