

Vanitha Penchala
BI Developer

Email: vanitha.bi95@gmail.com

Phone No: (717)-649-6966

SUMMARY

- Over 4+ years of IT experience as MS SQL Server Developer in analysis, design, implementation & administration of Business intelligence solutions (SSIS/SSRS) with Microsoft SQL server
- 2017/2016/ 2014/2012/2008 in development, testing & production environment.
- Excellent experience to deliver comprehensive Business Intelligence through integration of BI suite of products (SSIS, SSRS) including MS solutions like Microsoft Excel.
- Strong knowledge of Data Warehousing methodologies and concepts, including Star Schemas, Snowflake Schema, SSIS processes, Dimensional Modeling and Reporting tools.
- Highly proficient in using T-SQL for developing complex Stored Procedures, Effective Triggers, Tables, Views, User defined Functions, Relational Database Models and Data Integrity, SQL Joins, Indexing and Query Writing.
- Strong ability in Data warehousing tools, Data Mapping, Unit Testing, Migration, Conversions, and Process Documentation
- Proficient in Creating, Configuring, Deploying and Fine-tuning MS SQL Server Integration Service (SSIS) packages.
- Excellent knowledge to deliver comprehensive Business Intelligence through integration of BI suite of products (SSIS, SSAS, SSRS) including MS solutions like Microsoft Excel.
- Excellent in Design of ETL SSIS Packages for integrating data using OLE DB connection from sources like (Excel, CSV, Oracle, flat file,) by using multiple transformations provided by SSIS such as Data Conversion, Conditional Split, Merge and Union all.
- Experience in creating configuration files to deploy the SSIS packages across all environments.
- Expert in generating reports using SQL Server Reporting Services, like Crystal Reports, parameterized reports, sub reports, drill down reports, drill through reports, MS Excel spreadsheets and Power Pivot for client requirements in SSRS 2005/2008.
- Extensive experience on building dashboards in Tableau and Involved in Performance tuning of reports and resolving issues within Tableau Server and Reports.
- Expert at developing ETL interfaces using SSIS and enterprise reports using SSRS utilizing latest versions and features.
- Good understanding of Normalization / De-normalization, Normal Form, and database design methodology.
- Expertise in Power BI, Power BI Pro, Power Bi Mobile.
- Expert in Creating and developing Power Bi Dashboards in to rich Look.
- Expertise in writing SQL Queries, Dynamics, sub-queries, and complex joins for generating Complex Stored Procedures, Triggers, User-defined Functions, Indexes, Views, and Cursors.
- Highly experienced in whole cycle of DTS/SQL server integration services (SSIS, SSAS, SSRS, PowerBI, QlikView, and Tableau) Packages (Developing, Deploying, Scheduling, Troubleshooting, and monitoring) for performing Data transfers and ETL Purposes across different servers Business Analysis.
- Well versed in development, implementation, administration, and support of ETL processes for large-scale Data Warehouses using SSIS including tools like BCP utility, DTS and SSIS 2017/2016/ 2014/2012 Packages with proper control flow and data flow elements by using MS SQL Server.
- Expert in Developing SSIS Packages to Extract, Transform and Load (ETL) data into the Data warehouse from Heterogeneous databases such as Oracle, DB2, Sybase and MS Access.

- Experience in Creating and managing Event Handlers, Package Configurations, Logging, System and User-defined Variables for SSIS packages.
- Expert in designing (development) and deployment of SSIS package from various sources like MS Access, Oracle, Excel, Microsoft SQL Server, flat file, and XML.
- Extensively worked on SSIS, Data Cleansing, Data Scrubbing and Data Migration.
- Experienced in creating interactive dashboards and scorecards utilizing Power BI.
- Hands on experience in MS Power BI desktop and Power BI service.
- Hands on Experience in Data Migration from MS SQL Server to Oracle ERP Systems.
- Experience in report writing using SQL Server Reporting Services (SSRS) and creating several types of reports like Dynamic, Linked, Parameterized, Cascading, Conditional, Table, Matrix, Chart, Document Map and Sub-Reports.
- Excellent communication skills, analytical skills, understand business requirements in various domains.
- Self-learning ability, Leadership Quality, good team player and determination to learn new technologies and maintain positive relationships at all business levels.

