

Balamurali Vanam

Business Intelligence Analyst

P: (475) 351-8359 | E: balamuralivanam55@gmail.com

PROFESSIONAL SUMMARY

Business Intelligence Analyst around 5 years of experience as an IT professional with extensive experience developing Qlik, Tableau & BI applications in the area of business and finance. Expertise in translating business needs into end user Interactive reports and help making business decisions based on analysis. As a certified Qlik Sense Business Analyst, Quipped with strong problem solving and communication skills.

- Established Qlik Sense platform and supported Qlik Sense and Power BI architecture in a fast-paced and dynamic Business Intelligence solutions group.
- Worked on design and development of data integration solutions, utilizing SQL, Power BI, and Informatica tools. Collaborated with stakeholders to identify and implement improvements, resulting in enhanced data synchronization between systems.
- Installing, configuring, clustering, load balancing, and multi-node installation of Qlik Sense Environment.
- Over 4 years as an IT professional and 3 years of Business Intelligence with extensive experience developing Qlik applications and providing Power BI solutions.
- Over 4 years of Power BI, Qlik Administration and Development Experience, with proficiency in Data engineering, Python, SQL, and ELT processes.
- Analyzed with external providers to gather requirements and develop efficient data flows.
- Managed data pipelines, extracting information from diverse source systems and ensuring effective storage in the data warehouse.
- Worked on Qlik Sense versions from 3.1, 3.2, November 2018 to till date including Qlik SaaS.
- Expertise in Qlik Sense and Qlik SaaS development, administration, data modeling, and architecture.
- Expert in optimizing existing Qlik and Power BI reports to improve business productivity.
- Expert in Qlik Data Modeling with experience in dimensional modeling using star schema, snowflake schema and Algorithms.
- Experience with Nprinting 17 and built the Nprinting reports and templates.
- Generated pixel-perfect PDF/Word reports through NPrinting.
- Proficient in Python for advanced analytics and custom solutions development.
- Expertise in creating Qlik Apps and Advanced Set Analysis.
- Expert in Qlik Sense Security Implementation, including row-level, field-level, and sheet-level security.
- Expertise in the QMC (Qlik Management Console) and Power BI administration.
- Strong experience in performance optimization for both Power BI and Qlik Sense.
- Expertise in implementing the Qlik and Power BI dashboard security model using Section Access.
- Strong Knowledge of Statistics, Databases, and Data warehouse. Worked in Agile methodology.
- Expert in handling production issues like report failures, missing counts in reports, resolving

synthetic keys, and loops.

Technical Skills

BI Tools:	Qlik Sense November 2018, 3.2x,3.1.3, Qlik SaaS, Tableau, Power BI
Databases:	Oracle 11g/10g, SQL Server 2005/2008, Teradata, MS Access, PostgreSQL, IBM DB2, MS Access 2000, MySQL 5.3, Neo4j Postgres DB 9.3 and SAP BW.
Languages:	SQL, PL/SQL, Python, DHTML, JSP, PowerShell.
Operating Systems:	Windows 2005/2008/XP, 2012 RS.
Web Applications:	IIS 6/7, Web Logic 8.

Professional Experience

Destin IT Solutions

Mar 2024 – Present

Business Intelligence Analyst,. Texas(USA)

Responsibilities

- Spearheaded end-to-end project implementation and orchestrated the architecture of high-capacity applications in Qlik Sense and Power BI.
- Led the strategic analysis, architectural planning, design, and development phases for large-scale data integration and business intelligence solutions on Qlik's SaaS platform.
- Designed and developed interactive Tableau dashboards to visualize key performance indicators (KPIs) and business metrics, providing stakeholders with actionable insights for decision-making.
- Engineered the Self-service Model, crafting dashboards through data extraction from databases and UI design, aligning with stringent business/user specifications using Qlik Sense.
- Skilled in crafting finely-tuned SQL queries and stored procedures, harnessing the advanced capabilities of Oracle PL/SQL tailored for Clarity, as well as adeptly utilizing T-SQL for Caboodle and internal SQL databases to maximize efficiency and performance.
- Collaborated with a cross-functional team of developers and business analysts to execute strategic data and analytics initiatives in both Qlik Sense and Power BI environments.
- Developed highly tailored Qlik Sense and Power BI dashboard applications, integrating advanced functionality using SQL and Python.
- Demonstrated adeptness in data modeling, analysis, design, testing, development, and seamless implementation across both Qlik Sense and Power BI platforms.
- Implemented robust Qlik Sense Security measures, seamlessly integrating version control tools such as SVN.
- Applied hands-on expertise in Qlik SaaS (Qlik Cloud) development and administration, ensuring optimal functionality.
- Installed and configured QMC utilities for streamlined management of Qlik Sense and Power BI.
- Fine-tuned and optimized the performance of QlikView and Qlik Sense applications, along with Power BI reports, aligning with enterprise performance standards.
- Provided vigilant production support to ensure the optimal functionality of existing Qlik Sense and Power BI applications.

- Engineered DOMO cards and provided support for self-service BI environments within Qlik Sense and Power BI, leveraging advanced technical skills in SQL, Python, and Power BI for comprehensive data insights.

Environment: Qlik SaaS, Qlik Sense 3.2, Tableau, NPrinting 17.2, Power BI, Oracle 11g, MySQL, Neo4j, PostgreSQL, MS SQL Server 2017.

