**Tools:** Chrome Dev Tools, Gitbash, NPM, Postman, SSMS, VS Code, Visual Studio, Yarn, Nginx, Apache, MySQL Workbench, Notepad++, Git

## Experience

### FULL-STACK ENGINEER

Zenith | Remote | July 2024 - December 2024

- Working alongside multiple developers to implement RESTful APIs within Django to increase the performance of the internal server by 25%.
- Utilized Angular components for the front-end app for the end-user experience.
- Extensively built test coverage for multiple all-new features, to reduce the number of customer complaints by a whopping 50%.

### FULL-STACK ENGINEER

Pomu | Remote | March 2024 - June 2024

- Designed/developed the API and RESTful service in 1.5 months, having enhanced the operation of the enterprise design.
- Worked in a small, but agile team of 5 developers, prioritizing the features that were most necessary to have the software be shipped.
- Reduced the development costs by 25% by creating to merge relationship databases in Java Spring, helping it become more of a streamlined product.

### BACK-END ENGINEER

ONE | Remote | July 2023 - March 2024

- Queried MySQL database queries with Python using Python-MYSQL Connector and MySQL DB packages to retrieve the information needed for the company, resulting in an 80% retrieval rate.
- Engineered a Django (Python) routine to log valuable data for developers to be able to quickly discover bugs within the software, creating a 75% more stable program and making it more efficient to create more features.
- Implemented a login module for all users, the ability to make purchases for digital key codes for video games. Written in a modularized design for simple, but efficient implementations.

### FRONTEND DEVELOPER

Ocean Technologies | Remote | February 2023 – July 2023

- Overhauled the frontend technology into using React (JavaScript), for new features and a more modernized, responsive end-user interaction.
- Improved the UI, tweaking an internal tool to check the inventory for the fish supplies, improved efficiency by 10%.
- Migrated the multi-page UI into a single page app, making it easier for customers to visit the page and increasing the engagement by 10%.
