SUMMARY

Detail-oriented Data Scientist with over 3 years of experience in data science, predictive modeling, and business intelligence. Skilled in working with big data tools such as Spark, Hadoop, and Hive, and experienced with cloud platforms like Snowflake and AWS S3. Strong background in building and maintaining ETL pipelines, developing scalable PySpark and Scala solutions, and deploying models that improved key business metrics. Eager to contribute technical skills and data-driven thinking in a Data Scientist position focused on practical problem solving and measurable results.

EXPERIENCE

Junior Data Scientist

Trine LLC 11/2023 - 02/2025 Sacramento, CA

- Engineered and optimized ETL processes by developing scalable Spark scripts and Spark-SQL/streaming using Python, significantly accelerating data testing and processing cycles.
- Wrote PySpark UDFs and Scala programs to implement complex ETL business logic and perform critical data quality checks within the Hadoop/Hive environment.
- Designed and optimized Hive internal and external tables and utilized Pig scripts for ETL pre-aggregations and transformations of semi-structured data before HDFS storage.
- Utilized Spark, Scala, and PySpark to preprocess and extract structured information from extensive datasets employing regular expressions, thereby enhancing dataset reliability and facilitating downstream model training and analysis.
- Wrote and optimized SQL and PL/SQL scripts to extract, transform, and load (ETL) data from multiple warehouse sources, supporting analytics and reporting initiatives.
- Created and maintained interactive Tableau dashboards and visual reports that presented key business metrics and trends to stakeholders, helping guide data-driven decisions.

Data Analyst

Ampex Brands 05/2022 - 10/2023 Richardson, Texas

- Collected and managed data from various sources, increasing database comprehensiveness by 25% and improving report accuracy.
- Developed Snowflake data pipelines to combine data from seven systems, ensuring consistent and reliable information for business reporting.
- Created SQL queries and stored procedures to support dashboards and recurring performance reports, helping identify patterns that led to a 10% rise in quarterly sales.
- Built automated reports in Python and SQL, reducing manual reporting time by 30% and improving efficiency for the analytics team.
- Designed and maintained MongoDB and SQL Server databases to store, organize, and retrieve information for analytical projects.
- Assisted in the preparation of forecasting and trend analyses to estimate event and campaign attendance using Python and PySpark.

SKILLS

Databases: Snowflake, AWS RDS, Teradata, Oracle, MySQL, Microsoft SQL, Postgre SQL, MongoDB, Hadoop.,

Programming Languages: Python, R, Java, SQL, Scala.

Cloud Technologies: AWS, Docker

Scalable Data Tools: Hadoop, Hive, Apache Spark, Pig, Map Reduce, Sqoop.

Reporting & Visualization: Tableau, Matplotlib, Power BI, RapidMiner.

CERTIFICATIONS

Machine Learning on Google Cloud
Specialization: Google Certificates

Deep Learning Specialization: DeepLearningAI

Generative Ai with Large Language Models:
DeepLearningAI

Cloud Strategy Professional Certificate: LinkedIn

EDUCATION

Master of Science in Data Science
University of the Cumberland
02/2025 - Present Williamsburg, Kentucky

Bachelor of Science in Information
Technology
Salem State University
12/2018 - 05/2022 Salem, Massachusetts
