SUMMARY

Business Intelligence and data analytics professional with a strong ability to **solve operational challenges and turn data into clear, actionable insights**. Experienced in leading projects that improve workflows, reduce costs, and help teams make smarter decisions. Skilled at managing projects, driving change, and building dashboards and models that make a real impact. Comfortable working with diverse teams and adapting to fast-changing environments.

WORK EXPERIENCE

Primafil Cia. Ltda., Remote

April 2025 - Present

Business Analyst

- Audited and optimized cross-functional sales, finance, and inventory workflows for a \$4M-revenue B2B distribution company, eliminating key bottlenecks and delivering a 70% reduction in turnaround times with improved data accuracy.
- Led vendors and managed organizational change to implement a mobile sales application integrated with the ERP, enabling sales teams to place orders directly with real-time access to stock, pricing, and product catalogs, eliminating manual workflows and significantly reducing order processing time and errors.
- Currently developing a machine learning initiative in Python to analyze customer financial behavior using internal payment history and external credit data, with the objective of standardizing credit limits and reducing outstanding debt by up to 50%.
- Designed and maintained Power BI dashboards tracking sales performance, debt, inventory, and profit margins, delivering real-time insights that drive strategic decision-making among company partners.

Nielsen Ibope, Remote

July 2024 - March 2025

Business Intelligence/Software Developer

- Designed and optimized automated data pipelines in AWS and Alteryx, reducing data prep time by 40% and improving reporting accuracy.
- Built Tableau dashboards for 20+ business stakeholders, improving KPI visibility and enabling data-driven decisions that reduced reporting turnaround by 25%.
- Implemented SQL-based validation checks and integrated custom tables across multiple systems, reducing inconsistencies by 30%.
- Partnered with cross-functional teams in Agile sprints to deliver iterative improvements in BI reporting and data quality governance.

National Oilwell Varco, Remote

March 2023 - July 2024

Data Analyst

- Built and maintained Power BI dashboards for finance and accounting, improving transparency and accelerating financial close cycles.
- Automated ETL workflows in Alteryx, enhancing data integration and reducing reporting errors by 35%.
- Delivered ad hoc analyses of financial and operational trends, supporting leadership in forecasting and performance reviews.
- Partnered with business units to resolve data discrepancies, document workflows, and define new data warehouse metrics, strengthening data governance.
