

Data Analyst

Having worked in the Information Technology industry, I have acquired a wide range of technical and management skills. I am well-versed in leading teams, developing, documenting, coding, modifying, testing, and implementing technology solutions for business needs.

SKILLS

- | | | |
|------------------------------------|-------------------------------------|------------------------------|
| • Business Model Analysis | • Analytical & Integrative Thinking | • Data Analysis |
| • Process Flow Mapping | • Oral & Written Communication | • Data Visualization |
| • Requirement Gathering & Analysis | • Agile Methodologies | • Data cleaning and modeling |
| • Research & Problem-Solving | • Project Management | • Data Warehousing |
| • Statistical Analysis | • Data Modeling | • Client Support |

Technical Acumen: Microsoft Office 365 (Outlook, Excel, PowerPoint, Visio, Word, SharePoint, Teams) | UML Diagrams | Tableau | Lucid Chart | JIRA | monday.com | Adobe Workfront | Testing & Debugging | Power BI | Google Analytics | PeopleSoft | SAP | SQL | Python | Smartsheet | Amazon AMT | Magi | Slack | Adobe Analytics | Alteryx | SAS | Snowflake | GCS | JDPower | QlikSense

PROFESSIONAL EXPERIENCE**DATA ANALYST | LER Tech****Client: Stellantis****March 2025 to Present**

- Extracted, cleaned, and transformed 10M+ warranty, recall, service contract, and survey records from SAS, Snowflake, and Dealer Management Systems(GCS) across 2,000+ dealers, improving reporting accuracy by 18%.
- Wrote SQL and Snowflake queries for warranty claim analysis, detecting incorrect dealer labor hour claims and helping recover 15% in profit (~\$2.5M annual savings).
- Developed SAS libraries and queries, optimizing automated data jobs with micro variables, reducing manual effort by 25% and accelerating reporting timelines.
- Automated Snowflake pipelines and connected them to Power BI, eliminating 8+ hours of daily manual data pulls and enabling real-time claim approval/rejection tracking.
- Built and delivered Power BI and QlikSense dashboards for Service Engineering, Quality, and Dealer networks, improving data-driven warranty claim decisions by 20%.
- Designed QlikSense dashboards from SAS survey data to track FFV, NPS, and CSI; increased FFV by 5% and boosted promoters by 10%, ensuring >93% dealer compliance.
- Produced 40+ monthly and quarterly Smart Warranty reports in SAS, distributed to 2,000+ dealers and executives, cutting turnaround time by 30%.
- Built Power BI dashboards for DIDI and Smart Warranty programs, giving dealers visibility into performance levels and reducing projected warranty expenses by 12%.
- Leveraged AI tools to analyze dealer/customer survey text and notes, improving pre-authorization approval rates by 14% and enhancing customer satisfaction.
- Created JD Power competitor dashboards for labor rate benchmarking, identifying 7% cost inefficiencies and guiding labor cost optimization.
- Acted as the sole owner of the SAS platform, overseeing end-to-end administration including installation, license renewals, user support, server space management, and troubleshooting, while supporting 100+ users and maintaining 99.9% system uptime.
- Partnered with 20+ Warranty Administration Managers (WAMs) and conducted 50+ dealer visits, clarifying report insights, ensuring tool adoption, and aligning warranty program goals across regions.

DATA ANALYST | Prince Technology**Client: Nexteer Automotive****January 2024 to Feb 2025**

- Extracted and cleaned data from InteleX API using SQL queries.
- Developed and maintained data pipelines with refresh and incremental refresh processes.
- Integrated data pipelines with PowerBI via data lake house and data warehouse.
- Created and implemented over 9 PowerBI dashboards for Operations, Finance, and Global Supply Management, resulting in a 9% reduction in expenses and a 10% increase in profits.
- Developed a global KPI dashboard, leading to a 15% decrease in expenses.
- Designed GCM and Sales dashboards, which improved sales performance by 20%.
- Produced daily ad hoc reports and managed projects using Monday.com and Jira.

