Software Developer

- Full-Stack Developer with 2.5 + years of experience in building secure, scalable, and high-performance web applications. Skilled in end-to-end product development, including planning, architecture, development, deployment, and performance optimization, with a strong focus on clean code and maintainable architecture.
- Experienced in implementing secure authentication systems, debugging complex issues, and collaborating with cross-functional teams. Also proficient in AI evaluation, reasoning analysis, and data annotation to support intelligent system development and refinement.

Academic Details

Bachelor of Technology in Information and Communication Technology.

Dhirubhai Ambani Institute of Information and Communication Technology

Gandhinagar, India jul 2019 - may 2023

Technical Skills

Languages: JavaScript, TypeScript, Python, C++, PHP

Full-Stack development :

Javascript, React, Next.js, Node.js, Express.js, HTML, CSS, Tailwind, jQuery
Databases: MongoDB, MySQL, PostgreSQL

Tools & Platforms: Git, Docker, AWS, REST API, JWT, Web3, WordPress

Authentication & Security: SAML, OAuth, SCIM, Blockchain, Smart Contracts

AI & Evaluation Skills: LLM Evaluation, Prompt Analysis, Reasoning Annotation, Data Labeling.

Core Competencies

Software Development & Product Ownership

AI Evaluation & Data Annotation

Performance Tuning & Debugging Expertise

Agile Methodologies & Team Collaboration

Problem Solving & Critical Thinking

Authentication Protocols & Cybersecurity

Customer Support & Bug Resolution

Competitive Coding

Leetcode 350+
@leetcode/ashishkr_05 problem solved
Codechef Rating 2050 (5 star) 500+
@codechef/ashishkr_05 problem solved
Interview Bit Rating 55000 + 275+
@interview-bit/ashishkr_05 problem solved
GFG 200+
@greeks-for-greek/ashishkr_05 problem solved

Work Experience

RI5E Software engineer

Jul 2024 - present
Berlin, Germany

Built and enhanced a mentorship matchmaking platform, helping early-stage startups connect with mentors based on expertise and growth needs.

- Developed full-featured dashboards for startups and mentors, with Google Calendar integration and session tracking tools.
- Added intelligent features like mentor suggestions, session ratings, and progress visualization to improve collaboration.
- Contributed to backend architecture using NestJS and RESTful APIs with secure authentication.
- Worked on deployment and scaling using Docker and AWS for production-ready releases.

Outlier.AI AI Evaluation Contributor

sep 2024 - present
Remote

Contributed to 30+ projects on the Outlier platform as an evaluator, prompt tester, and senior reviewer across multiple AI evaluation tracks.

- Reviewed and analyzed complex AI and coding outputs to detect logical flaws, edge cases, and reasoning gaps.
- Assessed code quality, prompt alignment, and problem-solving accuracy in LLM-generated responses.
- Promoted to senior reviewer role for multiple high-impact tracks based on performance and consistency.

MiniOrange Software Development Engineer

Jul 2022 - May 2024
Pune, India

Developed, optimized, and maintained high-impact WordPress authentication plugins and add-ons, contributing to 20+ product releases.

- SAML Single Sign-On for WordPress (link)** : Implemented SAML SSO login integrations with providers like Azure AD, Okta, Keycloak, and Google Apps.
- Page Restriction Plugin (link)** : Designed advanced restriction features including Category, Tag, and Menu-based access controls.
- SCIM Protocol Integration (link)**: Led the development of SCIM provisioning for automated user management across multiple platforms.
- Moodle SSO Plugin (link)** : Built and deployed the Moodle SSO plugin from scratch, integrating with existing IDP workflows.
- Release Participation**: Collaborated in agile cycles, delivering secure, performance-optimized plugin releases. **WordPress add-ons (link)**.

Independent Contributions

DNS Manager (github): Built a centralized dashboard for managing domain records in bulk via AWS Route 53. Added CRUD operations, pagination, and JSON upload support for DNS types.

- Tech Stack**: Node.js, React.js, Express.js, AWS Route 53.

Crypto Wallet (github): Created a decentralized Ethereum wallet using smart contracts. Enabled secure ETH transactions with transparent tracking via blockchain.

- Tech Stack**: Web3., React.js, JavaScript, Python, C++, Solidity.

Card Tracker (github): Designed a courier tracking app with CSV parsing and real-time status API based on phone number or card ID.

- Tech Stack**: Node.js, Express.js, React.js, MongoDB. Rest API

Achievements

- Successfully completed 30+ AI evaluation projects on Outlier.AI** and promoted to Senior Reviewer across multiple tracks. (2024–Present)
- Contributed to the development, planning, debugging, and optimization of **30+ product releases** across full-stack applications. (2023–Present)
- Secured **99.008 percentile (AIR 11,358)** in IIT-JEE Main among 1.2M+ participants (2019)
- Achieved 5★ rating on CodeChef** with 500+ problems solved (2021)
- Ranked in the top 234 out** of 20,000+ participants in the CodeChef College Hackathon (2021)
