Professional Experience

Covalent

AI Engineer Products & Innovation

Aug 2023 – Oct 2024

- Developed ID/passport verification models using **YOLOv8** and **Ultralytics**, achieving >90% accuracy.
- Enhanced document processing** through **OCR** blur detection system with **Google Cloud Vision API**, reducing document processing errors by 20% and improving data extraction accuracy.
- Fine-tuned LLM** chatbot for Roman Urdu numeral understanding, improving multilingual support.
- Reduced costs by 40% by deploying an **open-source LLM** with **Langchain** for intent classification.
- Improved chatbot performance with conversation memory, increasing user satisfaction by 20%.
- Built and deployed **FastAPI** backend APIs for AI applications, enhancing scalability.

Shispare

AI Engineer Apprentice

Sep 2022 – Jun 2023

- Engineered a **LLM chatbot** using **Langchain**, **NLP**, **RAG**, **Llama3**, and **vector DB**, reducing query time by 30%.
- Conducted extensive **testing** and **optimization**, achieving a 85% success rate in natural language understanding.
- Led backend development in **FastAPI** with a microservices architecture, increasing efficiency by 25%.
- Achieved 90% success in **NLU** testing, reducing latency by 20%.
- Worked on a **YOLOv8**-based real-time shoplifting detection system with 77% accuracy.

Daraz (Alibaba)

Technology Intern

Jun 2022 – Aug 2022

- Gained proficiency in **Java**, **Spring Boot**, and **RESTful APIs**, and services for web applications.
 - Participated in training sessions and workshops to improve technical knowledge and skills, including training on Java, Maven build tool, Java Swing, SDLC, and the Java Spring framework.
-

Education

National University of Computer and Emerging Sciences (FAST-NUCES)

Bachelor of Science in Computer Science (BSCS)

Relevant Courses: Software Engineering, Deep Learning for Perception, Applied Machine Learning, Data Science, Recommender Systems, Artificial Intelligence.

Skills

- Programming & Frameworks:** Python, FastAPI, Flask, Java, Spring Boot, C/C++, JavaScript, React, Node.js
 - Machine Learning & AI:** PyTorch, Scikit-Learn, TensorFlow, YOLOv8, Generative AI, Large Language Models (LLMs), GNNs, NLP (Hugging Face, Roboflow, LlamaCPP)
 - MLOps & Cloud:** Vector DB, SQL Server, Azure, Google Cloud Vision API, Microservices Architecture, Agile Development
 - Soft Skills:** Cross-Functional Collaboration, Problem Solving, Adaptability, Communication, Innovation.
-

Certifications

- Machine Learning for Everyone (DataCamp)
 - Supervised Learning with scikit-learn (DataCamp)
 - Understanding Cloud Computing (DataCamp)
 - Introduction to Deep Learning with PyTorch (DataCamp)
 - Finetuning Large Language Models (DeepLearning.AI)
 - LangChain for LLM Application Development (DeepLearning.AI)
 - Multi AI Agent Systems with crewAI (DeepLearning.AI)
-

Projects

- Reeve: An app for Alzheimer's care using **React Native** and **Node.js**, boosting caregiver support by 80%.
 - Capstone: Built a project management platform for universities using **React.js**, **python** and **PostgreSQL**, reducing admin workload by 40% and assisting students.
 - Crop Recommendation System: Spearheaded in **C++** to improve agricultural planning and yield by 50%.
-

Leadership and Activities

Founder & President — FAST Entrepreneurship Society (FES)

- Established the FAST Entrepreneurship Society (FES), growing membership to over 80 members and organizing initiatives to boost student engagement in technology and entrepreneurship.
