EDUCATION

University of Missouri - Kansas City, USA

Master of Science in Computer Science(Emphasis: Data Science)

GPA: 3.97/4

August 2023 - December 2024

SRM University -AP, India

Bachelor of Technology in Computer Science and Engineering

CGPA: 8.8/10

August 2017 - May 2021

TECHNICAL SKILLS

Programming & Core: Python, Java, C, JavaScript, Algorithms & Data Structures, Object-Oriented Programming

Databases & Cloud: MySQL, Microsoft SQL Server, MongoDB, Google Cloud Platform, Azure DevOps

Web Development & Frameworks: HTML, CSS, PHP, SAP Commerce (Hybris), Angular, Spring, Node.js

Tools: Amazon API Gateway, Amazon S3, Spring Tool Suite, Visual Studio Code, Git, Docker

Operating System & Libraries: Windows, Ubuntu, Sklearn, Pandas, Numpy

WORK EXPERIENCE

Teaching Assistant

UMKC, Missouri, USA

(1 years) January 2024 - December 2024

- I support instructors, aid students with assignments and in emergencies, and foster self-confidence in individuals facing challenges to empower them for independent living.

Digital Specialist Engineer

Infosys, Telangana, India

(2 years) September 2021 - August 2023

- Proven Full-Stack Developer with expertise in Angular, RxJS, NgRx, Spring Boot, and RESTful APIs. Developed high-quality e-commerce frontends with advanced features like faceted search and dynamic filtering.
- Successfully transitioned to SAP Commerce Development, contributing to client projects and demonstrating deep understanding of its architecture. Expertise in creating unified shopping experiences across channels.
- I possess in-depth knowledge of flexible search queries, enabling me to optimize data retrieval and significantly improve system performance. Furthermore, my expertise in scheduling background tasks ensures efficient data management and system maintenance, resulting in streamlined operations and reduced operational costs.

Automation Testing with UFT and HC FACETS - Internship

Cognizant Technology Solutions(CTS), Telangana, India

(6 months) February 2021 - July 2021

- I have expertise in UFT, VBScript, Excel, and HC Facets, developing and executing data-driven test cases, leveraging HC Facets for test data management and automation.

Application Development - Internship

CCC Digital, Andhra Pradesh, India

(3 months) May 2019 - July 2019

- I gained valuable experience in application development using ZOHO CRM, specializing in Deluge scripting.

PROJECTS

- **Project 1: Cloud Based Leave Management**
Developed and deployed a dynamic web application on Google Cloud Platform (GCP) for student leave management, utilizing PHP, JavaScript, HTML, CSS, and a PHPMyAdmin database (MySQL/MariaDB) to facilitate leave requests and approval processes for students and professors.
- **Project 2: Detecting phishing web pages**
Developed a machine learning-based URL classifier using Python, Random Forest, SVM, and Decision Tree algorithms to identify and categorize URLs as legitimate or phishing, leveraging feature engineering and data preprocessing techniques.
- **Project 3: Cloud Storage Cost Optimization**
Cloud cost optimization, achieved through "STaaS" (Storage-as-a-Service) with tiered storage offerings (hot, cold, etc.), focuses on reducing cloud spending by identifying and eliminating waste, right-sizing resources, and leveraging reserved capacity for discounted pricing.

CERTIFICATIONS

- Certified in Google Cloud Platform (GCP) and Software Engineering from JPMorgan Chase & Co., demonstrating foundational knowledge in cloud technologies and software development principles.
- Possesses industry-recognized certifications in SAP Commerce Development, Python, and ZOHO Creator. Gained practical experience through internships at CCC Digital, CTS, and research projects at UMKC, further enhancing technical and professional skills.
