SUMMARY

Results-driven Data Analyst with 3 years of experience in Data Analysis, Big Data Analysis, Statistical modeling, ETL pipeline development, and Data visualization. Proficient in Python, R, SQL, database, leveraging NumPy, Pandas, PySpark (MLlib), and Matplotlib/Seaborn for data-driven insights. Skilled in Tableau, Power BI, R Shiny, Snowflake to build interactive dashboards and optimize data warehousing as well as performance optimization, translating complex data into actionable business strategies.

SKILLS

Languages:	Python, R programming, SQL, SAS
Packages:	Pandas, NumPy, SciPy, Scikit-Learn, Keras, Matplotlib, Seaborn
Databases:	MySQL, PostgreSQL, SQL Server, MongoDB
Exploratory Data Analysis:	Data Warehousing, Data Wrangling, Data Modeling, Data Mining, Data Manipulation, Data Visualization
Data Science & Machine Learning:	Gen AI, Supervised/Unsupervised Learning, Deep Learning, ML Algo (Logistic Regression, Decision Trees)
Bigdata Technologies:	Hadoop, MapReduce, HDFS, Hive, Pig
Tools:	Tableau, Power BI, Looker, Jira, Visio, Lucidchart, OpenDental, NexHealth, Hadoop, Apache Spark, Kafka
Others:	ETL, Airflow, Databricks, Risk Analysis, Snowflake, Decision Analysis, Financial Analysis, Documentation, Reporting, Traceability Matrices, MS office (Excel, PowerPoint, Word)
Statistics:	Anova Testing, Bayesian Inference, Hypothesis Testing, A/B Testing
Clouds:	AWS (EC2, S3, R53, IAM, Redshift, Cloudwatch)
Methodologies:	SDLC, Agile, Scrum, Kanban, Waterfall

EXPERIENCE

Business Development Analyst | Sep 2024 – Present Arrogya Dental Management– TX, USA

- Ensured 95% data accuracy with Python (Pandas) and SQL validation, optimizing ETL processes for seamless integration. Designed Tableau and Excel (Pivot Tables, VLOOKUP, Macros) dashboards to track marketing KPIs, sales trends, and patient visits.
- Leveraged Open Dental, and NexHealth to optimize follow-ups, reduce broken appointments, improve campaign performance by creating an algorithm for automated communication and data-driven insights. Leveraged AI automation, ML models (supervised/unsupervised), Tableau and spreadsheet modeling for data visualization, forecasting, and predictive analytics optimization.
- Strengthened and tracked business KPIs for performance, efficiency, and data quality, creating automated dashboards (Tableau) for real-time insights. Managed JIRA for project tracking, backlog prioritization, and reporting, enhancing workflow efficiency.
- Accelerated ETL pipelines with Apache Airflow, Informatica, SSIS, enhancing data integration. Developed marketing strategies at Arogya Dental Management using SEO for organic growth, SEM (Google Ads) for patient acquisition, and A/B testing to optimize campaigns.
- Improved data ingestion processes, reducing data refresh time by 55% and enhancing dashboard responsiveness and also, monitored Hadoop cluster performance for efficient data processing.
- Skilled in analytical thinking, root cause analysis, and troubleshooting to resolve data inconsistencies and drive process improvements as well as Strong in stakeholder management, business intelligence, and data storytelling, effectively translating complex insights into actionable strategies.

Teaching Assistant | Aug 2023 – May 2024 THE UNIVERSITY OF TEXAS AT DALLAS – TX, USA

- Served as a Teaching Assistant for two semesters, mentoring 80+ students in Professional Development, ensuring 95–100% attendance through interactive engagement. Led sessions, resolved queries, and achieved 98–100% participation while grading and providing feedback. Developed AI-driven company lists, analyzed hiring trends, and created Tableau visualizations to enhance career fair content.
- Delivered one-on-one sessions with personalized fast grading/feedback, enhancing student confidence and query response time. Led weekly sessions for 80+ students, simplifying complex concepts and fostering a growth-focused learning environment.

Data Analyst | Jan 2020 – Jul 2022 Hexaware – INDIA

- Built regression and classification models using Python (SciPy, Scikit-Learn) and R to drive strategic insights across datasets exceeding 500M rows. Worked on cloud migration, deploying AWS CloudWatch for monitoring and Amazon S3 for optimized storage.
- Optimized SQL queries in Snowflake for large-scale ETL, increasing data processing speed by 30% and reducing query runtime by 40% for a 15 TB data warehouse and implementing data modelling (Star & Snowflake Schema) for performance enhancement. Developed JIRA queries, custom reports, automated KPI reporting to minimize errors and tuned MapReduce performance.
- Implemented Agile methodologies (Scrum, Kanban), improving team collaboration. Optimized workflows using indexing, partitioning, and parallel processing for efficient data cleansing and standardization. Ensured accurate and timely data movement across data warehouses.
- Automated PySpark workflows with Apache Airflow for scalable ETL processes. Built real-time & batch data pipelines using Apache Spark, Kafka, and Hadoop. Developed predictive models (Logistic Regression, Decision Trees, Random Forest) to improve to improve customer churn prediction accuracy by 18% and increase customer retention by 12% using 2 years of historical data.
- Integrated Snowflake, BigQuery, Hadoop, and SaaS-based analytics for scalable cloud data processing, optimizing BigQuery SQL for large-scale analytics and enhancing decision-making with interactive visualizations in Power BI (DAX, Power Query)
- Automated data extraction/integration, reducing manual effort by 30% and improving pipeline efficiency. Applied data wrangling for statistical modeling/visualization. Delivered insights to stakeholders via PowerPoint and data visualization tools, driving informed decisions.
- Designed and maintained dashboards in Looker and Power BI, enabling real-time visualization of key business metrics and improving stakeholder decision-making; Automated data validation processes, enhancing data accuracy by 95% and reducing manual errors by 40%.
- Adept at statistical programming, customer segmentation, and advanced analytics to optimize workflows and enhance decision-making. Collaborated cross-functionally, leveraging teamwork, adaptability, and evolving technologies to align with business requirements and industry trends, driving innovation and data-driven strategies.

EDUCATION

Master of Science: Information Technology and Management; *The University of Texas, Dallas, TX*
Bachelor of Science: Computer Engineering; *Gujarat Technological University, India*

| **May 2024**
| **May 2021**

PROJECTS

- Customer Churn Rate Analysis**

| **Aug 2022 – Dec 2022**

Performed EDA on Zillow Dataset using Python (Pandas, NumPy, Matplotlib, Seaborn) to analyze property price factors. Built and optimized regression models (Linear Regression, Decision Trees, XGBoost) with Scikit-learn, achieving 0.88 R². Extracted insights on location, bedrooms, market trends, improving investment strategies and ROI by 12% through data-driven decisions.
 - Subscription Based Pricing Model**

| **Jan 2024-May 2024**

Designed a subscription-based pricing model using spreadsheets, enhancing pricing transparency and reducing CAC by 20%. Created subscription tiers based on client needs, increasing client satisfaction by 25%. Managed project timelines in Jira, ensuring milestone delivery within 15 weeks.
 - Predictive Analytics for Healthcare using Big Data**

| **Aug 2023-Dec 2023**

Developed a Predictive Healthcare Model using Hadoop, Apache Spark, and ML techniques (logistic regression, decision trees) to predict patient outcomes. Built a scalable data pipeline with HDFS, Spark, and Tableau/Python for efficient data processing and visualization.