Ascena Retail Group
BI ETL Analyst, Texas, USA

Sep 2023 – Feb 2024

Responsibilities

- Lead overall project implementation and architecture of large volume applications in QlikSense.
- Developed the Qlik Sense environment dashboards and supporting the business decision process.
- Creating Qlik Sense dashboards and charts and performance optimization.
- Qlikview and Qlik Sense Security Implementation.
- Integrating the version control like SVN and GIT for Qlik sense.
- Qlik Sense Attribute based access control and role creation using security rules.
- Building the Nprinting reports.
- Excellent knowledge on Security rules and Custom properties in QlikSense.
- Hands on experience in setting up QlikSense for external users/providers.
- Hands on experience with virtual proxy's setup with SAML integration.
- Expertise on creating security rules.
- Expertise in QlikSense SAML implementation and Security Rules.
- Hands on Experience with NodeJS and configured with QlikSense Governance dashboard.
- Configured the QlikSense Governance version v2.x.
- Managed all administration aspects of the Attunity product Platforms- Attunity Enterprise, Attunity Compose, Attunity replicate.
- Worked on Maintenance support, environment stabilization, upgrades, licensing issues
- Worked on maintaining the operations manuals/run books for the operation support in line with corporate standards.
- Experienced in Attunity Platform environment setup/configurations and integration with other services.
- Experienced in managing security , permission, role etc. within Attunity platform.
- Experienced in deployment process, configuration of different data sources and targets.
- Worked with vendor support/PS teams in troubleshooting and fixing the severity tickets.

Environment: Qlik Sense 3.2, QlikSense Cloud 14.44.9, NPrinting 17.3, MS SQL Server, Crystal Reports, Google Analytics, Ms Access, Attunity

Kale Logistics
Qlik sense Developer, Hyderabad, India

Dec 2019 – Aug 2022

Responsibilities:

- Delivered end-to-end technical expertise and knowledge, offering comprehensive support for architecture, design, security, and installation of the Qlik Sense product.
- Executed the installation, configuration, clustering, load balancing, and multi-node installations

of the Qlik Sense Environment and Software Development .

- Implemented QlikView and Qlik Sense Security, seamlessly integrating version control systems such as SVN and GIT.
- Led the development of the Self-service Model, orchestrating the creation of dashboards by extracting data from databases and intricately designing the UI to meet exacting business/user requirements.
- Integrated version control mechanisms into the Qlik Sense environment, ensuring efficient governance.
- Proficient in designing and implementing efficient ETL processes, with expertise in SQL Server Integration Services (SSIS) or Informatica.
- Skilled in extracting, transforming, and loading data to meet business requirements and enhance organizational efficiency.
- Led the execution of Qlik Sense Attribute-based access control and role creation, leveraging security rules.
- Utilized Python and D3 for Qlik Sense Extensions, contributing to enhanced functionality.
- Constructed Qlik Sense Governance dashboards and advanced Mashups and Themes.
- Conducted thorough performance tuning of SQL Queries, optimizing for efficiency.
- Demonstrated excellent knowledge of Security rules and Custom properties within Qlik Sense.
- Applied hands-on experience to set up Qlik Sense for external users/providers and configured virtual proxies.
- Configured Multi-node built-in Apps (License monitor and operations monitor) within Qlik Sense.
- Implemented security measures, constructing the Self-service Model for dashboards with data extraction, script externalization, and QVD file storage.
- Utilized Set analysis and aggregation functions for precise control over sheet objects.
- Governed data connections within Qlik Sense, ensuring data integrity and accessibility.
- Worked on Qlik Web Connectors and Qlik Data Connectors for seamless integration with external data sources.
- Conducted data analysis and profiling using Tableau to identify trends, patterns, and outliers in large datasets, enabling informed business decisions.
- Integrated Power BI for a comprehensive data analytics environment alongside Qlik Sense.
- Applied Python for advanced analytics and scripting tasks, enhancing data processing capabilities.
- Implemented Extract, Load, Transform (ELT) processes for efficient data processing.
- Installed and configured N-Printing 17.x on a multi-node setup, ensuring streamlined reporting.
- Installed and Configured QMC utilities, ensuring effective management of Qlik Sense resources.

Environment: Qlik Sense 3.1, Qlik Sense 3.2, Power BI, Oracle 11g, MySQL, MS SQL Server 2017, Oracle 12 c.

Kale Logistics
Data Analyst Intern, Hyderabad, India

Apr 2019 – Nov 2019

Responsibilities:

- Configured diverse Qlik Sense roles and implemented attribute-based access control, contributing to the design of the Qlik Sense Governance and development cycle.

- Created intricate Qlik Sense data modeling, master items, and maps to ensure comprehensive data representation.
- Conducted performance tuning and optimization of Tableau workbooks and dashboards to improve load times and user experience.
- 9+Established Qlik Sense architecture and sizing for optimal system performance.
- Converted QlikView dashboards to Qlik Sense Dashboards.
- Demonstrated proficiency in the entire QMC (Qlik Sense Management Console), including token assignment analysis, monitoring tasks, and managing app publishing/importing, as well as implementing Stream restriction.
- Played a crucial role in requirements gathering and processing of structured data and unstructured data.
- Utilizing Python, ELT, and SQL for data processing and analytics, ensuring a comprehensive understanding of end-user business requirements.
- Took responsibility for Qlik Sense Dashboard & Report development, encompassing dashboard design, Qlik Sense Script writing, connection with varied sources (flat file/Oracle, etc.), data cleansing, and data analysis.
- Designed and developed a diverse range of charts, graphs and associated sheet objects to meet complex business requirements.
- Created a relevant data model and front end in Qlik Sense, leveraging SQL for efficient data retrieval.
- Conducted thorough testing of applications and reports using review checklists, emphasizing data quality for Quality Assurance before delivering to end-users.

Environment: Qlik sense 3.1, Microsoft Dynamics, Oracle 11g, Power BI, MySQL, MS SQL Server 2012, MS Office, CSV Files, SAP HRMS.

EDUCATION

Masters in Computers and Information Sciences, Sacred Heart University, 2023.
