PROFESSIONAL SUMMARY

Data Analyst and Business Analyst with a Master's in Business Analytics and hands-on experience in SQL, Python, R, Power BI, and Tableau. Proven ability to analyze large datasets, build dashboards, support KPI reporting, and deliver actionable insights through cross-functional collaboration.

EDUCATION

University of Utah, David Eccles School of Business
Master of Science, Business Analytics | GPA: 3.98/4

Salt Lake City, UT
December 2024

SKILLS

Analytics/Visualization/Machine Learning: Power BI, Power Automate, Alteryx, Tableau, A/B testing, Logistic Regression, Linear Regression, Decision Trees, SQL, TensorFlow, Keras, Computer Networks, R Studio, GitHub, Problem Solving, ETL
Project Management: Scrum, Agile Methodologies, SDLC, Qualtrics
Programming: Python, PySpark, R, SQL, SAS, C, Excel

EXPERIENCE

AI Research Fellow (Computer Science Fellow)
Handshake AI

Remote, Salt Lake City, UT
Oct 2025 - Present

- Evaluated and refined large language model (LLM) outputs to improve accuracy, relevance, and consistency.
- Conducted structured analysis to identify gaps, bias, and quality issues across AI-generated responses.
- Applied documentation, QA, and analytical reasoning to support milestone-driven AI research projects.

Business Analyst
Stable Coupons, Inc.

Remote, Salt Lake City, UT
Jan 2025 – Oct 2025

- Analyzed user behavior across 1M+ customers, improving coupon conversion rates by 18% using funnel analysis and A/B testing.
- Built executive dashboards using SQL and Tableau, reducing ad hoc requests by 45% and improving decision speed by 60%.
- Partnered with cross-functional teams to define monthly and quarterly KPIs and translate insights into business recommendations.

Teaching/Data Analyst Assistant
University of Utah

Salt Lake City, UT
July 2024 – December 2024

- Assisted faculty in Statistics and Predictive Analytics and Introduction to Business Analytics courses.
- Supported students with Python, R, SQL, Tableau, and Power BI for analytics and visualization tasks.

Data Analyst / Assistant System Engineer(R&D)
Tata Consultancy Services Limited

Hyderabad, India
June 2022 – August 2023

- Utilized Python (OOP concepts, recursion) to support connection control techniques and backend logic, improving API efficiency and system responsiveness by 50%.
- Analyzed IP and networking performance data to identify optimization opportunities, enhancing server connection performance and reliability by 60%.
- Performed SQL-based ad hoc data extraction and analysis to support operational troubleshooting and resolve recurring business and system issues.
- Built and maintained reports and dashboards using Excel, Tableau, and SSRS to analyze trends such as daily, monthly, and yearly energy consumption metrics.
- Supported data validation, ETL documentation, and Agile Scrum workflows by writing SQL queries, stored procedures, and test scripts to ensure data accuracy and reporting reliability.

Machine Learning Intern
Tata Consultancy Services Limited

Hyderabad, India
February 2022 – May 2022

- Developed a face mask detection model using convolutional neural networks in TensorFlow during an internship hackathon, focusing on real-time image classification and model optimization.

PROJECTS

Predictive Maintenance for Swire Coca-Cola | Python, R, Power BI

October 2024

- Built predictive maintenance models using survival analysis and ARIMA time series to forecast equipment failures, reducing unplanned downtime by 20–30%. Simulated proactive maintenance scenarios to improve production efficiency.

Generative AI Hackathon | Chatgpt, Python, Tableau

March 2024

- Analyzed unstructured patient reviews using ChatGPT in a 6-hour hackathon to generate 65% sentiment coverage. Delivered actionable insights and strategic recommendations visualized through Tableau, boosting team efficiency by 60%.

Database Management System for McDonald's Inventory | SQL, PostgreSQL, DBeaver

October 2023

- Designed a relational database for inventory tracking from suppliers to stores. Wrote optimized SQL queries for efficient data management, improving stock maintenance, data integrity, and operational oversight.