TECHNICAL SKILLS:

Databases	MS SQL Server 2017/2016/2014/2012/2008 MS–Access 16.0/15.0/14.0/12.0
Database Tools	Enterprise Manager, Query Analyzer, SSMS, SQL Profiler, Data Transformation Services, Upgrade Wizard, Replication, Database Engine Tuning Advisor, SQL Server Dashboard, Business Intelligence Development Studio (BIDS), Oracle
Reporting Tools	SQL Server Reporting Services (SSRS), Crystal Reports 12/9, Microsoft Share Point, Power BI, Oracle
Data Modeling	Erwin, TOD, Fact and Dimensional Data Modeling, UML, Logical data modeling and Physical data modeling
ETL Tools	SQL Server Integration Services (SSIS), IBM Data Stage 7.5
Operating System	Windows 2010/7/8.1/8/7, Linux CentOS 7, Solaris 11, Windows Server 2008 R2
Designing Tools	Rational Rose, MS Visio
Applications / IDE	Visual Studio 2015/13/12/10, Adobe Photoshop, Adobe Dream viewer MS-Office, MS-Project

EXPERIENCE:

Client: Halliburton, Houston, Texas.

Apr 2023 – present

Role: Business Intelligence Developer

Responsibilities:

- Created SSIS package to load data from XML Files, SQL Server to SQL Server 2016/2017/2019 by using Lookup, Derived Columns, Condition Split, aggregate, Pivot Transformation, Execute SQL Task and Slowly Changing Dimension.

- Designed and developed physical and logical Data Models using Erwin and responsible for Forward Engineering in Data Modeling.
- Defined and designed database in business requirements and provided documentation.
- Actively took part in Data Modeling/Data Dictionary ODS
- Designed, developed, and supported many Tables, Stored Procedures, and Triggers on Sybase and SQL server.
- Worked closely with data modeler to create data model for or modified existing data model to support different report running on business object and SSRS.
- Developed Validation Plans for SSIS packages for checking the functionality of each component and Code review.
- Used SSIS to create ETL packages to Validate, Extract, Transform and Load data to Data Warehouse.
- Planned and executed SSIS Package step process to load data, validate data and Recommending task to resolve performance issues with loading data into the Data Warehouse.
- Modified the existing SSIS packages, Script Component Task to meet the changes specified by the users and adding columns to the newly design table and to the existing table.
- Scheduled Jobs for executing the stored SSIS packages, which were developed to update the database daily using SQL Server Agent.
- Involved in creating alerts for successful or unsuccessful completion of scheduled jobs. Job overlaps alert.
- Prepare source to target mapping data, like claims, insurance, and provider related data.
- Designed and documented the entire Architecture of Power BI POC
- Expertise in writing complex DAX functions in Power BI and Power Pivot.
- Automated Power Query refresh using power shell script and windows task scheduler.
- Used various sources to pull data into Power BI such as SQL Server, SAP BW, Oracle, SQL etc.
- Installed and configured Enterprise gateway and Personal gateway in Power bi service.
- Created Workspace and content packs for business users to view the developed reports.
- Scheduled Automatic refresh and scheduling refresh in power bi service.
- Worked in setup auditing, logging environment to track the status of the events like error raise, task fail.
- Designed tool to Automatic added Derived column, Parameter and Configuration value to the package.
- Working with Team Foundation Server as the source for version control and project / issue management
- Designed, Developed and Deployed reports in MS SQL Server environment using SSRS-2016
- Created reports to retrieve data using function, views, cube, and Stored Procedures using parameters. Created various database objects like stored procedures, functions, tables, views, and triggers.
- Fine-tuned SQL Queries for maximum efficiency and performance using SQL Profiler and Database Engine Tuning Advisor.
- Provided documentation for all kinds SSIS packages.
- Designed and implemented Stored Procedures and Triggers (DDL & DML) for automating tasks.
- Designed and implemented Data Marts, Facts, Dimensions and OLAP cubes having Star/ Snowflake schema using Dimensional Modeling principles in SSAS.

Environment: - MS SQL Server 2016/2017/2019 (SSMS, SSIS, SSRS), XML, MS Excel 2016, MS Access 2007 & Windows Server 2008, Business Intelligence Development Studio (BIDS), SQL Profiler, Power BI Service

Client: Smartron, Hyd, India

May 2019 – Aug 2021

Role: Power BI Developer

Responsibilities:

