

Akshat Patil

Data Scientist

Irving, TX | +1 (469)-924-8881 | akshat@itjobmail.com

SUMMARY

- Data Scientist with 4+ years of experience in Data Extraction, Data Modeling, Data Wrangling, Statistical Modeling, Data Mining, Machine Learning, and Data Visualization.
- Experience working in Waterfall and Agile environments with project management tools like Jira.
- Understanding machine learning algorithms, including Regression analysis, Decision Trees, Neural Networks, and Natural Language Processing (NLP) for predictive modeling and pattern recognition.
- Proficiency in popular data science packages like NumPy, Pandas, Matplotlib, ggplot2, Scikit-Learn, Spark, PyTorch, TensorFlow, and SciPy, facilitating efficient data manipulation, analysis and visualization.
- Engineered and deployed Large Language Models (LLMs) on multi-GPU infrastructure, leveraging fine-tuning, optimization, and distributed computing to drive scalable AI solutions.
- Ability to transform data into clear and impactful visualizations using Tableau and Power BI for effective communication across technical and non-technical audiences.
- Well-versed in database management systems like MySQL and MongoDB, ensuring efficient data storage and management.

SKILLS

Methodologies: SDLC, Agile, Waterfall

Language: Python, R, SQL, SAS

Machine Learning: Regression analysis, Bayesian Method, Decision Tree, Random Forests, Support Vector Machine, Neural Network, Sentiment Analysis, K-Means Clustering, KNN, Classification, SVM, Naive Bayes, Natural Language Processing (NLP), LLM, CNN, XGBoost, LSTM

Packages: NumPy, Pandas, Matplotlib, SciPy, ggplot2, Scikit-Learn, PyTorch, TensorFlow, Keras, Spark

Visualization Tools & IDEs: Tableau, Power BI, Microsoft Excel, Visual Studio Code, PyCharm, Jupiter Notebook

Cloud Technologies: AWS, GCP, SageMaker

Database: MySQL, SQL Server, Oracle, MongoDB

Statistical Methods/Software/Other Skills: Hypothetical Testing, ANOVA, Time Series, Jira, Data Cleaning, Data Wrangling, Critical Thinking, Communication Skills, Presentation Skills, Problem-solving, Decision-making, EDA, Communication Skills, Databricks, Data Visualization, Predictive Analytics, Pattern Recognition, JMP, Data Integrity, Quantitative Data, Data Science, Statistics, Statistical Analysis, Data Analytics, Data Modeling, Big Query, Snowflake

Operating System: Windows, Linux

EXPERIENCE

Principal Financial, USA | Data Scientist

Jan 2024 - Current

- Worked in Agile environments to deliver iterative solutions and adapt to changing project requirements.
- Extracted patterns in the structured and unstructured data set and displayed them with interactive charts using ggplot2.
- Performed Naïve Bayes, Logistic Regression, Random Forest, and XGBoost to identify whether a loan will default.
- Implemented SVM algorithms for classification and regression tasks, finding optimal hyperplanes to separate data points into different classes or predict continuous outcomes.
- Designed and implemented recommender systems that utilized collaborative filtering techniques to recommend courses for different customers and deployed them to the AWS EMR cluster.
- Utilized natural language processing (NLP) techniques to Optimize Customer Satisfaction.
- Conducted data analysis using Tableau to monitor app operation status, improving response effectiveness by 23%.
- Collaborated with database administrators to optimize MySQL database performance, tuning query execution plans.

Silver Hill Energy Partners, USA | Data Intern

June 2023 - Dec 2023

- Utilized BERT and RoBERTa NLP models to advance Document AI capabilities, resulting in improved data extraction and document understanding, enhancing efficiency in document processing.
- Developed a comprehensive LAS file processing tool with Unsupervised ML for Electrofacies classification, enabling efficient data preprocessing and analysis for petrophysical applications.
- Implemented a REST API Python ETL pipeline, enabling data extraction, transformation, and loading, and developed a user-friendly web interface for streamlined data management.

Mphasis, India | Data Scientist

Jan 2019 - Dec 2021

- Conducted thorough testing and validation of data science models and solutions before deployment, following a structured and rigorous approach typical of Waterfall methodologies
- Integrated Databricks solutions into existing data pipelines through collaboration with cross-functional teams.
- Utilized various Python packages for data analysis like NumPy, Pandas, Matplotlib, SciPy, Scikit-learn, and Seaborn to find patterns of users and product behavior to research different features.
- Developed and deployed machine learning models with an average accuracy improvement of 15% over existing models, contributing to a 25% reduction in forecasting errors.
- Integrated Power BI with Excel and other data sources to create reports that update automatically with new data.
- Leveraged AWS EC2 (Elastic Compute Cloud) instances for running data processing tasks, model training, and inference, utilizing scalable computing resources to handle variable workloads.
- Implemented backup and recovery strategies for SQL Server databases, safeguarding data availability during system failures.

EDUCATION & CERTIFICATIONS

Master of Science in Business Analytics | The University of Texas at Dallas, Richardson, TX, USA

Bachelor of Engineering in Electronics and Telecommunications | University of Mumbai, Mumbai, Maharashtra, India

Graduate Certificate in Applied Machine Learning.

ACCELQ UTD Automation Hackathon.
