

VISHRUT GOTI

Full stack developer

San Francisco, CA Open for relocation to Seattle, WA | Dallas, TX | Chicago, IL | New York, NY

gotivishrut0909@gmail.com | (562) 939-3487 | <https://www.linkedin.com/in/vishrut-goti-73a861233/>

SUMMARY

- Experienced Full Stack Engineer with 4+ years in designing and scaling secure, cloud-native microservices at Shopify and Accenture, driving seamless payment solutions and enterprise digital transformations globally.
- Proven expertise in optimizing backend performance and architecting event-driven systems using Java, Spring Boot, Kafka, and AWS, resulting in significant transaction volume growth and fraud reduction in high-scale environments.
- Skilled in building responsive front-end applications and real-time dashboards using React.js, TypeScript, Apollo Client, and WebSockets, enhancing user experience and boosting conversion rates by up to 50%.
- Strong background in DevOps automation, container orchestration with Docker and Kubernetes, CI/CD pipelines, and maintaining compliance with PCI-DSS and OAuth2/JWT security standards during global deployments.

PROFESSIONAL EXPERIENCE

Shopify (Shop Pay Global Expansion & Performance Enhancement)

May 2024– Present

Software engineer – Full Stack

San Francisco, CA

- Spearheaded integration and scaling of Shop Pay, driving secure global expansion to 20+ countries and supporting \$18B+ in annual transaction volume for 5.6 million active merchants.
- Architected and launched real-time fraud detection and analytics services, reducing transaction-related losses by 24% and ensuring PCI-DSS Level 1 compliance across all payment environments.
- Achieved 4x faster checkout performance and a 50% higher conversion rate over legacy flows through backend optimization and cross-border payment orchestration.
- Developed distributed Java microservices with Spring Boot, GraphQL Java, and Hibernate, powering payment processing, media workflows, and personalized recommendation APIs.
- Engineered event-driven data pipelines for payments and AdTech analytics using Apache Kafka and AWS EventBridge, enabling reliable real-time processing and streaming business insights.
- Designed and maintained cloud-native infrastructure on AWS (EC2, EKS, Lambda, S3, RDS), delivering high availability, multi-region auto-scaling, and secure global deployments.
- Implemented robust authentication, authorization, and compliance pipelines leveraging OAuth2, JWT, AWS KMS, and AWS API Gateway to protect sensitive payment data.
- Automated CI/CD processes using Docker, Kubernetes, Helm, and GitHub Actions, cutting build-to-deploy cycles by 60% and releasing updates with zero downtime.
- Delivered responsive real-time dashboards and checkout UIs in React.js, TypeScript, Apollo Client, and WebSockets, ensuring seamless merchant and buyer experiences.
- Enhanced system reliability and observability through Datadog, AWS CloudWatch, and OpenTelemetry distributed tracing, maintaining 99.99% uptime during peak global events.

Accenture

Jan 2020 - Dec 2022

Full Stack Developer

India

- Contributed to RBL Bank’s enterprise digital modernization by designing secure, cloud-native microservices that streamlined finance, HR, and compliance workflows, reducing operational complexity by 40%.
- Delivered scalable web applications through end-to-end Java full stack development, enhancing internal team collaboration and improving dashboard response times by 30%.
- Played a critical role in deploying services to AWS Cloud using DevOps pipelines, enabling continuous integration and faster product delivery in Agile environments.
- Engineered RESTful APIs using Java 17, Spring Boot 3, and Spring Security, implementing stateless authentication with JWT and fine-grained RBAC controls.
- Built dynamic UI components in React.js with TypeScript, integrating REST/GraphQL APIs using Redux and Axios to deliver responsive banking dashboards.
- Deployed containerized microservices using Docker and managed infrastructure via AWS Elastic Kubernetes Service (EKS), ensuring high availability and efficient scaling.
- Integrated Redis for caching and MongoDB/PostgreSQL for database operations, optimizing data retrieval for high-frequency services like loan and account status.
- Implemented CI/CD automation via AWS DevOps tools, configuring pipelines for code quality, test coverage, artifact deployment, and environment validation.
- Maintained 85%+ code coverage through robust unit and integration testing frameworks like JUnit 5, Mockito, and RestAssured, ensuring production-grade stability.

- Followed Agile Scrum practices with regular sprint planning, retrospectives, and stakeholder demos, collaborating closely with product owners, QA, and DevOps engineers.

TECHNICAL SKILLS

Languages & Frameworks: Java (8–17, Spring Boot including Spring Security, Hibernate), Python, C#, C++, Ruby, R, Go, TypeScript, JavaScript (ES6+), Redux, Angular, Vue.js, React Native, React.js, Node.js, Django, Flask, Ruby on Rails, ASP.NET, Apollo Client, Bootstrap

Frontend Development: HTML5, CSS3, Bootstrap, Responsive Design, UI/UX Collaboration (Figma), Real-Time Dashboards, WebSockets

Backend & Architecture: RESTful Services, GraphQL, OAuth2/JWT, RBAC, Event-Driven Architecture, Microservices, Serverless Functions (AWS Lambda, Step Functions), MVC, Distributed Systems, Cloud Infrastructure (AWS, GCP)

Databases & Caching: PostgreSQL, MySQL, MongoDB, DynamoDB, Redis, Redshift, SQL

DevOps, CI/CD & Cloud: Git, GitHub, GitLab, SVN, Azure DevOps Pipelines, Maven, Gradle, Docker, Kubernetes, Helm, Terraform, CloudFormation, Jenkins, Apache, NGINX, AWS (EC2, EKS, Lambda, S3, RDS, EventBridge, KMS, API Gateway), GCP, ECS, RHEL, Linux, SSH, Yarn, NPM

Testing & QA: JUnit 5, Mockito, RestAssured, Selenium, Unit Testing, Integration Testing, Automated Testing, Test Driven Development (TDD)

Messaging & Streaming: Apache Kafka, AWS EventBridge

Other Technologies & Tools: JSON, HubSpot, Atlassian Suite (Jira, Confluence), Visual Studio

Soft Skills: Problem Solving, Performance Improvement, Decision Making, Communication, Teamwork, Collaborative Mindset, Entrepreneurial Spirit, Agile/Scrum, Stakeholder Engagement, Code Reviews, Continuous Learning, System Integration

EDUCATION

Master of Science in Computer Science

California State University, Long Beach

Bachelor of Engineering in Computer Engineering

Gujarat Technological University
