

Asha Deepthi K

Chicago, Illinois — (618)720-0124 — ashadeepthi.work@gmail.com — linkedin

PROFESSIONAL SUMMARY

Results-driven Business Analyst with 5+ years of progressive experience translating complex business requirements into strategic analytical solutions. Proven expertise in stakeholder management, requirements analysis, process optimization, and data-driven decision support across fintech, healthcare, and enterprise environments. Strong track record of improving operational efficiency, reducing manual processes by up to 70%, and delivering measurable business value. Skilled at bridging business and technical teams to ensure alignment and successful solution implementation.

CORE COMPETENCIES

Requirements Gathering & Analysis, Stakeholder Management, Business Process Modeling, Gap Analysis, BRD & FRD Documentation, User Stories & Acceptance Criteria, UAT Coordination, Agile Scrum Methodology, Process Improvement, Change Management, Risk Assessment, Data Analysis & Reporting, Workflow Automation, Cross-Functional Collaboration

TECHNICAL SKILLS

- **Programming Languages:** SQL, Python, R, Java
- **Cloud Platforms:** Microsoft Azure (Data Lake, Data Factory), Google Cloud Platform, Amazon Web Services
- **BI & Analytics Tools:** Power BI, Tableau, Looker, Microsoft Excel (Advanced)
- **Data & Analytics:** ETL & Data Pipelines, Data Warehousing, Data Modeling, Business Intelligence, Dashboard Design, Data Quality Management
- **Business Analysis:** Requirements Gathering & Analysis, Business Process Improvement, Stakeholder Management, Solution Design & Architecture, Use Case Development, Gap Analysis, Functional Specifications, Vendor Evaluation, UAT Coordination, Business Process Mapping, Requirement Traceability Matrix (RTM), Change Management, Workflow Analysis, Root Cause Analysis
- **Methodologies:** Agile, Scrum, Waterfall, DevOps, Six Sigma, SDLC, Testing & Quality Assurance
- **Additional Tools:** Salesforce, SAP, Oracle, JIRA, Confluence, Visio, Lucidchart, API Integration, Peoplesoft

PROFESSIONAL EXPERIENCE

Business Intelligence Analyst - John Deere

Chicago, Illinois, USA

Jun 2025 to Present

- Gathered and documented comprehensive business requirements from stakeholders across multiple business units; translated requirements into technical specifications and solution designs to guide analytics development.
- Led end-to-end analytics projects involving data architecture design, solution implementation, and deployment, acting as primary liaison between business stakeholders and technical teams to ensure alignment and successful delivery.
- Created Business Requirement Documents (BRDs), Functional Requirement Documents (FRDs), and process flow diagrams to support enterprise analytics and reporting initiatives.
- Facilitated stakeholder workshops and requirement elicitation sessions to define business objectives, scope, and success criteria for analytics projects.
- Collaborated with Product Owners, developers, and QA teams to define user stories, acceptance criteria, and sprint deliverables in Agile environments.
- Conducted business requirements analysis and gap assessment for migration of legacy reporting systems to modern cloud-based analytics platforms, improving performance and reducing operational overhead.
- Designed and implemented automated data quality monitoring and alerting mechanisms; partnered with data teams to ensure 99.5% data accuracy and timely detection of data anomalies.

- Coordinated User Acceptance Testing (UAT) activities, documented test results, tracked defects, and obtained stakeholder sign-off before production deployment.
- Conducted root cause analysis for reporting and data quality issues, partnering with technical teams to implement corrective actions and process improvements.
- Established analytics governance framework and user access controls for 2,000+ enterprise users; conducted training and provided ongoing support to ensure adoption and effective utilization.
- Conducted capacity planning and performance optimization analysis; provided recommendations to leadership on resource allocation and workload management, resulting in improved system efficiency.
- Implemented continuous improvement processes including CI/CD pipelines and deployment automation, reducing time-to-deploy by 60% and improving solution reliability.

Business Analyst - Southern Illinois University

Carbondale, Illinois, USA

Nov 2023 to May 2025

- Analyzed business processes across university operations; identified inefficiencies and recommended process improvements resulting in 70% reduction in manual operations and improved process reliability.
- Performed current-state and future-state process analysis, identifying operational gaps and recommending scalable business solutions.
- Created detailed process maps, workflow diagrams, and functional specifications to support automation and reporting enhancement projects.
- Conducted requirements gathering with key stakeholders and cross-functional teams; developed detailed functional requirements documents and created solution designs for analytics projects.
- Drove optimization of analytics and reporting systems; redesigned reporting infrastructure that reduced latency by 40%, enabling faster and more informed decision-making by business stakeholders.
- Partnered with data quality and operations teams to establish data governance standards and validation procedures; performed comprehensive data quality assessments on datasets containing 8M+ records.
- Developed 16 dashboards and analytical reports based on documented business requirements; gathered feedback from end-users and iterated to ensure solutions met business needs.
- Conducted stakeholder review sessions to validate requirements, gather feedback, and ensure alignment between business expectations and delivered solutions.
- Managed requirement traceability throughout the project lifecycle to ensure all business needs were addressed.
- Automated critical business processes including safety and risk incident reporting; designed automation solution that reduced manager workload by 100+ hours weekly and improved data completeness.
- Conducted business process analysis and created technical specifications for custom applications and workflow automation; coordinated testing and user acceptance processes prior to production deployment.

Business Analyst - Infosys

Hyderabad, India

Jun 2020 to Jul 2023

- Managed end-to-end analytics project lifecycle for 50+ enterprise reporting initiatives across multiple business verticals; conducted requirements analysis, created specifications, and oversaw solution delivery and implementation.
- Authored BRDs, FRDs, use cases, workflow documentation, and business process models for enterprise reporting and analytics initiatives.
- Facilitated cross-functional meetings with business users, technical teams, and project managers to gather requirements and resolve project risks.
- Performed gap analysis between existing business processes and proposed solutions, providing recommendations that improved operational efficiency.
- Conducted stakeholder interviews and workshops to gather business requirements; documented findings in detailed business requirements documents and created wireframes and mockups for solution validation.
- Performed comprehensive testing and quality assurance activities including test planning, user accep-

tance testing, and regression testing; coordinated with QA teams to ensure analytics solutions met specifications and business expectations.

- Analyzed and resolved performance issues with existing analytics systems; identified root causes and collaborated with technical teams to implement optimization strategies.
- Assessed feasibility of integrating analytics solutions with external systems and data sources; evaluated vendors and tools, documented comparison matrices, and provided recommendations to leadership.
- Established analytics standards and best practices framework; created templates, guidelines, and training materials; conducted knowledge transfer sessions to improve team consistency and quality.
- Implemented proactive monitoring and operational dashboards; designed alert mechanisms that enabled early detection of business and data issues, improving overall system reliability and business continuity.

EDUCATION

Master of Science, Computer Science — Southern Illinois University Carbondale, USA (May 2025)

Bachelor of Science, Computer Science and Information Technology — Chalapathi Institute of Engineering and Technology, India (May 2023)

CERTIFICATIONS

- Certified Business Analyst (CBA) — International Institute of Business Analysis (IIBA)
- Microsoft Certified: Power BI Data Analyst Associate (PL-300)
- Agile Certified Practitioner (ACP) — Project Management Institute (PMI)
- Microsoft Certified: Data Analyst Associate (DP-900)
