

MANUSHA DUDELA

Supply Chain Analyst

+1 (660) 528-5249 | manusha9d@gmail.com | [LinkedIn](#) | New York City, NY

SUMMARY

Analytical and detail-oriented professional with **4+ years** of experience driving efficiencies in supply chain operations and data analytics. Skilled in **Python, SQL**, and **Tableau** for building scalable forecasting models and decision dashboards. Adept at leveraging **SAP ERP**, inventory optimization techniques, and supply planning strategies to reduce costs by **25%**, enhance forecast accuracy by **30%**, and improve on-time delivery. Strong foundation in **demand planning**, KPI tracking, and cross-functional collaboration to support data-driven **S&OP** and procurement initiatives.

SKILLS

Technical Skills: Excel (Pivot Tables, VLOOKUP, Macros), SQL (queries, joins, aggregation), Power BI, Tableau, Looker, Python, R, Power Query, VBA, Alteryx, APIs & automation scripting

ERP & SCM Systems: SAP ERP, SAP SCM, SAP IBP, Oracle SCM Cloud, NetSuite, Enterprise Resource Planning (ERP), JDA/Blue Yonder, Kinaxis Rapid Response, TMS, WMS, MRP

Planning, Forecasting & Optimization: Demand Planning, Demand Forecasting, Supply Planning, Inventory Optimization, Supply Chain Optimization, Statistical Models (Time Series, Regression), Scenario Planning

Supply Chain & Operations: Supply Chain Operations, Logistics Management, Procurement, Strategic Sourcing, Inventory Management, Order Fulfillment, S&OP (Sales & Operations Planning), Material Requirements Planning (MRP)

KPI & Metrics: OTIF (On Time in Full), Inventory Turnover, Days of Inventory, Fill Rate, Lead Time, Forecast Accuracy, Cost Analysis, Performance Dashboards

Analytical Skills: Root Cause Analysis, Trend & Pattern Recognition, Scenario Analysis, Continuous Improvement, Lean Six Sigma Concepts, Statistical Analysis, Data Mining

Soft Skills: Communication, Presentation, Cross-Functional Collaboration, Adaptability, Problem-Solving Mindset, Project Management

TECHNICAL EXPERIENCE

MINDTREE | NJ, USA | Supply Chain Analyst

May 2024 – Present

- Integrated SAP ERP with advanced Excel tools (PivotTables, VLOOKUP, Macros) to optimize inventory control, standardize planning processes, and support cross-functional collaboration across 15+ product lines.
- Engineered scalable demand forecasting models using Python, leveraging time series analysis and statistical modeling to improve forecast reliability and enhance long-range demand planning.
- Created dynamic Tableau dashboards for real-time KPI tracking (OTIF, Fill Rate, Lead Time), enabling quicker decision-making and strengthening data visibility for business stakeholders.
- Performed in-depth supply chain diagnostics using SQL, uncovering disruption patterns, and driving process improvements that increased production efficiency by 20% and reduced planning cycle from 5 to 3 days.
- Facilitated S&OP sessions across procurement, manufacturing, and operations teams, aligning supply and demand plans with Scenario Planning and improved collaboration through data-driven discussions.

ACCENTURE | Bengaluru, India | Junior Supply Chain Analyst

Nov 2020 – Aug 2023

- Automated complex procurement workflows using VBA, Power Query, and API scripting, improving process efficiency significantly and reducing manual errors, saving over 15 hours per week in data processing.
- Developed comprehensive Power BI dashboards for detailed supplier performance and cost analysis, facilitating strategic renegotiations that achieved a 12% reduction in procurement spent while maintaining quality.
- Applied Lean Six Sigma methodologies and advanced Inventory Management techniques to warehouse operations, optimizing layout and picking processes to reduce errors and improve order fulfillment speed dramatically.
- Streamlined transportation and Logistics Management planning using TMS software and route optimization algorithms, boosting on-time delivery rates from 88% to 93% through enhanced carrier coordination and scheduling workflows.
- Executed rigorous data quality validation protocols in Supply Chain Operations using SQL and automated exception handling, improving vendor compliance accuracy and preventing anomalies across inbound logistics and procurement flows.

PROJECTS

PORTFOLIO OPTIMIZATION & PREDICTIVE MODELING

March 2024 – April 2024

- Designed and deployed a high-accuracy LSTM-based forecasting and asset allocation system, integrating macroeconomic indicators and time-series optimization to enhance portfolio returns and reduce trade latency.

WEATHER-DRIVEN TRAFFIC VIOLATION ANALYTICS PIPELINE

January 2024 – March 2024

- Intended and deployed a weather-driven traffic violation analytics pipeline using Python and SQL, boosting query speeds by 65%, automating reporting to save 15 analyst hours weekly, and achieving 99% data accuracy through robust validation protocols.

EDUCATION

Master of Science in Information Systems

Northwest Missouri State University, MO

GPA: 3.81/4.0

Graduation: Dec 2024

Bachelor of Engineering in Electronics and Communication

QIS College of Engineering and Technology, India

GPA: 3.70/4.0

Graduated: May 2021

CERTIFICATIONS

SQL: Advanced Querying, **AWS:** Solution Architect Associate, **Supply Chain Management:** APICS SCOR Model Fundamentals.