DATA ANALYST | Tasc Performance**December 2023**

- Extracted, cleaned, and transformed data from SAP systems using SQL, supporting data accuracy for sales and operations reporting.
- Developed and delivered ad hoc reports focused on revenue improvement, providing actionable insights that supported strategic decision-making for merchandising and sales teams.

DATA ANALYST | Apex System**Client: Amazon Style****June 2023 to November 2023**

- Experience in Agile/Scrum product development methodology.
- Created milestones in Smartsheet to effectively manage activity deadline and ensure timely completion.
- Developed SQL/Python scripts to extract product data from Oracle database.
- Developed SQL script to get fallout records and load in Redshift database.
- Developed dashboards to analyze and track fallout percentage accuracy in Power BI, resulting in the creation of informative and visually appealing dashboards and reports, resulting in a significant reduction from 80% to 20%, thereby improving overall data integrity and operational efficiency.
- Developed and implemented a comprehensive report in Excel that effectively improved the accuracy and management of back-of-house inventory data, leading to a 5% increase in revenue.
- Leveraged Google Analytics and Adobe Analytics to measure and analyze website traffic, user engagement, and conversion rates, resulting in a 20% increase in overall product purchase.

DATA ANALYST | AGS Automotive Company Solutions LLC**January 2023 to April 2023**

- Wrote SQL queries to extract and analyze data from SQL server, performing data validation, profiling, and cleansing to ensure data accuracy and quality.
- Identified automation opportunities and created PowerBI dashboards for finance and operations team to streamline processes, resulting in improved efficiency by 5% and faster decision-making.
- Collected data from SQL server and created a PowerBI dashboard on Sales data, resulting in a 10% improvement in sales.
- Assisted with project management for finance projects, collaborating with cross-functional teams to ensure timely delivery and successful implementation of financial initiatives.
- Prepared and maintained all documents and requirements from the business team including training materials, test cases, scripts, and all business decision notes using MS Excel, Word, PowerPoint, SharePoint, and JIRA.

DATA ANALYST | KROGER**May 2022 to December 2022**

- Uploaded multiple files to Power BI from SharePoint location and built relationships between files to create comprehensive data models for analysis.
- Developed Python code to gather data from various sources, including CSV files from SharePoint, databases such as Coupa, Brain OS, and SAP, and wrote SQL queries to extract data from SQL databases.
- Developed Power BI dashboards based on periods, vendors, and expense descriptions, providing analysis and reports that contributed to a reduction of housekeeping expenses by 3% within 2 months.
- Created Power BI dashboards based on quarters, divisions, and expense lines to analyze cardboard usage, providing insights and recommendations that helped reduce cardboard expenses by 2.8%.
- Conducted analysis and reporting on robotic scrubbers, store manager spending, Coupa store supplies, and cart order tracker on a weekly and monthly basis using Power BI, resulting in improved usage of robotic scrubbers by 3%, reduced expenses of store manager spending by 1%, Coupastore supplies spending by 2%, and cart order spending by 2.9%.
- Provided support in resolving issues and addressing tickets related to Power BI dashboards to ensure smooth operation and usability.
- Created training materials and provided guidance to interns on the onboarding process and the usage of Power BI dashboards.
- Developed custom reports and dashboards in Google Analytics and Adobe Analytics to provide key stakeholders with actionable insights and enable data-driven decision-making.
- Collaborated with cross-functional teams to define KPIs, set up tracking codes, and implement A/B testing, resulting in improved conversion rates and enhanced user experience.
- Utilized JIRA to manage and resolve tickets related to data analysis and reporting tasks, ensuring timely resolution and efficient workflow.

DATA ANALYST | OYO Apartments Investments LLP**February 2021 to August 2021**

- Utilized data analysis to increase hotel revenue by 30% by implementing the SYBE project, which involved sanitizing hotel rooms in front of customers before their stay and using customer feedback to categorize service quality as 1 star (unhappy) or 5 stars (excellent).

