

EDUCATION

The University of Georgia

Bachelor of Science, Computer Systems Engineering

Athens, GA
December 2024

TECHNICAL HIGHLIGHTS

Technical Languages: Java, C++, C#, C, SQL, Python

Technical Skills: Data Analysis, Logic Design, Power BI, Data Analytics, UI Design, Product Configuration

WORK EXPERIENCE

Bright Technologies

Data Analytics Fellow

Atlanta, GA

January 2025 – Present

- Executed large scale ETL pipelines using SQL and Apache Spark, processing datasets with over 7 million records to identify trends that improved forecasting accuracy by 25%
- Built interactive dashboards with Power BI and Tableau, enabling real-time tracking of KPIs and improving stakeholder visibility into performance metrics
- Leveraged Azure Data Studio and Azure SQL for cloud-based data storage and querying, enhancing the scalability and performance of data processing workflows in analytics projects

Fiverr

Lead Web Developer

U.S.(Remote)

December 2023– Present

- Developed and deployed 12+ full-stack web applications using React, Java, JavaScript, and SQL, improving client business workflows and reducing manual tasks by up to 60%
- Managed cross-functional teams of 3–5 international freelancers, assigning tasks, setting timelines, and ensuring quality delivery through GitHub collaboration and Agile practices
- Ensured quality code reviews, clean Git workflows, and team wide knowledge sharing across deliverables

Trane Technologies

Software Engineer Intern

La Crosse, WI

May 2022 – August 2023

- Developed efficient algorithms and data manipulation techniques in C# to enhance the HVAC AMCA fan data processing system, optimizing downtime using OOP, LINQ, and Excel automation by 35%
- Integrated RESTful APIs to enable real-time data updates and seamless front-end/backend communication
- Collaborated cross-functionally with product managers, designers, and senior engineers in Agile sprints to ship production-ready features under tight deadlines

RCCG Mt Zion

IT Support Technician

Atlanta, GA

January 2019 – May 2023

- Troubleshoot and resolved hardware issues such as printers, routers, and desktop systems, reducing downtime and improving overall service reliability by 40%
- Configured and maintained software and security tools to automate backups, streamline scheduling, and enhance communication

PROJECT EXPERIENCE

Robins Air Force

Full Stack Developer

Athens, GA

August 2023 – May 2024

- Designed and implemented a responsive UI recall roster web tool using React.js and JavaScript libraries
- Engineered secure user authentication and real-time data updates by integrating MySQL databases with C# backend services and API frameworks, ensuring protected access and updated user data

LEADERSHIP AND INVOLVEMENT EXPERIENCE

National Society of Black Engineers

Board Member

August 2020 – December 2024

- Organized and facilitated monthly meetings, which led to improved engineering skills and increased professional development among NSBE members
- Led team-building activities that enhanced member collaboration and engagement
