Objective

Software Engineer experienced in DevOps, QA, and full-stack development. Proficient in Java, C/C++, C#, and JavaScript within agile teams. Eager to contribute technical expertise and problem-solving skills to a dynamic software development team.

Education

University of Texas at Arlington: Bachelor of Science in Software Engineering

Skills

Development Tools: Visual Studio Code, Android Studio, Unity
Version Control: Git, BitBucket
Methodologies: SCRUM, Agile, UML
Software: MATLAB
Communication: Exceptional interpersonal and communication skills
Work Environment: Adaptable to high-pressure, team-oriented environments

Professional Experience

Frontier International – Front-End Developer

August 2024 – Present

- Developed React front-end and C# backend for real-time drilling applications.
- Enabled asynchronous front-end/backend communication for efficient data flow.
- Led client meetings to prioritize features and enhance UX.
- Supported troubleshooting across full stack and improved software performance.

Fidelity Investments – DevOps Engineer

June 2021 – January 2024

- Automated quality assurance testing with JUnit and developed CI-integrated Java/Spring apps.
 - Maintained servers for 20+ enterprise applications; managed version control with Git/BitBucket.
 - Participated in agile sprints and client feedback sessions to enhance product quality.
-

Projects

MPD HM-Planner

- Built React front-end and C# backend for real-time Managed Pressure Drilling schedule automation and visualization.
- Delivered dynamic graphs and persistent JSON data storage.
- Collaborated with engineers to iterate features based on field needs.

Business Process Orchestration (Java)

- Automated backend client transactions, handling thousands of daily processes, reducing manual work and errors.
