

APOORVA KEESARI

+1(989)4082697 | apoorva.keesari18@gmail.com

EDUCATION:

Central Michigan University, Master of Science in Computer Science (GPA: 4)

Aug 2022 - May 2024

Guru Nanak Institutions Technical Campus, Bachelor of Technology in Computer Science (GPA: 3.8)

July 2017 - July 2021

SKILLS:

Languages & Libraries: Java (3+ years), Python, JavaScript, TypeScript, PL/SQL.

Web Development: Angular, HTML, CSS, JSON

Databases: Relational - MySQL, PostgreSQL

Methodologies & Deployment: Agile, CI/CD, Git, Docker, Kubernetes, Bitbucket, Jira, SonarQube, Jenkins.

Frameworks: Spring Boot, NestJS, Play, ExpressJS.

Visualization Tools: Tableau, Grafana, Kibana.

Cloud Technologies: AWS, GCP.

OS: Windows, MacOS, Linux.

XML Technologies : XML, XML schema, WSDL, SAX and DOM.

Collaboration: Outlook, Microsoft Teams

Soft Skills: Leadership, Teamwork, Communication, Enthusiasm, Professionalism

RELEVANT EXPERIENCE:

Delta Dental – Full Stack Developer

Michigan, USA

June 2023 – Present

- Contributed to the architecture and development of **backend services** for Claims and Provider Credentialing systems at Delta Dental, leveraging **microservices** and SOLID principles within the **SAFe**.
- Developed and tested RESTful APIs using Spring Boot for seamless integration with external systems, ensuring efficient communication and data exchange. Designed APIs to deliver database-driven responses via JDBC, and deployed and tested them using Apache Tomcat and Postman.
- Took ownership of **debugging** and resolving issues in live services, leveraging **Kibana** for log analysis, along with metrics and tracing platforms to monitor system health and performance.
- Built frontend-to-backend integrations to display provider search results, applying full stack knowledge in dynamic content rendering and **responsive UI** generation.
- Developed and maintained end-to-end **Selenium** test suites to automate functional testing of the provider credentialing web application across multiple user workflows.
- Developed **JUnit** test cases to validate backend logic and ensured **code quality**, complemented by **regression testing** using **Postman collections** to verify API stability across releases.
- Utilized **Jenkins DevOps** tool for **continuous integration/continuous delivery** and deployment (CI/CD) via which Java and **Angular** code was deployed to **Test**, **UAT**, and **Prod** environments. Utilized **Git** commands to clone, pull, commit, push, and merge code on **Bitbucket** for Version Control.
- Built **PL/SQL** procedures and functions with complex **SQL** logic to process nested JSON and array data structures, supporting seamless backend data operations.
- Applied **SCRUM methodologies**, actively practiced **Pair Programming**, and implemented Test-Driven development to craft high-quality code.
- Played an active role in peer code reviews, utilizing **SonarLint**, **SonarQube** and other analysis tools to optimize code quality by **90%**.
- Collaborated with Application Architects and Business Analysts to review, confirm, and validate functional and technical design specifications.

Cognizant Technology Solutions - Software Engineer

Hyderabad, INDIA

Aug 2021– Aug 2022

- Built an entire **ETL** pipeline using **Python**, **Databricks**, **Dremio** & **Tableau** to fetch product-related data from the **Jira API**.
- Employed Adobe Analytics and Advanced Excel for comprehensive data modeling, leading to a **25%** reduction in data processing time for a critical ETL pipeline.
- Enhanced the organization's notification system by seamlessly integrating **Twilio's** SMS functionality within **NestJS**, catalyzing a **40%** improvement in alerting speed. Established as a pivotal business feature, ensuring swift, reliable communication for crucial operational alerts.
- Refined the organization's notification system using NestJS framework by adding an SMS notification functionality using Twilio API. Debugged the code base to remove dead code, improving the system's speed, and implemented good coding practices such as optimizing database queries and improving code efficiency.

- Integrated data from **DevOps tools** into **Grafana** Dashboards, showcasing real-time performance **KPIs** such as a **20%** reduction in PR open duration, **15%** decrease in deployment failure rate. This enhanced development efficiency across **CI/CD** pipelines, teams, and business units.
- Collaborated with **cross-functional** teams to configure and develop components, ensuring alignment with project goals. Provided mentorship to 5+ junior developers, delivering comprehensive training on coding standards, development pipelines, and Agile methodologies.

ACADEMIC PROJECTS:

- **EDA on best-selling books:** Imported libraries such as pandas, Matplotlib, numpy, seaborn. Preprocessed data by dropping duplicates and removing errors and outliers. Performed data analysis and data visualization through statistical representation of data and by displaying patterns in the reviews, price of the books and ratings over the years through line graph, bar graph and pie chart.
- **Reactive Server-Push web-app:** Utilized freelancer.com's REST API to build a Java WebApp with MVC architecture for efficient job information retrieval. Integrated Web Sockets and Akka framework for real-time data streaming and dynamic UI updates.
- **Plagiarism Detection tool:** Developed a plagiarism detection tool using LCS and edit distance algorithms to analyze two plaintext files and detect plagiarism. Optimized the tool to analyze files up to 500 KB in size in under 5 seconds using the modified version of LCS. This project involved algorithm implementation, problem-solving, and software optimization.
