SUMMARY

Master's student in Information Technology with hands-on experience in product analytics, statistical modeling, and scalable data processing. Proficient in SQL, Python, and Spark for A/B testing, KPI forecasting, and deriving actionable insights from high-dimensional datasets. Experienced with distributed computing tools including Hadoop and MapReduce to process large-scale product data. Adept at transforming analytical findings into product strategies that enhance user experience and drive innovation.

EDUCATION

Arizona State University

January 2024 – December 2025

Master of Science in Information Technology | GPA: 4.00/4.00

Tempe, Arizona

Relevant Coursework: Data Visualization and Reporting for IT, Analyzing Big Data, Data Modelling, Data in the Cloud with AWS, Advanced Database Management System

Mumbai University - Pillai College of Engineering

August 2018 – May 2022

Bachelor of Engineering in Information Technology | GPA: 3.39/4.00

Mumbai, India

Relevant Coursework: Digital Techniques & Logic Design, Microprocessor and Microcontroller, Digital Signal Processing, Database Management, Data Analytics in Python, Advanced Analytics using Databricks, Programming Languages

PROFESSIONAL EXPERIENCE

Business Intelligence Analyst

May 2022 – July 2023

Prisha Infotech

India

- Developed advanced SQL queries on AWS Redshift and Azure SQL to support product and operational analytics.
- Built Power BI and Tableau dashboards for product KPIs, integrating AI-driven insights to inform cross-functional strategy.
- Defined success metrics and conducted cohort analysis and A/B tests to evaluate product enhancements.
- Utilized Hadoop and MapReduce to process raw clickstream and transactional data, optimizing reporting pipelines.
- Translated product policy requirements into measurable metrics and monitored them for compliance insights.

Data Engineer Intern

May 2020 – September 2020

Enel X Services

India

- Designed ETL pipelines using PySpark and AWS Glue to process transactional and behavioral data at scale.
- Supported early AI/ML implementation for anomaly detection and system monitoring.
- Maintained governance documentation aligned with agile technical developments and compliance planning.

PROJECTS

Healthcare Risk Prediction with Spark MLlib

January 2025 – May 2025

- Used Apache Spark to preprocess, engineer features, and classify patient data by risk levels, simulating high-volume environments.
- Validated models using stratified cross-validation; tuned hyperparameters for optimized AUC and F1-scores.
- Presented results as an impact dashboard to reflect model influence on hospital decision-making.

Scalable Data Pipeline for Product Analytics

March 2024 – August 2024

- Developed an end-to-end pipeline using AWS Glue and Redshift to process 10M+ event logs across multiple product features.
- Automated transformation layers to generate feature usage KPIs and time-series trend forecasts.
- Optimized queries for distributed computing using partitioning and indexing strategies in Athena.

Product Experimentation & A/B Testing Insights

August 2023 – December 2023

- Designed and executed A/B experiments to evaluate the impact of a new feature on user retention using Python (SciPy) and SQL.
- Measured statistical significance and practical impact, adjusting for confounders with stratified sampling and bootstrapping.
- Visualized pre/post-metric distributions and experiment lift in Tableau; delivered insights that mimicked real-world product launches.

TECHNICAL SKILLS

Languages & Tools: Python, SQL, R, Java

Data & Statistical Tools: PySpark, Pandas, NumPy, Scikit-learn, Spark MLlib, Hive

BI & Visualization: Tableau, Power BI, QuickSight

Databases: AWS Redshift, Azure SQL, MongoDB, MySQL, Oracle

Cloud & ETL: AWS (S3, Athena, Glue, Redshift), Azure Data Factory

Analytics Concepts: A/B Testing, Experiment Design, KPI Forecasting, Model Validation, Product Metrics
