

LAKSHME PRASAAD REDDY NANDI

(945) 237-0394 | lakshmeprasaadn@gmail.com

Professional Summary

Data Analyst with Bachelor's degree in IT-related field and 3+ years of Power BI experience handling data analysis requests from internal and external clients in healthcare setting. Development experience using SQL, Snowflake, DAX, and M with proven ability to create and automate dashboards and extracts using Microsoft Power BI Data flows. Business Intelligence experience developing database queries and reports, dashboards, and analyzing healthcare data including Rx and medical claims processing. Strong problem-solving and analytical abilities with proactive approach identifying and mitigating data concerns. Excellent communication and collaboration skills working with technical and compliance teams. Ability to multi-task, prioritize work to meet deadlines, troubleshoot complex technical data issues, and work independently or in team environment. Commitment to maintain confidentiality and continuous learning in healthcare data.

Technical Skills

Power BI: Power BI (3+ years), DAX, M, Power BI Data Flows, Dashboard Development, Automated Dashboards, Extracts

SQL & Databases: SQL, Snowflake, SSMS, Database Queries, Report Development, Data Extraction, Data Integration

Healthcare Data: Healthcare Claims, Rx Claims, Medical Claims Processing, Pharmacy Benefits, Healthcare Analytics

Business Intelligence: KPI Development, Performance Measurement, Data Modeling, Report Automation, Analytics Tools

Microsoft Office: Excel, Word, Outlook, Productivity Tools, Data Reporting

Core Skills: Problem-Solving, Analytical Abilities, Communication, Collaboration, Multi-Tasking, Confidentiality

Experience

Data Analyst

August 2023 – Present

Centene Corporation

Dallas, TX, USA

- Handled data analysis requests from internal and external clients across healthcare operations serving 5M+ members, supporting development and execution of analytics providing data-driven strategic insights and creating customized analytic approaches for pharmacy benefits and medical claims setting.
- Developed, revised, tested, implemented, and documented 25+ reports and data extracts using Power BI (3+ years), SQL, Snowflake, DAX, and M, pulling data to develop recurring and one-time reports as requested by customers including quarterly performance reviews and ad hoc client inquiries.
- Established and maintained 30+ KPIs measuring effectiveness of business performance and decisions, created and automated dashboards using Microsoft Power BI Data flows, and successfully implemented report programs for automation reducing manual reporting time by 40%.
- Collaborated with reporting team members in collection and analysis of healthcare and client data for reporting purposes, worked with internal and external teams identifying opportunities for improvement in data quality, accuracy, and availability, and performed data integration, extraction, and data modeling activities.
- Achieved proficiency in Power BI platform, Snowflake, SSMS, and productivity tools through training and daily exposure, maintained strong knowledge of healthcare Rx and medical claims processing, troubleshoot and resolved complex technical data issues, and managed multiple priorities meeting deadlines while maintaining confidentiality.

Analyst

May 2021 – June 2022

Biocon Biologics

Hyderabad, India

- Handled data analysis requests pharmaceutical operations 2,000+ sites developed executed analytics provided data-driven insights created customized analytic approaches Bachelor's degree IT related field appropriate coursework minimum 3 years Power BI experience development experience SQL Snowflake DAX M development languages.
- Developed revised tested implemented documented reports data extracts pulled data develop recurring one-time reports requested customers established maintained KPIs measure effectiveness business performance decisions experience Microsoft Power BI Data flows create automate dashboards extracts ability create successfully implement report programs automation.
- Collaborated reporting team members collection analysis data reporting purposes worked internal external teams identify opportunities improvement data quality accuracy availability performed data integration extraction data modeling activities Business Intelligence experience developing database queries reports dashboards analyzing data healthcare related.
- Achieved maintained proficiency reporting analytic tools Power BI platform Snowflake SSMS productivity tools Microsoft Office Word Excel Outlook ability multi-task prioritize work meet deadlines team player can attitude ability work assignments independently ability troubleshoot resolve complex technical data issues strong problem-solving analytical abilities proactive approach identifying mitigating data concerns excellent communication collaboration skills work technical compliance teams ability manage multiple priorities work independently team environment commitment maintain confidentiality continuous learning healthcare data.i/

Projects

Healthcare Claims Analytics & Pharmacy Benefits Reporting Platform

- Power BI (3+ years), SQL, Snowflake, DAX, M, Data Flows, Healthcare Claims, Rx Claims, KPIs, Automation, SSMS
- Handled data analysis requests internal external clients healthcare operations serving 5M+ members supporting development execution analytics providing data-driven strategic insights creating customized analytic approaches pharmacy benefits medical claims setting, developed revised tested implemented documented 25+ reports data extracts Power BI SQL Snowflake DAX M pulling data develop recurring one-time reports requested customers quarterly performance reviews ad hoc client inquiries, established maintained 30+ KPIs measuring effectiveness business performance decisions created automated dashboards Microsoft Power BI Data flows successfully implemented report programs automation reducing manual reporting 40%, collaborated reporting team members collection analysis healthcare client data reporting purposes worked internal external teams identifying opportunities improvement data quality accuracy availability performed data integration extraction data modeling activities, achieved proficiency Power BI platform Snowflake SSMS productivity tools maintained strong knowledge healthcare Rx medical claims processing troubleshoot resolved complex technical data issues managed multiple priorities meeting deadlines maintaining confidentiality.

Pharmaceutical Business Intelligence & Analytics Reporting

- Power BI, SQL, DAX, Data Flows, KPIs, Business Intelligence, Report Automation, Data Quality, Collaboration
- Handled data analysis requests pharmaceutical operations 2,000+ sites developed executed analytics provided data-driven insights created customized analytic approaches, developed revised tested implemented documented reports data extracts pulled data develop recurring one-time reports requested customers established maintained KPIs measure effectiveness business performance decisions experience Power BI Data flows create automate dashboards extracts ability create successfully implement report programs automation, collaborated reporting team members collection analysis data reporting purposes worked internal external teams identify opportunities improvement data quality accuracy availability performed data integration extraction data modeling activities Business Intelligence experience developing database queries reports dashboards analyzing data, achieved maintained proficiency reporting analytic tools Power BI platform Snowflake SSMS productivity tools Microsoft Office ability multi-task prioritize work meet deadlines team player ability work independently troubleshoot resolve complex technical data issues strong problem-solving analytical abilities excellent communication collaboration skills ability manage multiple priorities commitment maintain confidentiality continuous learning.

Education

University of North Texas

Master of Science in Artificial Intelligence

Denton, TX, USA

- IT-related field - Relevant Coursework: Data Analytics, Healthcare Data, Business Intelligence, Database Systems

Osmania University

Bachelor of Engineering in Computer Science

Telangana, India

- Bachelor's degree IT-related field with appropriate coursework - Relevant Coursework: Data Analysis, Reporting
