Career Highlights

The Cigna Group / Evernorth Health Services (2012-2024)

Global Data & Analytics (Sr. Consultant)

Supported a Center of Excellence initiative in building out a standardized query library

(AWS, databricks, Domino)

- Led the development efforts for two business verticals (inbound service calls; web engagement)
- Coordinated with department SME's to ensure accurate interpretation of sourced data
- Developed parameter driven queries ensuring a standard definitional truth for 1k+ model features
- Drove internal awareness campaigns, documentation and educational sessions
- Successful adoption significantly reduced the model development / deployment & analytics lifecycles

Worked with strategy team, assisting U.S. sales offices with efficient client prospecting & retention efforts

(Hadoop, SAS, Tableau)

- Served as the key analytics owner and SME of Translation Factor data
- Developed the automated process to efficiently process 100's of millions Sales Force records
- Worked with internal customers to understand business pain-points & develop actionable solutions
- Participated in awareness roadshows, resulting in wide adoption of data driven decision, across varied business areas (Networks, Contracts, Pricing, Risk Management, Sales and Underwriting)

CIMA - Emerging Technologies (Sr. Manager / Sr. Consultant)

Managed / Led the Emerging Technologies & Solutions (Hadoop, SAS, Tableau)

- Supported various 'Population Health' related initiatives
- Developed an automated evaluation and reporting tool to support 100's of outreach campaigns
- Designed innovative solutions to overcome obstacles inherent to single arm campaign designs
- Saved ~2k analytic resource hours per 100 outreach campaigns
- Demonstrated the solution to a 1.5k+ member audience

CIMA - SOBI Liaison (Sr. Manager / Sr. Consultant)

Coordinated efforts between CIMA (Cigna Information Management & Analytics) & SOBI (Service Operations Business Analytics) (Hadoop, Oracle, SAS, SQL Server, Tableau)

- Worked with SOBI leaders to uncover pain points where CIMA collaboration could add value
- Incorporated analytic techniques (control charting, significant deviation vs. random variation, root-cause, experimental test design & evaluation, etc.) to support data driven recommendations
- Applied analytic techniques to ensure statistical rigor was maintained across power analyses, randomizations, data captures, campaign evaluations and reporting

Bank of America - Contract Analyst (2011-2012)

Health Dialog - Evaluation Analyst (2007-2011)

Technical Skills

- Environments: AWS (databricks, Domino, Redshift), Hadoop, Oracle, SAS, SQL Server, Teradata, Unix
- Programming: SAS BASE/MACRO/STAT, SQL (various dialects), Python (light)
- Industry: Healthcare (Medical, Membership, Pharmacy, Producer, Provider), Banking
