Professional Summary

Business Analyst with 3+ years of demonstrated experience in driving process improvements, enhancing data-driven insights, and leading successful system implementations. Adept at leveraging SQL, Python, and visualization tools (Tableau, Power BI) to deliver actionable business outcomes. Proven expertise in Agile methodologies and regulatory compliance (HIPAA, HL7, ICD), with a strong focus on bridging the gap between technical teams and business.

Technical Skills

Business Analysis: Requirements Gathering (BRDs, FRDs, SRS), JAD Sessions, SWOT Analysis, Impact & Gap Analysis, UAT Management, Cost-Benefit Analysis, Traceability Matrix

Data Analysis: SQL, Python, Tableau, Power BI, Alteryx, Data Modeling, Data Migration, Snowflake

Healthcare Domain: EMR/EHR, HIPAA, HL7, ICD, Medicare Compliance

Financial Domain: FX, Fixed Income, SAP, MS Dynamics Nav, Regulatory Compliance

Project Management: Jira, Confluence, Scrum, Agile, MS Project, MS Visio

Testing & Quality Assurance: Test Plans, Defect Tracking, Regression Testing

Soft Skills: Analytical Thinking, Stakeholder Engagement, Problem-Solving, Agile & Scrum

Certifications: Google Data Analytics

Experience

Business Analyst, Johnson and Johnson, New York

September 2023 – Current

- Gathered and documented comprehensive business and functional requirements for EMR/EHR platform integrations ensuring 100% compliance with HIPAA and HL7 standards.
- Conducted gap and impact analyses that reduced data processing time by 25% and streamlined clinical workflows.
- Facilitated Joint Application Development (JAD) sessions, enhancing stakeholder collaboration and boosting claim accuracy by 20%.
- Developed dynamic Tableau dashboards to present patient outcomes and operational metrics, increasing decision-making efficiency by 25%.
- Led User Acceptance Testing (UAT) efforts, resolving over 50 critical defects, resulting in a 30% reduction in production issues.
- Coordinated with IT teams and utilized Snowflake to optimize data migration strategies, reducing transfer times by 20%.

Business Analyst, Capgemini, India

July 2020 – July 2022

- Crafted detailed BRDs and FRDs for complex financial systems, achieving a 95% end-user acceptance rate during UAT.
- Designed and implemented Power BI dashboards that improved financial decision-making turnaround by 40%.
- Executed thorough gap analyses to identify 15+ process improvement areas, leading to projected annual cost savings of \$1.5M.
- Utilized SQL, Python, and Alteryx to analyze over 5 million transactions daily, cutting reporting time by 60%.
- Developed process flow diagrams and UML models with MS Visio, facilitating clear communication of complex financial processes.

Education

Master of Science (M.S.), Information Systems, Pace University, New York

Jan 2023 – Dec 2024

Bachelor of Engineering (B.E.), Information Systems, Mumbai University, India

Aug 2018 – May 2022
