

Kushwanth Sai Kumar Bolisetty

bolisettykushwanthsaikumar@gmail.com — +1 786-940-5210

Professional Summary

Detail-oriented **Data Analyst** with 4+ years of experience supporting data analysis, reporting, and business intelligence initiatives using **SQL, Python, Power BI, and Excel**. Skilled in **data collection, cleaning, validation, and exploratory data analysis (EDA)** to identify trends and improve decision-making. Experienced developing dashboards, writing analytical SQL queries, and maintaining **data integrity and documentation standards**. Strong analytical thinker with a continuous learning mindset and solid foundation in **statistical concepts, data visualization, and performance metrics**.

Education

Northern Illinois University, DeKalb, IL

Master of Science in Management Information Systems

Jan 2024 – Dec 2025

GPA: 3.56/4.0

Core Skills

Data Analysis: Exploratory Data Analysis, Statistical Analysis, Trend Identification, Performance Metrics

Tools: SQL, Python (Pandas), Power BI, Excel (Pivot Tables, Advanced Formulas)

Data Management: Data Cleaning, Data Validation, Data Integrity, Documentation

Databases: MySQL, SQL Server

Methods: Dashboard Development, Reporting Automation, Data Visualization, Agile Collaboration

Professional Experience

JA Uniforms — Data Analyst

Mar 2024 – Present

- Collected, cleaned, and validated large operational datasets using **SQL and Excel**, improving reporting accuracy and reducing data inconsistencies by an estimated **25%**.
- Developed interactive **Power BI dashboards** enabling stakeholders to monitor KPIs and identify performance trends, supporting faster business decision-making.
- Wrote optimized **SQL queries** to extract and manipulate data from multiple sources, improving analytics request turnaround time by approximately **20%**.
- Performed **exploratory data analysis (EDA)** to identify trends, anomalies, and operational patterns influencing forecasting and planning decisions.
- Automated recurring reporting workflows using **Python and SQL**, reducing manual reporting effort by **40%** and saving 12+ hours weekly.
- Assisted in defining **performance metrics and reporting standards**, improving consistency across analytical outputs.
- Maintained detailed **data documentation and validation processes** ensuring data integrity and reproducibility of analytics workflows.
- Collaborated with cross-functional stakeholders to translate business questions into actionable data insights supporting operational improvements.

Accenture — Data Analyst

Aug 2021 – Dec 2023

- Analyzed enterprise datasets using **SQL and Excel analytics** to identify patterns, trends, and performance insights across multiple client projects.

- Built automated **dashboard reporting solutions** improving KPI visibility for leadership teams and business users.
- Supported **data mapping, cleansing, and validation** initiatives improving dataset reliability and analytical accuracy.
- Assisted senior analysts in preparing datasets and delivering insights to stakeholders across cross-functional teams.
- Conducted **trend analysis and data profiling** to detect anomalies and opportunities for operational improvement.
- Streamlined reporting workflows through automation, improving analytics delivery efficiency by approximately **30%**.
- Participated in Agile environments collaborating with analysts and engineers to deliver scalable analytics solutions.
- Prepared structured datasets supporting exploratory analytics and early-stage predictive modeling initiatives.

Project Highlights

- **Sales & Inventory Analytics Dashboard:** Built end-to-end reporting solution using SQL and Power BI to monitor trends and demand patterns.
- **Automated Reporting Framework:** Developed Python automation scripts reducing weekly reporting preparation time significantly.
- **Customer Behavior Analysis:** Conducted segmentation analysis identifying high-value customer groups and engagement opportunities.

Technical Skills

Languages: SQL, Python

Visualization: Power BI, Excel

Databases: MySQL, SQL Server

Concepts: Data Cleaning, Data Validation, EDA, Statistical Analysis
