Java Developer

PROFESSIONAL SUMMARY

- Over 4 years of experience in the Analysis, Design, Development, Implementation, and Maintenance of applications using Java/J2EE technologies like Servlets, JSPs, Hibernate, Spring MVC, Struts, and JPA, with a solid understanding of SDLC concepts.
- Proficient in understanding requirements, developing, implementing, and testing web application architecture using Object-Oriented and RDBMS concepts.
- Strong programming skills in designing and implementing multi-tier apps using web technologies like Spring MVC & Spring Boot.
- Experienced in client-side and server-side scripting languages such as HTML, CSS, and JavaScript, including frameworks like Angular and Node.js.
- Proficient in developing Android Enterprise Apps using Java, Eclipse, Android SDK, ADT development tools, and Android Studio.
- Proficient in working with databases such as MySQL, Oracle, MS SQL Server, and MongoDB, managing Tables, Views, Indexes, Sequences, Stored Procedures, Functions, Triggers, and Packages.
- Implementing Java concepts like Collections, Multithreading, Singleton, Generics, StringBuilder & Interfaces.
- Strong understanding of common API technologies including OAuth, SAML, Spring Boot, and Microservices.
- Demonstrated track record of increased responsibility in business software design, Microservices, systems analysis and development, and full lifecycle project management.
- Dedicated, focused, and diligent with excellent organizational, interpersonal, and communication skills.

TECHNICAL SKILLS

Languages	Java 8,11, PL/SQL, SQL, Python
Java/J2EE Stack	Core Java, JMS, Java Beans, Java Multithreading, Generics and Collections, Design Patterns
Frameworks	Spring Boot, Hibernate.
Web Technologies	HTML5, XML, JSON, CSS3, JavaScript, Node.js, React
Web Services	SOAP, REST
Design & GUI Tools	Eclipse, IntelliJ
App servers	Apache Tomcat, SQL server (Wamp/xamp)
Databases/Tools	Oracle, SQL Server, My-SQL
Methodologies	Agile, Waterfall
Operating Systems	Windows, Linux, UNIX

EDUCATION

University of Texas at Arlington, Texas
Bachelors in Computer Science Engineering;

PROFESSIONAL EXPERIENCE

Tenet Healthcare, Remote, USA | Oct 2021 – Current
Java Software Developer

- Created automated applications using microservices architecture and the Spring Boot framework to maintain the status of license-based applications for end users.
- Engaged in the Design, Development, and Support phases of the Software Development Life Cycle (SDLC).
- Developed a B2B web application with features like analytics and user segmentation, and created Android SDKs for analytics, rich push notifications, and surveys.
- Implemented MVVM architecture and managed the migration from Java to Kotlin in existing Android applications.
- Developed cross-platform apps for providing personal & consumer loans using cryptocurrencies/digital assets as collateral.
- Developed FinTech products focusing on credit policies, 3rd party integrations, and sourcing partner APIs.
- Built Single Page Applications (SPA) using Angular and React.
- Wrote SQL and NoSQL databases, including Stored Procedures, Functions, Triggers, Sequences, Indexes, and Views, resolving database inconsistencies with improved design and efficient SQL queries.
- Created domain-specific CI/CD automation pipelines to reduce traffic flow and handle requests efficiently, utilizing GIT and Jenkins for code repositories and migrations.
- Utilized Jira for agile scrum methodology, participating in daily and weekly Scrum calls to discuss issues and progress.
- Collaborated with the web application development team to ensure seamless integration between mobile and web applications.
- Participated in gathering business requirements with product owners and defined technical tasks for each sprint.

SumatoSoft, Remote, USA | Apr 2020 – Sep 2021
Junior Java Developer

- Engaged with Eclipse for visually designing, constructing, testing, and deploying J2EE application and web services.
- Designed User Interface using HTML5, CSS3, jQuery, JavaScript, Node.JS and XML in a responsive grid layout.
- Implemented modules into Node.JS to integrate with designs and requirements.
- Used JMS (Java Mailing Service) API to mail notifications upon the success or failure when the backend processes are completed and to send mail notifications regarding any system related problems.
- Used JAXB API to bind XML schema to java classes.
- Developed components using Spring Framework (Spring MVC, Core, dependency injection, Bean, spring security, and Spring AOP, Spring Boot, Aspects, Dependency Injection).
- Developed REST webservices to facilitate communication between client and servers using JSON data format.
- Used various Java, J2EE design patterns like Factory, Singleton, Reflection, MVC, etc.
- Developed J2EE application to search for the obsolete data which are not part of the data migration.
- Was responsible for enhancing the Search functionality.
- Worked with SQL plus to interact with Oracle tables.
- Followed the Agile process and involved in Scrum meetings.
- Involved in the Integration, User Acceptance and Production testing.
