

Patrick Abonado
7091 Bean Station Road, Prattsburgh NY 14873
(516)884-9658
patricksworkemail81@gmail.com

PROFESSIONAL SUMMARY:

- 2+ years of advanced application development in analysis, design, and implementation & testing of Object-oriented applications in the client/server, web services, distributed, and integrated environments using J2EE.
- Experience in Java/J2EE technologies which involves JDBC, Servlets, JSP 2.0, JSF, XML, Web Services (SOAP, REST), Hibernate, and Spring Framework.
- Forward-thinking Software Engineer with a background working productively in dynamic environments.
- Fluent in SQL and Java programming languages used to develop software within ERP.
- Experienced Back-end developer and UI developer trained in Java, Angular, NodeJs, HTML5.
- Proficient in Web designing & development, using HTML5, CSS3, JavaScript, XML, Angular.js, JSP and JSON.
- Experience in developing web-services using REST, SOAP, WSDL.
- Extensive development experience in web applications using Java8, J2EE, JSP, spring and API's like JDBC, XML, JavaBeans.
- Development experience with open-source frameworks like Hibernate, spring, Spring Boot. Strong experience in MVC architecture and design implementation using JSP
- Worked on UI using Angular, HTML and CSS3.
- Designing user interactions on web pages.
- Expertise on working with Presentation layer frameworks like JSP, HTML, XML, CSS and JavaScript.
- Experience on OOP (Objective Oriented Programming)
- Proud team player focused on achieving project objectives with speed and accuracy.
- Experienced in waterfall, Agile and Scrum software development methodologies.
- Excellent client skills and the drive to complete tasks effectively and efficiently as well as the ability to communicate effectively with all levels of management and the client.
- Strong problem-solving, organizing, communication and planning skills, with ability to work individually and in a team environment.

EDUCATION:

BS Software Development, (GPA 3.0) Western Governor's University, Millcreek, UTAH

TECHNICAL SKILLS:

Languages	Java 8, PL/SQL, SQL, C++, Python
Java/J2EE Technologies	Core Java, JSP, JMS, Java Beans, Java Multithreading, Java Database Connectivity (JDBC)
Web Technologies	HTML5, XML, JSON, CSS3, Angular
Web Frameworks	Spring, Spring Boot, Hibernate
Design & GUI Tools	IntelliJ, Visual Studio, Visual Studio Code, Android Studio
App servers	Apache Tomcat
Databases/Tools	Oracle, SQL Server, MySQL
Methodologies	Agile, Waterfall
Operating Systems	Windows

Version Control Tool	Git Hub, CI/CD
Build Tool	Maven

PROFESSIONAL EXPERIENCE:

Client: Clevertech, NY

Feb 2022-Present

Role: Java Developer

Responsibilities:

- Experience in medium to large-scale Java multi-threaded applications.
- Utilized Spring Boot for backend development.
- Tested REST APIs in Spring Controller using Postman.
- Developed the data layer using Hibernate, including XML mapping files, and POJO classes.
- Implemented RESTful standards in Spring MVC and Spring Web Flux (Reactive stack) for connecting the model with the view.
- Worked on Windows platforms with various technologies such as SQL, XML, HTML, Core Java, and Shell Scripting.
- Deployed applications using Tomcat server and managed CI/CD processes.
- Developed TypeScript reusable components and services for consuming REST APIs in Angular 9.
- Utilized GIT for version control and IntelliJ IDE for development.
- Worked extensively with Java 7, Java 8, Spring Framework, Spring Boot, Spring Integration, Jakarta.
- Proficient in Maven for builds
- Designed RESTful Web services using Spring Framework and implemented security with Spring Security.
- Designed data models for MySQL databases.

ENVIRONMENT: Java, J2EE, JSP, Spring MVC, AngularJS, Servlets, JSP, JavaScript, CSS, XML, HTML, JMS, REST, Oracle, Maven, JUnit, GitHub, Windows, Servlets, JSP, JDBC, Microservices.

CERTIFICATION:

- 2023, Axelos Itil v4 Foundations Certificate
Certificate: GR671540862PA
- 2023, CompTIA A+ Certification
Verification Code: EBKKBVE5PNQQ1W51
<http://verify.CompTIA.org>
- 2021, Google IT Support Certificate
<https://www.coursera.org/account/accomplishments/specialization/certificate/FYHWYS6EDFQ8>

PROJECTS:

- **Academic Planner**

Link : <https://github.com/PatrickAbonado/AcademicPlanner>

Objective: Mobile android application that keeps track of a user's academic progress by tracking and displaying input term, course, and assessment data stored on the SQLite database.

Functionality: CRUD term, course, & assessment data, Schedule alert notification, Input format validation for scheduling times

Languages: Java, SQLite, XML

Tools: Android Studio

- **Schedule Manager**

Link : <https://github.com/PatrickAbonado/ScheduleManager>

Objective: Standalone JavaFX application providing users with the ability to store and access customer and appointment data stored on the MySQL database.

Functionality: User login credential authentication, User login & activity tracking, CRUD customer and appointment data, Schedule time input validation & notification, Multiple time-zone localization, Appointment & customer search, Support for English & French language localization

Languages: Java, FXML, MySQL

Tools: IntelliJ Ultimate Student, JavaFX, Scene Builder

- **Text Adventure Game**

Link : <https://github.com/PatrickAbonado/Python-Text-Game>

Objective: Game where users play by moving through different game places to collect items to defeat the dragon.

Functionality: Prompt user for menu selection, Display menu selection result on console

Language: Python

Tools: PyCharm

- **Student Roster Project**

Link: <https://github.com/PatrickAbonado/Cplusplus-Student-Roster-Project>

Objective: Parse through the predefined data array in *main()* and display data organized according to project prompts.

Functionality: Output all students and their data to the console, Output the invalid email format data to the console, Output the average number of days per course for each student on the console, Output the student details of students that are in the software degree program on the console, Remove a student from the roster, Prior to exiting the program delete all roster entries from memory

Language: C++

Tools: Windows Visual Studio

- **Investment Application**

Link: <https://github.com/PatrickAbonado/Cplusplus-Investment-App>

Objective: Store user investment input data of the initial investment amount, monthly deposit amount, annual interest amount, and number of years. Depending on the user menu selection, output either the yearly investment balances for all investment years with or without monthly deposits.

Functionality: Prompt and store user investment input data, Calculate and display yearly balances with or without monthly deposit

Language: C++

Tools: Windows Visual Studio
