

ANITHA AMUDAM

Python Developer | anithaA5299@gmail.com | 408-306-5299

PROFESSIONAL SUMMARY

- **2+ years** of experience as a **Web/Application Developer** and coding with analytical programming using **Python**.
- Experience in developing web applications implementing **Model View Control architecture** using **Django, Flask**.
- Experienced in Python's modules like **Pandas, NumPy**, regular expressions, collections, dates & times and OS modules.
- Experience in Amazon **AWS concepts** like **Ec2, S3, SQS, SNS, AWS secrets manager cloud Watch**, and **Lambda** services.
- Experience in **Object Oriented Programming** using concepts like **Multi-Threading**, Exception Handling and Collections.
- Hands-on experience with **PySpark** for big data processing, transformation, and distributed data analytics.
- Experienced in UI Design and Development using **React, JavaScript, HTML, CSS** that follows W3C Web standards successfully managing all facets of application development.
- Expertise in establishing database connections for Python by configuring packages like **MySQL-Python**.
- Exceptional Skills in Backend Development with Python using the Django framework with the latest in the technical communities and have a track record of delivering scalable backend solutions and APIs
- Experience in build and deployment of the applications using **Maven**. Used various **maven plugins** and its features in continuous integration
- Experienced in version control systems using **Git/GitHub**.
- Experience in Using CI/CD tools **Jenkins** and Project Management tool **Jira**.
- Experienced in **Agile Methodologies, Scrum stories** and sprints experience in a Python based environment, along with data analytics, data wrangling and Excel data extracts.
- Proficient with various Python Integrated Development, **PyCharm, Visual Studio, Jupiter Notebook and Notepad+**.
- Effectively communicate with business units and stake holders and provide strategic solutions according to the client's requirements.

Technical Skills

Programming Languages	Python, SQL, JavaScript
Python Web	Django, Flask ,Fastapi
Cloud Technologies	AWS
DATABASES	MySQL, SQLite, Oracle, Dynamo db
IDE's	Visual Studio Code, PyCharm
Testing Frameworks	PyTest, Unit test
Bug Tracking Tools	JIRA
Operating System	Windows, Mac

PROFESSIONAL EXPERIENCE

Client: Capital One, Maclean, VA

March 2024-December 2025 Role:

Software developer

Responsibilities:

- Followed Agile development methodologies throughout the application development lifecycle, actively participating in sprint planning, daily stand-ups, and retrospective meetings.
- Designed and implemented RESTful APIs using Python to track system events, enable data analysis, and support scalable application functionality.
- Developed Api integrations for real time data retrieval and business process automation.

- Gained hands-on experience with **AWS services** including **S3, Lambda, DynamoDB, CloudWatch, SQS, SNS, and EC2** for building and maintaining **cloud-native applications**.
- Built and maintained **cloud-based analytics pipelines** using **Snowflake** and developed **end-to-end data processing and analytics workflows** utilizing **Databricks**.
- Used **Pyspark** in databricks environment for large-scale data transformation, cleansing and distributed processing.
- Automated repetitive operational tasks using Python-based tooling and Amazon EC2 CLI, improving system efficiency and deployment processes.
- Created and configured AWS Lambda functions, associated IAM policies, event triggers, and monitoring using CloudWatch to support automation and event-driven workflows.
- Worked on migrating secrets to AWS secrets manager and GitHub migration to cloud.
- **Used Git for version control, collaborating with development teams and maintaining clean, traceable, and well-documented code repositories.**
- Utilized JIRA for bug tracking and issue management, contributing to improved tracking and visibility of development work.

Environment: Python, shell script, New relic, Splunk, 7ps framework JSON, AWS, Boto3, dynamo db, oracle dB, Jenkins, GIT, Jira, Agile, MacOS.

Client: Insite LLC, Washington, D.C.

June 2023 - Feb 2024

Role: Full stack developer

Responsibilities:

- Built **Single Page Applications (SPA), Responsive Web Design (RWD)** UI, Rich Restful Service Applications, using **React**.
- Use the Model View Template (MVT) framework to build modular and maintainable applications.
- Developed views and templates with **Django's MVT (model, view, and template)** to create a user-friendly website.
- Created **RESTful** web services with **Django MVT, MySQL**.
- Interacted AWS resources with **python boto3**.
- Involved in designing application system requirements and coded back end and front-end in **Django/Python**.
- Involved in writing modules, updating scripts and writing Unit Test cases for modules.
- **Performed troubleshooting, fixed and deployed many Python bug fixes of the application.**
- Involved in requirement gathering and analysis phase of the project in documenting the business requirements by conducting meetings with various business users.
- Designed and developed components using Python Implemented code in Python to retrieve and manipulate data.
- Actively worked on production issue support in most of the sprints.
- Worked in Agile model of SDLC.
- Developing scripts for build, deployment, maintain and related task using **Jenkins, Maven and Python**.
- Performed Branching, Tagging, Release Activities on **Version Control Tool GIT**.
- Involved in writing Python utilities and scripts to automate tasks in **AWS** using **boto3** and AWS SDK.
- Actively worked as a part of a team with managers and other staff to meet the goals of the project in the stipulated time.

Environment: Python, Django, React, JavaScript, Pandas, MVT, AWS, S3, Boto 3, JSON, MySQL, Jenkins, Maven, GIT, Agile, Windows.
