

SURESH ELLENDULA

Email: sureshe@myyahoo.com

Phone: 314-356-2220

Education:

Bachelors in Computer Science from Webster University 2024

SUMMARY:

- 5 years of IT experience with extensive focus on Salesforce application development and administration for large-scale enterprises, overseeing 3000+ users.
- Proficient in designing, developing, and maintaining Salesforce systems for CRM, SaaS operations, IT, and customer support automation.
- Skilled in Change Management and Application Lifecycle Management using Sandbox Environments.
- Proficiency in both classic and Lightning UI, adept at building Visualforce and Lightning components to meet custom UI requirements.
- Expertise in data migration into Salesforce CRM using Data Loader/workbench and ANT Migration tool.
- Experienced in using tools like Jenkins, Bit Bucket, and JIRA for change management processes.
- Strong knowledge in Apex Programming Language, Visual Force Pages, Lightning Components, Process Builder, Visual workflows, and Workflows & Approvals for developing and implementing Salesforce solutions.

TECHNICAL SKILLS:

Certifications: Salesforce Administrator, Platform Developer 1

Lightning Experience Development: Salesforce Lightning Design System and Lightning Components, Aura Framework, JavaScript Controllers, Server-side Controllers, LWC

Salesforce.com Technologies: Apex Language, Apex Classes, Apex Triggers, SOQL, SOSL, Visual Force (Pages, Components & Controllers), Apex Web Services, Apex Data Loader, Custom Objects, Flows, Case Management Automation, Workflow & Approvals, Dashboards, Reports, AppExchange Products.

Programming Languages: Java, JavaScript, HTML, XML, SQL, Apex.

PROFESSIONAL EXPERIENCE:

Salesforce Developer (Intern)

10/2023-12/2023

Client: Datics Inc

Responsibilities:

- Developed custom modules and implemented business logic using Apex Classes, Triggers, Visualforce pages, Batch Apex, and Email Services, leveraging SOQL and SOSL queries.
- Implemented Approval processes with Email Alerts, Field Updates, related tasks, and Time-based Triggered tasks to enforce business logic.
- Developed Salesforce Lightning applications using Lightning web Components, Controllers, Events, and custom CSS, enhancing user experience.
- Created and customized reports, dashboards, and processes for continuous monitoring of data quality and integrity.
- Leveraged Salesforce Lightning Environment for creating responsive UI pages through Ajax and JSON calls.

- Extended Salesforce capabilities to Customer and Partner Communities, providing access to features like Chatter, Cases, and Solutions.
- Implemented SOAP and OAuth integrations, designed ETL processes for data migration, and maintained data quality through cross-object formulas and validation rules.
- Agile methodologies drive iterative development and collaboration, while CMS usage facilitates flexible content management, fostering a collaborative environment with effective communication and teamwork for streamlined project delivery.

Environment: Salesforce.com, Apex, VisualForce, Lightning Web Components, Eclipse IDE Plug-In, Data Loader, Dataloader.io, Dream Factory (Snapshot), Bitbucket, SourceTree, Force.com Explorer, Link Point360, Jitterbit, backupify, Enabler4Excel, CPQ.

Salesforce Developer/Admin
Client: FIDEL Technologies Pvt Ltd

02/2020-12/2022

Responsibilities:

- Developed Apex Triggers, Classes, and Visualforce pages with customizations for business needs, utilizing SOQL and SOSL for data manipulation.
- Implemented client-side validations and dynamic rendering using JavaScript and Ajax toolkit in Salesforce Visualforce pages.
- Utilized Force.com IDE for developing various Salesforce components including Apex classes, triggers, visual force pages, objects, and validation rules.
- Leveraged Lightning component framework to build reusable UI components and pages.
- Integrated and optimized Salesforce solutions with Conga CPQ and CLM, reducing quote generation time and streamlining contract workflows.
- Managed object relationships, data extraction, and transformation using Informatica on Demand integration.
- Created and customized reports, dashboards, and workflows in Salesforce to assist in better utilization of the platform.
- Administered user accounts, roles, profiles, and permissions, and provided ongoing application support for end users.
- Automated testing with Jest for JavaScript and Python frameworks like PyTest integrated into CI/CD pipelines ensure continuous validation and high software quality, leveraging cloud platforms for scalable testing environments.

Environment: Salesforce.com platform, Sales cloud, Service cloud, Lightning Web Components Apex classes, Triggers, Visualforce pages, Controllers, Data loader, Demand tool, Workflows, Approvals, Custom Objects, Tabs, Page Layouts, CSS, HTML, Java Script, Reports, Dashboards, Eclipse IDE Plug-in, Windows

Salesforce Developer
Client: C L Infotech Private Ltd

08/2018 - 08/2019

Responsibilities:

- Created Custom Objects, Custom Tabs, Entity-Relationship Data Model, validation Rules, Workflows and Approval Processes, Auto-Response Rules, and Page layouts.
- Designed, developed, and deployed Visual Force Page, Apex Classes, ControllerClasses and Apex Triggers based on the business requirements.
- Implemented Security and Sharing rules at object, field, and record levels for different users at

different levels of organization. Also created profiles and configured the permissions based on the organizational hierarchy using permission Sets.

- Orchestrated SFDC Administrative tasks like creating Profiles, Roles, Users, Page Layouts, Email Services, Approvals, Workflow, Reports, Dashboards, Tasks and actions.
- Defined Lookup and master-detail relationships on the objects and created junction objects to establish connectivity among objects.
- Involved in creating and customizing the Email template and configuring them to the Email alert within the workflow rule for a standard/custom object.
- Integrated the Web Services for extracting the data from external systems, and used the Sandbox for testing to ensure minimum code coverage for the application to be migrated to production.
- Orchestrated with junior team members to Design and Review code quality to ensure compliance with standards.
- Organized Daily Scrum meetings with all the team members to check whether we were on the same page.
- Python for backend development, Git for version control, and CI/CD pipelines via Jenkins or Azure DevOps ensure efficient development, collaboration, and automated deployment.

Environment: Salesforce.com platform, Visualforce, Apex Language, Data Loader, Sandbox Testing, HTML, JavaScript, Eclipse IDE.
