

CHRISTOPHER MAGNO

DATA ANALYST

christophermagno@icloud.com | (510)754-6014 | Wilsonville, OR | <https://github.com/christophermagno>

Former Senior Game Developer transitioning into data analytics, bringing a strong technical foundation and systems mindset. Provides actionable insights through data analysis, automation, and clear communication to support decision-making in fast-paced, production environments.

SKILLS

Python | SQL | Pandas | NumPy | Matplotlib | Seaborn | Tableau | Excel | Power Point | Word
ETL | EDA | Data Transformation | Data Governance, Validation | Visualization | Automation | Optimization

PROJECTS

Health Care Analysis

Health Care Analysis

Cleaned and analyzed messy healthcare scheduling and financial data to uncover demand seasonality, provider workload and burnout risk, patient repeat behavior, booking preferences, and reimbursement performance using Excel, Power Query, and Power Pivot.

Chicago Traffic Accident Analysis

Chicago Traffic Accident Analysis

Performed EDA on a 1M+ row public safety dataset using Python and pandas, normalized data, engineered features, and visualized temporal/spatial accident patterns in Tableau for actionable insights.

Yelp Dataset Analysis

Yelp Dataset Analysis

Processed multi-million-row Yelp datasets, engineered features, applied K-Means clustering to consolidate ~1,300 categories, analyzed and visualized engagement trends, market share, and top businesses in Tableau.

Personal Health Analysis

Personal Health Analysis

Collected and analyzed Garmin Connect health data (heart rate, stress, sleep, activity) using Python and pandas for ETL and EDA. Engineered time-series features and visualized trends with Matplotlib and Seaborn, revealing correlations between stress, sleep, and activity.

EXPERIENCE

Order selector | Sysco Portland | Wilsonville, OR | 2022-Present

- Maintained high accuracy and efficiency in a fast-paced, safety-critical environment
- Demonstrated strong attention to detail, process discipline, and reliability under pressure

(Senior) Technical Analyst | Bend Studio | Bend, OR | 2014-2020

- Troubleshoot and maintained data pipelines and analytics systems for game development, resolving data quality, integrity, and performance issues across the production lifecycle.
- Structured and maintained large-scale data models and pipelines, ensuring healthy, query-ready asset data with reliable governance, validation, and normalization.
- Built and automated ETL workflows and analytics tools in Python, reducing manual effort and delivering production-ready data faster to dependent teams.
- Collaborated with engineering, art, and production teams to integrate analytics into live systems, optimizing for performance, scalability, and actionable insights.

EDUCATION

B.S. Game Art & Design | Art Institute of California - San Francisco | 2010-2012