- Developed SSIS packages for extract/load/transformation of source data into data warehouse/OLAP cubes as per the functional/technical design and conforming to the data mapping/transforming rules.
- Designed SSIS Packages to transfer data from flat files to SQL Server using Business Intelligence Development Studio.
- Extensively used SSIS transformations such as Lookup, Derived column, Data conversion, Aggregate, Conditional split, SQL task, Script task and Send Mail task etc.
- Performed data cleansing, enrichment, mapping tasks and automated data validation processes to ensure meaningful and accurate data was reported efficiently.
- Developed free-form reports using SSRS for consolidating multiple reports into single report delivered in .pdf format to the power users.
- Developed parameterized reports, drill down, drill through reports, sub reports as per the report specifications and functionality.
- Implemented complex business logic through T-SQL stored procedures, Functions, Views, and advance query concepts.
- Created databases and schema objects including tables, indexes, and applied constraints, connected various applications to the database and written functions, stored procedures, and triggers.
- Directly involved into requirement gathering and understanding business functions with the end users.
- Provided valuable suggestions to users in terms of database design and new application implementation to overcome existing performance and reliability issues.
- Created report schedules and subscriptions. Created data driven subscriptions, reports that run on demand, cached the Reports, Snapshot of the Reports. Deployed reports both to the SharePoint server, IIS Server, Integrated SharePoint server with Report Server.
- Performance tuned long running lengthy SSRS reports and optimized rendering time by 10 times of the actual time.
- Integrated Custom Visuals based on business requirements using Power BI desktop.
- Developed complex SQL queries using stored procedures, common table expressions (CTEs), temporary table to support Power BI and SSRS reports.
- Developed complex calculated measures using Data Analysis Expression language (DAX).
- Embedded Power BI reports on SharePoint portal page and managed access of reports and data for individual users using Roles.
- Successfully redesigned and migrated complex applications from Access to SharePoint and SQL Server 2008 by evaluating database structures and data movements.
- Provided 24X7 production support to ensure timely and error free delivery of reports.
- Performed performance tuning and optimization of SQL queries to improve query performance and to reduce runtime.
- Extensively worked on enhancements and performance issues of the existing data import processes.
- Developed Multi-dimensional, OLAP cubes as per the specifications using SQL Server Data Tools. Participated in the design, development of hierarchies, dimensions, attributes, properties, calculation, and allocation routines for delivering the desired KPI's in the Cubes.

- Independently worked on different stages of SDLC by gathering requirements, managing development, providing support and documentation processes thereby ensuring timely deliverables and uninterrupted continuity of business.
- Developed meta-data structure and configuration for storing/preserving database connection and security parameters using SQL Server configurations, XML configurations.

Environment: - MS SQL Server 2008R2/2012/2014/2016/2017/2019, SSIS, SSRS, Management Studio, Visual Studio, DTS, Windows 7, MS Office 2010/2013, Windows Server 2008, and Windows Server 2008 R2, Visio 2010/2013, Power BI Desktop, Power BI Service.

Client: Nowfloats Tech, Hyd, India

May 2017 – Apr 2019

Role: Power BI Developer

Responsibilities:

- Worked closely with Business Analyst, Team Leader, DBA and Technical Manager in order to gather requirements for design and implementation of database for their existing customers as well as new online customers.
- Used Joins, correlated and non-correlated subqueries for complex business queries involving multiple tables from different databases and implemented triggers and stored procedures and enforced business rules via checks and constraints.
- Created indexes on selective columns to speed up queries and analyses in SQL Server Management Studio.
- Reduced the T-SQL overhead successfully by avoiding unnecessary use of the union statement & using the TOP operator to limit the Select Statement in certain Queries.
- Created views to restrict access to data in a table for security.
- Designed SQL SSIS Packages to extract data from various data sources such as Access database, Excel spreadsheet, and flat files into SQL Server 2014 for further Data Analysis and Reporting by using multiple transformations provided by SSIS such as Data Conversion, Conditional Split, Bulk Insert, Merge and Union all.
- Wrote MDX queries to access data from OLAP cubes.
- Involved in Report Design and Coding for Standard Tabular type reports, including Drill down and Drill through functionality and Graphical presentations such as Charts and Dashboard type matrix using SSRS.
- Used complex expressions to Calculate, Group, Filter, Parameterize, and Format the contents of the report.
- Created Cross-Tab and Sub-Report using RDL and promoted RDLs to Reporting Service Server.
- Scheduled monthly/weekly/daily reports to run automatically.
- Worked on querying data and creating on-demand reports using Report Builder in SSRS reports and send the reports via email to the customers for their values of funds.
- Developed complex Stored Procedures and views to generate various Drill-through reports, parameterized reports and linked reports using SSRS.
- Scheduled and maintained nightly and weekly loads of data by creating the corresponding job tasks for their online customers.
- Enhanced performance using optimization techniques-normalization, indexing and Transaction Isolation levels, monitoring logs to ensure the completeness of batch processes and scripts.

Environment: - MS SQL Server 2014/2012, T-SQL, MS. EXCEL 2012, MS Access, Microsoft SQL Server Reporting Services (SSRS), Microsoft SQL Server Integration Services (SSIS)

Education:

- Masters in Information Technology from Indiana Wesleyan University, Marion, IN, USA.
- Bachelors in Computer Science from Satvahana University, Karimnagar, TS, India.
