WORK EXPERIENCE

Centene

May 2022 – Present

Data Analyst (Workday)

Denver, CO

- Demonstrated deep proficiency in Workday Report Builder by architecting more than 200 high-impact reports, driving enhanced business insights and ensuring compliance with SOX and industry security protocols.
- Developed and delivered comprehensive training sessions for HR Business Partners and other stakeholders, empowering users with step-by-step guides that increased self-service capabilities by 25% and reduced IT support requests.
- Worked closely with senior leadership to drive Workday Reporting, HCM, and HRIS process optimizations, leading the design and maintenance of robust reporting solutions that ensured accurate, secure data flows for dashboards and downstream reporting systems.
- Championed enterprise-level Workday process improvements, overseeing the design, upkeep, and auditing of internal People Analytics dashboards, which delivered real-time insights across Core HCM, Payroll, Benefits, and Finance while reducing manual labor by over 2,500 hours per year.
- Applied expert SQL skills and advanced methodologies to process extensive datasets and eliminate integration errors in Prism and other systems by optimizing ETL workflows.

Met Life

May 2021 – December 2021

Performance/Data Analyst

Charlotte, NC

- Engineered data-driven financial reporting solutions within Apptio and Workday, enhancing budget iteration accuracy and minimizing data redundancy through process standardization and platform consolidation.
- Identified inefficiencies in financial data linkages and implemented corrective measures, optimizing data integrity and ensuring seamless integration for key business stakeholders.

United States Army - 1st Battalion 75th Ranger Regiment

Oct 2013 – March 2018

Team Leader

Savannah, GA

- Led and Supervised Diverse Teams: Directed and mentored a squad of 5-6 Rangers from various backgrounds, fostering a cohesive unit through effective communication and team-building exercises.
- Developed and implemented tactical operations plans, utilizing advanced analytical skills to assess mission-critical intelligence, resulting in successful completion of high-risk assignments.
