PROFESSIONAL SUMMARY

Full stack software engineer with a Computer Science degree from UNC Charlotte, experienced in designing scalable backend systems, REST APIs, and AI driven applications. Proven ability to architect complex systems, optimize data handling, and deliver measurable technical impact through clean code and systematic problem solving.

SKILLS

Programming Languages: Python, JavaScript, TypeScript, Java, SQL, HTML, CSS

Frameworks & Libraries: FastAPI, React, Express.js, Node.js, SQLAlchemy, Axios

Databases: MySQL, SQLite

Cloud & DevOps: AWS (EC2), Docker, Docker Compose, Elastic IP/DNS Configuration, Security Groups, Linux (Ubuntu Server administration via SSH)

Tools & Software: REST APIs, Git, GitHub, JWT, bcrypt, Postman, Vite, Figma, Responsive Web Development, OOP

PROJECTS

AI-Powered Stock Research Platform

- Architected a full stack stock research platform delivering AI generated investment research by designing 10 REST API operations across 4 backend services using FastAPI dependency injection and provider abstractions, enabling seamless switching between Financial Modeling Prep and Alpha Vantage data sources without modifying business logic.
- Implemented a reusable market data provider system with caching and retry logic using standardized data models, reducing external API calls and improving reliability across the platform.
- Built 30+ reusable React components with responsive design and maintainable component hierarchy, enabling rapid feature development and consistent user experience across the application.
- Containerized and deployed a full stack application (FastAPI + React) to AWS EC2 running Ubuntu Server, SSH-ing in to manage Docker Compose orchestration, security groups, and Elastic IP/DNS configuration for production access.

IT Asset & Ticket Management System

- Built a full stack asset and ticket management system using React frontend, Express.js backend, and MySQL relational database with role based access control, delivering secure data handling for sensitive operational information.
- Developed 20 REST API operations with JWT authentication and role based authorization, implementing role based access control to protect sensitive asset and ticket data.
- Designed a normalized MySQL schema with 4 tables and 6 foreign key relationships, ensuring data integrity and query efficiency for asset tracking and ticket lifecycle management.

Eevee's Journey

- Built a Java desktop adventure game demonstrating core object oriented design patterns and game loop architecture, implementing clean separation of concerns and maintainable code structure.

Ling's Cars Website Redesign

- Redesigned website user interface based on usability testing findings, iterating on information architecture and visual hierarchy to improve navigation and user engagement.

WORK EXPERIENCE

Operations Associate

Feb 2024 - Present

Micro Center

- Systematically diagnosed and resolved complex Windows 10/11 hardware, software, and peripheral issues using structured troubleshooting methodology, reducing average resolution time and improving first contact fix rates.
- Investigated operating system failures and hardware connectivity problems to identify root causes, documented patterns, and implemented solutions that prevented repeat issues and improved system stability.
- Maintained a 100% Recommended Associate customer satisfaction score throughout the 2024-2025 fiscal year by delivering clear technical communication and reliable problem solving guidance to customers across skill levels.

Private Tutor

Aug 2019 - May 2026

Self Employed

- Developed personalized mathematics, English, and science curricula adapted to individual student learning styles and performance levels, resulting in measurable improvements in student understanding and academic outcomes.
- Created custom lesson plans with targeted problem solving techniques that helped students build foundational skills and gain confidence in subjects.

EDUCATION

University of North Carolina at Charlotte

Aug 2022 - May 2026

Bachelor's, Computer Science, GPA: 3.42

CERTIFICATIONS & ACHIEVEMENTS

- Microsoft Technology Associate (MTA): Introduction to Programming Using Python, Microsoft
