## CYBERSECURITY ANALYST

Motivated to protect company hardware, software, and networks from cybercriminals.

Possess a solid foundation in Information Technology, Cloud Security and Privacy mechanisms, Defensive Security, Systems Analysis and Design, and Firewalls & Infrastructure Security.

Possess experience in mitigating risks, vulnerability testing scenarios, incident investigation, troubleshooting, project management, systems analysis, design, and network protocols.

## EDUCATION:

---

|                                                                             |         |
|-----------------------------------------------------------------------------|---------|
| MS in Cybersecurity, DREXEL UNIVERSITY, Philadelphia, PA                    | 03/2024 |
| BS in Cybersecurity, THOMAS EDISON STATE UNIVERSITY, Trenton, NJ, (GPA 3.7) | 06/2022 |

## CERTIFICATIONS AND SPECIALIZATIONS:

---

|                                                                   |         |
|-------------------------------------------------------------------|---------|
| Professional Certificate in Google IT Support, GOOGLE ON COURSERA | 10/2019 |
| Technical Support Fundamentals                                    |         |
| The Bits and Bytes of Computer Networking                         |         |
| Operating Systems and You: Becoming a Power User                  |         |
| System Administration and IT Infrastructure                       |         |
| IT Security: Defense against the Digital Dark Arts                |         |

## TECHNICAL SKILLS:

---

### PROGRAMMING LANGUAGES

Used the following programming languages to complete course projects and assignments:

Python - for scripting and data analysis in courses such as Computer Programming I and Deep Learning

Java - for developing desktop applications, network analyzers, and software systems in courses such as Introduction to Programming, Intro to Software Design, and System Design and Analysis I

C programming - for system programming in courses such as System Basics JavaScript – Data Structures and Algorithms

## **DEFENSIVE SECURITY**

Implemented encryption algorithms, authentication protocols, firewall rules, and backup strategies to secure data and systems in courses such as Defensive Security, Firewall and Perimeter Security, critical infrastructure security, and Cryptography.

## **DIGITAL FORENSICS**

Gained a deep understanding of how to use digital forensics tools and techniques to acquire, analyze, and report on digital evidence from various sources in courses such as Digital Forensic Techniques and Practices, Ethical Hacking, foundation of information technology.

## **CYBERSECURITY POLICIES AND COMPLIANCE**

Gained good understanding and experience on how to use cybersecurity policies and compliance standards to guide the development and implementation of cybersecurity programs and practices in courses such as Cybersecurity Policies, Programs, and Compliance, Cybersecurity Risk Analysis & Management

## **SYSTEMS ANALYSIS & DESIGN**

Learned how to use system design and analysis tools and techniques to plan, design, develop, test, and maintain software systems or applications in courses such as System Design and Analysis I, Intro to Software Design, and Software Development

## **OPERATING SYSTEMS**

Learned how to configure and secure different operating systems such as Windows Server, Linux, and Unix in courses such as Operating Systems, Windows Server Configuration, and Linux

## **ARTIFICIAL INTELLIGENCE**

Worked with deep learning models for image recognition, neural language generation, and sentiment analysis in courses like artificial intelligence, deep learning.

## **CLOUD COMPUTING**

Worked on AWS cloud services for data storage, serverless computing, and container orchestration in courses such as cloud computing, cloud security and privacy, and hands-on networks, network technology.

## **DATABASE MANAGEMENT**

Worked on SQL and NoSQL databases for data modeling, querying, and manipulation in courses such as database management, database programming, and database fundamentals.

## **MICROSOFT OFFICE**

Proficient in using Excel/ PowerPoint for data analysis, charting, pivot tables, and presentations.

## **LEADERSHIP EXPERIENCE:**

---

## **SOFTWARE DEVELOPMENT**

Led a team project in a Software Development course at Drexel University  
Coordinated team members' tasks and facilitated communication to develop an event ticket app Scheduled and led meetings to discuss progress and provide support as needed.

## **PROJECT EXPERIENCE:**

---

### **Federal In-Service Training Requirement MS Midterm Project Drexel Feb 2023**

Worked on a presentation that helped the new Information Management team members gain basic proficiency in hardening and securing their company's infrastructure. Emphasized fifteen specific training tasks and principles within the presentation to achieve this.

### **Cybersecurity Risk & Management BS Thomas Edison State University June 2022**

As a cybersecurity risk manager at Health Infrastructure Services Incorporated designed a risk assessment process plan, a risk mitigation plan, a business continuity and disaster recovery plan, and a POAM template.

### **Cybersecurity Final Project Requirement BS Thomas Edison State University June 2022**

Wrote a thesis report that designs and implements a security plan for a widget wholesaler firm that has less than two hundred employees based at two different locations.

## **FOREIGN LANGUAGE SKILLS:**

---

Native English Speaker with Limited proficiency in Telugu
