IT professional with a total of 3 years of experience as a RPA developer using Automation Anywhere and developing solutions for automating business processes . Experience in preparing and presenting business case for automable processes, solution designing and technical design documents.

Experience

Parasail.ai | Mumbai, Maharashtra

Software Engineer Process Automation | 08/2021 - 06/2022

- Developed processes and provided support for RPA processes for customer service and finance departments using A360.
- Worked on AARI Forms. Used commands like pdf, email, excel, keystrokes, capture, wait for window, image recognition etc.
- Processes included capturing data from various applications like SharePoint, Salesforce, JD Edwards.
- Code reviews were conducted and demos of bot run provided to the team. All best practices were implemented such as reusable code, naming conventions, error handling, configuration files, credential vaults etc.
- Created SDD's and TDD's, provided UAT and support post go live.

Kalpataru JMC Projects | Mumbai, Maharashtra

Engineer | 06/2018 - 08/2021

- Bots were developed using Automation Anywhere version 11.
- Worked on SAP GUI automation, metabots, email automation, pdf, image recognition, OCR, wait commands, keystrokes, object recorder. Also used SQL database, vbscripts, xml, IQ Bot.
- Automated processes for departments such as IT, Sales, HR, legal, Business development, Finance, procurement.
- Managed the communications for the RPA project. Created creatives such as emailers , standees and managed the company's internal site to spread the message of RPA. This in turn lead to many more departments coming up with ideas for automation and was a huge success. Received a good response for the communication of RPA.
- The automations developed by me and team resulted in a profit of 20 million for the company while reducing the time from months to a few days
- Was part of project coordination for the RPA project. Tracked the project and conducted meetings with business stakeholders.
- Provided support for live use cases and solved production issues within a short amount of time.
