PROFILE

Dynamic and skilled Cloud Security Engineer with extensive experience in designing, implementing, and maintaining secure and robust IT infrastructures. Proven track record of leading security projects and collaborating effectively with cross-functional teams, including development, operations, and compliance. Proficient in various cloud technologies with a deep understanding of best practices and industry regulations. Adept at routine security tasks such as threat hunting, incident response, and vulnerability assessment, with a strong commitment to maintaining the confidentiality, integrity, and availability of cloud-based systems.

SKILLS

- **Cloud Platforms:** AWS, Microsoft Azure, Google Cloud Platform (GCP)
- **Security Frameworks:** CIS Benchmarks, PCI-DSS, NIST 800-53, ISO 27001, GDPR, HIPAA
- **Tools:** Palo Alto, Git, SVN, Ansible, Jenkins, Docker, Kubernetes, Prometheus, Grafana, ELK Stack (ELK), Terraform, Splunk, Wiz, STiG, JIRA, Confluence, Nagios, Zabbix, Datadog, AWS Resources, Azure Resources, Tomcat, IP Services, Harness VM, CAD (Computer Aided Drafting), GitLab, GitHub, Sonatype Nexus, EMR, Podman, HashiCorp Vault, Consul, HSM, TLS/SSL, CyberArk, Veracode, SonarQube, PKI, VirtualBox, KMS, SCP, LogRhythm, Telegraf, Automation Platform, Qualys, Snyk, Artifactory
- **Databases:** MS SQL Server, MySQL, MongoDB, PostgreSQL, Aurora
- **Networking:** TCP/IP, DNS, DHCP, VPN, Load Balancing, Firewall Technologies
- **Programming Languages:** Python, Bash, XHTML/HTML5, XML, JavaScript, XPATH, XQUERY, JSON, YAML, Groovy
- **Platform Monitoring:** Datadog, Nagios, Zabbix, SolarWinds
- **Miscellaneous:** Palo Alto Network, Wiz, Lacework, IAM, Data Encryption, VPC, Checkmarx, Security Hub, Azure Security Center, GCP Security Command Center, Incident Response, Threat Hunting, Digital Forensics, Network Segmentation, Access Controls, Performance Optimization, Fault-tolerant Design

EXPERIENCE

SENIOR CLOUD SECURITY ENGINEER

August 2022 – Present

University of California, Office of the President - Oakland, CA

- Led the design and implementation of secure, scalable AWS architectures, ensuring high availability and alignment with CIS and NIST standards. Adopted cloud-native design principles, including microservices architecture and containerization to enhance stability and flexibility.
- Implemented advanced encryption protocols for data transmissions and deployed firewalls to safeguard confidential information during transit, effectively blocking malicious traffic and reducing malware incidents.
- Implemented policy-as-code using Hashicorp which enhance the security, compliance, and operational efficiency of our cloud infrastructure. Implemented automated risk assessment and Implemented a comprehensive GRC framework for our platform hosted on AWS.
- Slashed and mitigated company security risks by 20% through the configuration of access controls.
- Conducted vulnerability assessments with Prisma Cloud, mitigating risks such as Log4J2 and ensuring robust cloud infrastructure security.
- Executed firewalls, IDS/IPS, SIEM, DLP, and endpoint security solutions to reduce malicious attacks significantly.
- Designed security solutions to protect the company's end to end cloud infrastructure framework, Analyze and assess potential threats based on STRIDE and DREAD model

CLOUD SECURITY ANALYST

January 2021 – July 2022

Slalom Build - Atlanta, GA

- Designed and implemented a Cloud Security policy using AWS Security Hub, AWS Config, and AWS Systems Manager to enforce compliance and best practices across cloud resources, enhancing data integrity and reducing security misconfigurations by 30%.
- Conducted weekly security operations for phishing alerts, Security Operations Center (SOC) alerts, and 40+ other security events.
- Deploy Data Loss Prevention (DLP) solutions to monitor and protect sensitive data from unauthorized access. Worked with different range of SAST and DAST tools.
- Developed a monthly education plan to improve the IT security-related skills and technologies of 50+ staff members.
- Created a virtual desktop environment that enables 2400+ users to access applications remotely within RW's network via the cloud.

EDUCATION

BACHELOR OF SCIENCE (B. SC) PHYSICS

Federal University - Nigeria

Completed in: 2011

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- AWS Certified Solutions Architect Associate
- AWS Certified Developer Associate
- AWS Certified DevOps Engineer Professional
- AWS Certified Security Specialty
- HashiCorp Certified: Terraform Associate
- Certificate of Cloud Security Knowledge (CCSK)

PROFESSIONAL AFFILIATIONS

- Member, Cloud Security Alliance (CSA)
- Member, Information Systems Security Association (ISSA)

REFERENCES

- Available upon request.

- Ensure that data is encrypted End-to-End using End-to-End Encryption (E2EE) mechanism. Used OpenSSL to configure TLS 1.3 on client's server.
- Developed training materials about information security awareness for 40+ staff members in the first month of employment.
- Utilized SQL injection, cross-site scripting, and OS command injection to pinpoint and manipulate vulnerabilities in 30+ web applications.
- Employed Control verification to Identify security requirements based on risk assessments, regulatory compliance, and organizational policies.

CLOUD SECURITY ENGINEER

January 2019 – Decemner 2020

SiRF Technology Holdings, Inc, San Jose, CA

- Wrote and updated security plans to meet NIST 800.53 standards as a team.
- Participated in two security audits conducted by the Department of Energy, successfully gaining positive results from the performance in the task.
- Used VLANs and firewalls to physically and logically separate networks into distinct security domains. Configured ACLs on routers and switches to control traffic flow between VLANs
- Wrote batch files to force check-in and updates for 200 laptop computers.
- Managed and conducted a site-wide inventory project for 200 laptop computers, maintaining correct and accurate records for company clients.
- Implemented and managed automated access control systems that increased security and decreased human error significantly.
- Use OpenSCAP to scan our virtual machines in your cloud environment, then import the results into STIG Viewer to document compliance status.
- Scan all data repositories, including databases, file storage, and data lakes, to identify data assets using different native and third party scanning tools.
- Fixed technical difficulties with the company's access control system.

SECURITY ENGINEER

May 2017 – Decemner 2018

T-Mobile, Dallas, TX

- Implemented Kill Switches which automatically blocks all internet traffic when the VPN connection drops thereby preventing data from being sent over an unsecured connection.
- Securing network infrastructure through firewalls, intrusion detection/prevention systems, and secure configurations.
- Implementing security measures in applications, such as secure coding practices and regular updates.
- Configured and Implemented Local, Remote and Dynamic port forwarding where necessary. Implemented SSH hardening to protect against unauthorized access and potential vulnerabilities.

SECURITY ENGINEER

May 2015 – March 2017

United Consulting Group, Atlanta, GA

- Implemented a set of scripts that automated routine tasks, reducing error rate and saving hours of manual processes weekly.
- Detected and researched potential security threats, reducing breach risk significantly.
- Employed encrypted technology using RSA and AES, resulting in a 30% improvement in communication security.
- Utilized Wireshark for network traffic analysis, leading to the detection and remediation of different network vulnerabilities.
- Implemented security measures in applications, such as secure coding practices and regular updates. Secured database configurations and applied patches.

SECURITY ENGINEER (Entry Level)

FEB 2013 – March 2015

Zenith Bank Plc, Lagos, Lagos

- Monitor the company's security systems and respond to potential threats or anomalies.
- Assist in creating and distributing security awareness materials (e.g., phishing awareness campaigns).
- Worked as part of a larger security team on national level cyber defense exercises.
