About Me

As a seasoned **Software Development Engineer in Test (SDET)** with over 5 years of hands-on experience in both manual and automation testing, I excel in thorough analysis, precise data validation, and efficient defect management. My expertise includes designing and executing comprehensive test scenarios, cases, and scripts, ensuring top-tier software quality. My attention to detail and strong communication skills enable me to thrive in collaborative environments, effectively contributing to team success. I am dedicated to leveraging my skills to drive excellence and deliver superior results in every project.

Skills

- **Testing Tools/Frameworks:** Selenium WebDriver, JUnit, TestNG, and RestAssured
- **Development & Test Approaches:** Waterfall, Agile/Scrum, SDLC, STLC
- **Test Management:** JIRA, Confluence
- **Tests Performed:** Smoke, Functional, Regression, GUI, Black Box
- **API Tools:** POSTMAN, Swagger, Rest Assured
- **Project Build Tool:** Maven
- **Languages:** Java, HTML, SQL, JavaScript
- **Continuous Integration/Continuous Delivery:** Jenkins
- **Version Control Tools:** Git, GitHub, Bitbucket
- **IDE:** IntelliJ IDE
- **Databases:** PostgreSQL, OracleSQL, JDBC

Professional Summary

- Expertise in **Automation Testing** of web-based applications across multiple domains, ensuring high-quality software standards.
- Proficient in Java programming and adept with testing tools and libraries including **Selenium WebDriver**, **JUnit**, **TestNG**, and **Cucumber**.
- Extensive experience in testing **Rest API** web services using **POSTMAN** and **Rest Assured** for automation.
- Developed **Data-Driven** and **Behavior-Driven Frameworks** with the **Page Object Model** design pattern using **Java**, **Selenium WebDriver**, **Maven**, **JUnit**, and **Cucumber**.
- Proficient in **Black Box** testing methodologies throughout the QA lifecycle.
- Successfully managed multiple projects in dynamic environments, delivering results efficiently.
- Skilled in writing **SQL** queries for comprehensive database data validation.
- Expertise in Data-Driven Testing using **Apache POI** for handling Excel data and **JDBC** for **PostgreSQL** connectivity.
- Strong background in writing object-oriented code for testing based on **OOP** principles in Java.
- Experienced in identifying and implementing improvements for web-based applications, testing new features, and resolving testing issues.
- A collaborative team player and self-starter, capable of working independently and leading teams, with excellent communication skills.
- In-depth knowledge of **Software Development Life Cycle (SDLC)**, **Software Testing Life Cycle (STLC)**, and **Agile Scrum** methodologies.
- Proficient in version control tools like **GIT** and **Bitbucket**, and project management tools such as **JIRA** and **Confluence**.
- Skilled in creating and executing **functional** and **regression** tests for **UI**, **API**, and **Database** components.

Experience

Darby Consulting / SDET

02/2022 - Current

- Conducted detailed analysis of Business Requirements Document (BRD) using root cause analysis techniques, formulating 50+ comprehensive test cases ensuring software functionality aligns with expected behavior.
- Collaborated with Business Analysts, QA testers, and developers, leading to the successful completion of over 100 user stories and tasks, improving overall team efficiency.
- Executed 200+ manual test cases using JIRA, meticulously reported outcomes and curated test cases for potential automation with Selenium.
- Expertly handled web elements like pop-ups, alerts, iframes, windows, and dropdowns using Selenium WebDriver, helping reduce overall test script execution time.
- Utilized XPATH, CSS, and other Selenium locators for precise web element identification.
- Developed 20+ reusable utility methods within the testing framework using Java, enhancing test efficiency and maintainability.
- Managed defect tracking in JIRA, retested and resolved defects, achieving a 99% defect closure rate.
- Developed, executed, and maintained 100+ automation test scripts using Selenium and Java within a BDD framework, integrating JUnit and Cucumber.
- Conducted Rest API testing with POSTMAN and Swagger, configuring environment variables to enhance test reliability.
- Automated 50+ Rest API calls using Rest Assured library in Java.
- Utilized SQL queries for database validation, retrieving and verifying data accuracy, and leveraging JDBC for seamless database connectivity, improving data validation.
- Contributed to distributed test automation execution across multiple environments using Selenium Grid and Jenkins, helping to reduce test execution time.
- Managed Selenium synchronization issues by implementing Explicit and Implicit waits, helping to reduce regression testing failures.
- Delivered comprehensive Daily Status Reports to all team members, Team Leads, and Managers.

CitiBank / QA Automation Engineer

01/2019 - 02/2022

- Actively engaged in Scrum ceremonies, including Daily Stand Up, Sprint Planning,

Sprint Retro, and Sprint Demo.

- Utilized JIRA for tracking user stories and bug reporting, and Confluence for documentation.
- Spearheaded the development and maintenance of a Test Driven Development (TDD) framework with Page Object Model (POM) design pattern, integrating Java, Selenium WebDriver, TestNG, and Maven.
- Conducted Rest API testing using Rest Assured Java library, validating accuracy for JSON responses against database and UI.
- Leveraged POSTMAN and Swagger for manual Rest API testing, ensuring coverage of API functionality.
- Verified database data persistence by crafting SQL queries in PostgreSQL and employed JDBC driver for integration.
- Utilized Apache POI library for efficient handling of MS Excel data, supporting data-driven testing and improving test coverage.
- Employed Bitbucket for version control and executed GIT commands, streamlining collaboration and version management.
- Played a key role in executing Smoke, Functional, and Regression testing.
- Facilitated communication and collaboration between developers, users, and team members, effectively resolving 50+ defects and improving task prioritization.
- Gained exposure to Performance testing, adeptly handling and resolving debugging issues during testing and deployment phases.

Tools Used

-
- | | | |
|----------------------|-----------------|------------------------------------|
| • Selenium WebDriver | • IntelliJ IDE | • Jenkins |
| • IntelliJ IDE | • Java | • JIRA |
| • TestNG | • Apache POI | • Page Object Model design pattern |
| • Bitbucket | • Confluence | • Rest Assured library |
| • JDBC | • BDD framework | • Cucumber |
| • JUnit | | |
