EDUCATION

The University of Texas at Dallas

Master of Science, Information Technology and Management

May 2025

GPA 3.89

Lokmanya Tilak College of Engineering, India

Bachelor of Engineering, Computer Science Engineering

June 2021

GPA 3.39

RELEVANT COURSEWORK

- Advanced Statistics for Data Science, Business Analytics with R, Database for BA, OOPs

PERSONAL ACCOMPLISHMENTS

- Predicting mortality rate and associated risks in COVID-19 patients using forecasting models, published Springer Journal
- Study of COVID-19's Effect on NIFTY, presented in OpenTox Euro 2020 Virtual Conference
- Employing Machine Learning Approaches for Predictive Data Analytics in Retail Industry, published Wiley Book
- Official Author of Towards Data Science on Medium.com (126K Views)
- Secretary, Generative AI Club at UT Dallas, managing club operations and organizing AI workshops for students

PROFESSIONAL EXPERIENCE

Tenet Health, Dallas, U.S.A.

June 2024 – August 2024

Data Engineer Intern

- Migrate & transform data from MySQL Server to Google Cloud BigQuery, ensuring data accuracy through manual debugging
- Leveraged BigQuery to optimize healthcare data pipelines, decreasing query execution time by 35%
- Implemented a data cleaning pipeline using Python (pandas, NumPy) that improved data quality by 25%

The Small Data Store Private Limited, India

March 2023 – August 2023

Data Scientist

- Developed and implemented **NLP models** (using techniques like K-means) for item categorization for unorganized inventory
- Built and deployed recommendation systems using collaborative filtering, boosting user engagement by 40%
- Used MongoDB and Spark to optimize real-time data processing, improving system throughput by 50%

Future Bridge, India

July 2021 – March 2023

Associate Developer

- Designed and implemented NLP models BERT for email classification, automating the manual process and boosting efficiency by 50%, implemented data deduplication on the marketing leads database for improved data sanitization
- Created a MongoDB & JavaScript API improving data quality by 70% and developed new marketing tools for client portal
- Deployed machine learning models on AWS Sagemaker to forecast sales, leading to a 25% increase in forecast accuracy

Enfinite Technologies Private Limited, U.S.A.

August 2020 – December 2020

Data Scientist Intern

- Conducted feature engineering and selection using Python (scikit-learn) to improve model performance
- Developed and implemented outlier detection models (Z-score, IQR) to clean large datasets, increasing data quality by 30%
- Built time series forecasting models (ARIMA, LSTM) to predict machine failure, reducing failure by 20%

University of Louisville, Kentucky, U.S.A.

May 2019 – July 2019

Summer Intern

- Developed a machine learning model using Computer Vision and OpenCV to classify medical images with 91% accuracy, and built a MySQL database for a healthcare application, integrating Logistic Regression for disease prediction
- Applied principal component analysis (PCA) & LDA to reduce data dimensionality, improving model efficiency by 15%

PROJECTS

- Developed a Convolutional Neural Network for medical X-ray image classification with 91% accuracy, deployed via Streamlit
- Created a COVID-19 data visualization dashboard, using plotly, seaborn & matplotlib
- Built a Spotify recommendation system using KNN, achieving 96% accuracy with content-based filtering
- Heart Disease UCI-Diagnosis & Logistic Regression Prediction & Analysis, using Decision Tree & Data preprocessing

SKILLS

- Technical:** Python, R, Java, TensorFlow, PyTorch, Scikit-Learn, SQL, MongoDB, AWS, GCP, Excel, Snowflake, Git, Jira, Agile
- Machine Learning & AI:** Supervised/Unsupervised Learning, Deep Learning, NLP, BERT, LLMs, GEN AI, MLOps
- Data Engineering:** ETL Processes, Data Pipelines, Data Wrangling, Big Data Tools, SQL Optimization
- Statistical Methods:** Hypothesis Testing, Regression Analysis, A/B Testing, Time-Series Analysis, Bayesian Inference
- Data Visualization Tools:** Power Bi, Tableau, Matplotlib, Seaborn, Data Storytelling, Dashboard Design, ggplot2
- Certifications:** ML Nanodegree (Udacity), Microsoft Azure (DP-900), Python Data structures, SQL (IBM)
- Soft Skills:** Communication, Team Leadership, Critical Thinking, Troubleshooting, Perform Under Pressure, Storytelling
