EDUCATION

Master of Science in Computer Science-Data Science
The University of Texas Permian Basin | Odessa, TX
GPA - 3.9

Anticipated: May 2026

Bachelor of Technology in Computer Science-Data Science
Medi-Caps University | India
GPA - 3.2

Graduated: Aug 2022

EXPERIENCE

Graduate Teaching Assistant (GTA)

University of Texas Permian Basin | Odessa, Texas

Sep 2025 - Present

- Assisted in grading student assignments and led undergraduate lab sessions focused on **prompting GPT models** and effectively leveraging **AI technologies**, while supporting classroom demonstrations and preparing lab materials.
- Assisted faculty in identifying, reviewing, and summarizing high-quality research papers on **AI in Education** to support ongoing research initiatives.
- Assisted the faculty supervisor for **COSC 3320 - Python Programming**, supporting students during labs and helping with programming concepts and debugging.
- Collaborated with ITS staff to install required software and ensure lab systems and equipment were maintained in optimal working condition.

Business Analyst

University of Texas of Permian Basin | Odessa, TX

Oct 2024 - Oct 2025

- Analyzed and transformed large-scale student portal data using **advanced SQL queries**, integrating datasets from multiple systems including **Slate** and **PeopleSoft** to support reporting and decision-making.
- Designed and automated approval workflows using **Power Apps** and **Power Automate**, improving cross-departmental processes and reducing manual effort by **40-50%**.
- Contributed to the development of an **AI-powered chatbot** for the university's homepage using **Azure OpenAI services**, supporting data-driven student engagement and service automation.
- Built and maintained **Power BI dashboards** for data modeling, visualization, and performance reporting, improving data accuracy and insight reliability by **60%**.

Software Engineer

Wipro Limited | Pune, India

Apr 2022 - May 2024

- Collaborated on the development of the **Central Health Log Project**, designing backend components to consolidate patient medical records into a unified, structured system.
- Developed and optimized **RESTful APIs** and relational **data models** to support secure storage, retrieval, and processing of patient health data.
- Utilized **Python** and **SQL** to optimize data queries and backend workflows, reducing system runtime by **25%**.
- Implemented performance optimization, validation, and error-handling mechanisms while following software engineering best practices to ensure system reliability and data integrity.

SKILLS

Technical Skills:

Programming Languages: Python, SQL, R, C

AI / Machine Learning: PyTorch, TensorFlow, Keras, Scikit-learn, Generative AI

Data Science Libraries: NumPy, Pandas, Matplotlib, Seaborn

Software Development: RESTful APIs, Object-Oriented Programming (OOP), ETL pipelines.

Big Data Technologies: Apache Spark, Apache Hadoop

Low-Code Automation: Power Apps, Power Automate

Databases & Systems: PeopleSoft, Slate, Relational Databases

Technical Tools & Platforms:

Microsoft Power Platform, Power BI, SQL Server Lite, Microsoft Excel, PowerPoint, MS Office Suite, GitHub (Version Control), SharePoint, GLPI

Soft Skills:

Analytical Thinking & Problem Solving, Data-Driven Decision Making, Technical Communication & Documentation, Cross-Functional Collaboration, Attention to Detail, Time Management & Prioritization, Adaptability & Continuous Learning

Certifications: Microsoft Power BI Data Analyst Professional Certificate - Coursera, Python Bootcamp - Udemy

PROJECTS

AI-Based Handwritten Digit Recognition for K-12 Learning

Developed a Python-based application using Convolutional Neural Networks (CNN) trained on the MNIST dataset to recognize handwritten digits with high accuracy. Integrated a Tkinter-based GUI for real-time digit input and prediction. Applied data augmentation and preprocessing techniques to improve model generalization and performance across diverse handwriting styles.

EduEngage-AI: Multimodal Instructor Analytics System

Engineered a privacy-preserving AI tool fusing computer vision and audio to quantify instructor engagement with 92.4% accuracy. Built a hybrid neural network using TensorFlow/MediaPipe and a desktop app with live analytics and an integrated GenAI coach for real-time feedback.
