Business Analyst

(945) 400 – 8398 | avyakthabhukya058@gmail.com | Plano, Texas- 75080

SUMMARY

Experienced Business Analyst with over 3 years of expertise in leveraging data-driven insights to drive business decisions. Proven track record in streamlining processes, resulting in a 15% increase in operational efficiency. Skilled in requirements gathering, data analysis, and stakeholder communication, with proficiency in SQL, Excel, and business intelligence tools. Adept at translating complex data into actionable strategies, fostering cross-functional collaboration, and delivering impactful business solutions.

EXPERIENCE

Business Analyst, United Healthcare Group, USA

Feb 2024 – Present

- Utilized Power BI and Tableau to create dynamic dashboards, enabling real-time monitoring of key performance indicators (KPIs) and enhancing data visibility for executive decision-makers.
- Conducted SQL-based data analysis to support decision-making processes, improving patient care operations by streamlining data management systems.
- Developed detailed FRD and BRD documentation for healthcare systems projects, ensuring compliance with industry standards and reducing errors by 10%.
- Executed cost/benefit, GAP, and risk analyses, providing actionable insights that led to a 12% reduction in project costs.
- Coordinated cross-functional teams using MS Project and Primavera P, successfully managing project timelines and resources, resulting in a 95% on-time project delivery rate.
- Led JAD sessions and utilized Microsoft Visio for process mapping, achieving a 30% improvement in workflow efficiency.
- Managed ERP systems including MS Dynamics Nav and JD Edwards, optimizing financial reporting and inventory management, which reduced operational costs by 8%.
- Performed UAT and collaborated with QA teams using HP Quality Center, ensuring the successful implementation of software upgrades with minimal disruptions.
- Leveraged Google Analytics and SAS for advanced data analysis, providing insights that drove a 10% increase in patient engagement and service utilization.

Business Analyst, Metlife, USA

Oct 2023 – Dec 2023

- Administered MS SharePoint and ClearQuest for efficient document management and issue tracking, enhancing team collaboration and reducing resolution times by 15%.
- Utilized SQL for data extraction and analysis, supporting the underwriting team with actionable insights that improved risk assessment accuracy by 10%.
- Devised strategic plans using MS Excel and Solver for financial forecasting, optimizing resource allocation and achieving a 5% increase in profitability.
- Constructed interactive dashboards using Power BI and Excel, providing real-time data visualization for claims management and reducing report generation time.
- Oversaw ERP planning with QuickBooks and NetSuite, enhancing financial reporting accuracy and reducing reconciliation time.
- Orchestrated comprehensive SWOT and risk analyses, enabling the identification and mitigation of potential project risks, leading to a 25% decrease in claim processing errors.
- Formulated detailed SRS and BRD documentation, ensuring accurate translation of business requirements into technical specifications, resulting in a 98% compliance rate.

Business Analyst, Trigyn Technologies, India

Jul 2019 – Apr 2022

- Engineered comprehensive BRD and FRD documentation, aligning software development projects with client requirements, resulting in a 20% increase in customer satisfaction.
- Facilitated cost/benefit and GAP analyses, enabling strategic decision-making that reduced project costs and improved ROI.
- Implemented Agile methodologies and managed sprints using Jira, which increased development velocity by 25% and improved project tracking accuracy.
- Developed SQL queries and data models to analyze user behavior, providing insights that enhanced product features and boosted user retention.
- Monitored software development processes through HP Quality Center, ensuring compliance with industry standards and reducing defect rates by 12%.
- Coordinated UAT activities, gathering user feedback and ensuring the successful deployment of new software features with minimal issues.
- Optimized ERP systems, including JD Edwards and NetSuite, improving operational efficiency and reducing manual data entry.
- Analyzed market trends and competitor data using Google Analytics and SAS, contributing to strategic product positioning and a 10% increase in market share.
