

Aditya Reddy Gunda

AI & ML Engineer

USA | +1 (620) 719-9296 | adityagundareddy@gmail.com | [LinkedIn](#)

Professional Summary

AI Software Engineer skilled in designing and deploying Deep Learning and NLP models. Expertise in building scalable ML pipelines using TensorFlow, Keras, and scikit-learn. Proficient in integrating AI solutions into AWS/GCP and automating model retraining and evaluation workflows. Strong foundation in data preprocessing, hyperparameter tuning, and leveraging CNN, RNN, LSTM

Professional Experience

TechMentee, Inc., USA

Oct 2025 – Present

Data Engineer Intern

- Enabled Real-Time ML/Analytics by implementing Spark and Kafka for high-velocity data streaming.
- Built scalable Cloud Data Solutions (AWS Redshift, BigQuery) for training/inference datasets, reducing latency by 20%.
- Automated data pipelines using Apache Airflow and Python, reducing manual effort by 30% and ensuring data quality for models.
- Collaborated with analytics teams to design data models supporting BI and predictive modeling initiatives.
- Enforced Data Governance (GDPR, HIPAA), ensuring compliance and integrity of sensitive model inputs.

iBroad Solutions, India

Jan 2024 – Jun 2024

AI Software Engineer

- Designed and deployed high-performance AI models (Deep Learning, NLP) using TensorFlow/Keras, boosting prediction accuracy by 20%.
- Built scalable ML pipelines using TensorFlow, Keras, and scikit-learn, reducing deployment cycle time by 30%.
- Integrated high-performance AI solutions into AWS and GCP environments, optimizing cloud resource usage and cutting costs by 15%.
- Automated data preprocessing, model retraining, and evaluation workflows, maintaining continuous model performance.
- Performed model validation, hyperparameter tuning, and performance monitoring to ensure production-grade deployment.

Intrainz, India

Nov 2023 – Jan 2024

Machine Learning Intern

- Developed predictive models for traffic forecasting and fleet management optimization, leveraging time-series analysis and regression models.
- Enhanced forecasting accuracy by 18% using data feature engineering and statistical modeling.
- Integrated machine learning algorithms with cloud infrastructure to enable real-time decision-making and reduce operational delays.
- Optimized route prediction models, cutting prediction time by 25% and improving operational efficiency.

Projects

Brain Tumor Detection using CNN

Developed a CNN achieving 90% accuracy on 1,100+ MRI scans, enhancing diagnostic efficiency through data augmentation and transfer learning.
Publication: "Use of Support Vector Machine to Detect Brain Tumour," IRJMETs, May 2024.

Credit Card Fraud Detection using ML

Built a fraud detection model with 93% accuracy on 60,000+ records, reducing false positives by 30% using Random Forest and SMOTE.
Publication: "Analysis of Credit Card Fraud Detection Using Machine Learning," IJSREM, Dec 2023.

AI-Based Farmers Portal for Crop Disease Detection

Created a web portal for AI-driven crop disease detection using Gemini Vision Model, achieving 95% accuracy and deployed via Flask on Google Cloud.

Skills

- Data Engineering & Architecture: ETL/ELT pipeline design, data modeling, schema optimization, data warehousing, real-time streaming (Spark, Kafka)
- Cloud & Big Data : AWS (Redshift, S3, Lambda), GCP (BigQuery, Cloud Storage), Azure Data Lake, Hadoop ecosystem, and distributed data processing
- Programming & Automation: Python (Pandas, NumPy, PySpark), SQL , Java, R, and automation scripting for data workflows
- Machine Learning & AI: Model development, TensorFlow, Keras, scikit-learn, and NLP frameworks (spaCy, NLTK); deep learning (CNN, RNN, LSTM)
- Data Visualization & Reporting: Tableau, Power BI, and Matplotlib for building dashboards, performance metrics, and trend analyses
- Data Governance & Security: Data quality management, GDPR/HIPAA compliance, access control, versioning (Git/GitHub), and metadata tracking
- DevOps & CI/CD: Docker, Kubernetes, Jenkins, GitHub Actions, and automated model deployment pipelines

Additional Training: 38+ Coursera certifications including AWS Cloud Foundations, Data Analysis with Python, and Machine Learning in Production.

Education

Bachelor of Science in Computer Science – AI&ML

Aug 2021 – May 2025

Pittsburg State University, USA

GPA : 3.84 / 4.00

Malla Reddy University, India

GPA : 9.1/ 10