- Developed Tableau dashboards to generate monthly/yearly reports using files received from the Oyo app team on a shared folder, providing insights and recommendations for business performance analysis.
- Utilized Python scripts to extract retail data as CSV files and placed them in a shared location and developed SQL scripts for data processing and analysis.
- Led the team in achieving a quarterly growth rate of 22% for new apartments, providing strategic direction and performance feedback to drive team success.
- Implemented performance feedback and annual appraisals to improve team performance and reduce error rate by 5%.
- Implemented new data entry automation software, resulting in a 55% decrease in clerical errors, improving data accuracy and operational efficiency.
- Created an in-house newsletter to communicate management's vision, reducing back-and-forth communication by 30% and improving team alignment.
- Identified and provided solutions for improving customer experience in the bottom 40 hotels based on data analysis and feedback, driving customer satisfaction and retention.
- Maintained customer retention rate 45% above the company average, demonstrating strong customer relationship management skills.
- Boosted new customer Net Promoter Score (NPS) by 10% through data-driven analysis and insights.
- Maintained 99% accurate product knowledge in a high-volume retail store, ensuring accurate and reliable data for decision-making.
- Utilized JIRA to handle 2.5 tickets per minute, demonstrating efficiency and effectiveness in managing data-related tickets and issues.
- Improved online brand reputation on social media platforms through data-driven analysis and strategic messaging, closing tickets with proper messages and tags.

DATA ANALYST | GetMyUni Education Services Pvt. Ltd

August 2019 to January 2021

- Utilized data analysis to reduce attrition rate from 70% to 17% through an Employment Satisfaction project, by identifying key factors contributing to attrition and implementing data-driven solutions.
- Developed Power BI dashboards to analyze primary data collected from employees and used regression and correlation analysis to calculate and report attrition rate trends to HR Manager and CEO, providing actionable insights for strategic decision-making.
- Sourced and implemented the 'Smart Recruiter' app, resulting in an 18% decrease in attrition rate, leveraging data-driven insights for talent acquisition and retention strategies.
- Conducted end-to-end recruitment and onboarding for 50+ interns, 100+ sales personnel, and over 25 managerial and technological positions, utilizing data analysis to optimize recruitment processes and ensure successful onboarding.
- Achieved an 8% budget reduction through strategic relocation of employees based on data analysis, optimizing resource allocation and cost-saving initiatives.

DATA ANALYST | Tika Data Services

May 2019 to July 2019

- Worked in the multiple projects, different stages of project, coordinating with different departments and levels, understood the business needs and delivered results
- Gathered requirements from the end users and Involved in analysis of source systems, business requirements and identification of business rules.
- Worked closely with Project Manager and provided the time line of the code development and testing of code for the project
- Worked closely and reviewed the Design with Data Architect, Business Analyst and Team lead for Design approval.
- Designed and developed Complex Mappings, which involved slowly changing dimensions (Type2), Error handling, Unit testing and implementation of business rules.
- Involved in development of Informatica Mappings, Mapplets and Workflows for complex Business rules.
- Performance Tuning of SQL Queries and ETL Mappings for the better performance of the data loads.
- Worked with Oracle, flat files as source and loaded into target Oracle tables.
- Worked on migration of Scheduling tool from DAC to Autosys. Understood data model of Informatica tables and developed complex ETL mapping to extract complete list of parameters present in the project and imported it to a csv file. It was greatly appreciated by Manager and Team Lead since it helped team to migrate faster to new scheduling tool.
- Performed production support and was on call for 24/7 to rectify issues if any scheduled workflow fails

EDUCATIONAL QUALIFICATIONS

MS in Business Analytics- University of Michigan | December 2022

Master of Business Administration- VIT Business School, Vellore | March 2020

Bachelor's in Electrical and Electronics Engineering- SSN College of Engineering, Chennai | March 2018
