Education

Eastern Washington University

Bachelor of Science in Computer Science

March 2019

Cheney, Washington

- **Relevant Coursework:** Data Structures and Algorithms (C++), Prob & Stat in CS (Python), Intro to CS II (C++), Linear Algebra w/Computational Applications (Python), Advanced Relational Database Systems, Intro to Cryptography

Experience

Fast Enterprises

Software Engineer

Jan 2019 – August 2021

Portland, Oregon

- Modernized the Oregon DMV software by migrating from COBOL to C#/T-SQL. enhancing user experience and reducing in-person DMV visits by 30%.
- Collaborated with government stakeholders to gather requirements and translate policy into functional software, ensuring compliance with regulatory standards.
- Developed and maintained RESTful APIs to streamline data exchange between DMV offices, third-party verification services, and mobile platforms.
- Optimized T-SQL database queries, reducing page load times per customer lookup by 25% and enhancing overall application performance.

Launch Consulting

Dev Ops Engineer

Sep 2021 – Present

Remote

- Developed and managed CI/CD using Azure DevOps to automate the development, pre-production, and production environments of the Azure Nova project
- Implemented security best practices in Azure environments, including Azure Key Vault for secrets management
- Configure and manage role-based access control, Azure Active Directory, and service principals to secure cloud resources per client specifications.
- Automated cluster scaling, node pool management, and version upgrades within Azure cloud environments, leveraging Azure CLI for infrastructure provisioning.

Enterprise Systems Engineer

- Deployed and maintained enterprise-grade IT infrastructure, including servers, storage, virtualization platforms, and cloud services through Oracle Virtualization
- Assisted in implementing security controls and hardening measures across enterprise systems in alignment with organizational policies and industry compliance standards (e.x, NIST, ISO 27001)
- Maintained disaster recovery and backup strategies, testing and validating recovery plans scheduled regularly to ensure rapid restoration in the event of outages.
- Provided Tier 3 escalation support for complex infrastructure incidents or outages and lead root cause analysis to prevent recurrence of Sev 3+ incidents.

Technical Skills

Languages: C, C++, C#, Java, Python, Rust, Kotlin, Swift, Go, Scala, TypeScript, R, Perl

Technologies: React.js, Angular, Vue.js, Django, Flask, Ruby on Rails, Spring Boot, Express.js, TensorFlow, PyTorch, jQuery, Bootstrap, Laravel, Flask, ASP.NET, Node.js, Electron, Android SDK, iOS SDK

Concepts: Compiler, Operating System, Virtual Memory, Cache Memory, Encryption, Decryption, Artificial Intelligence, Machine Learning, Neural Networks, API, Database Normalization, Agile Methodology, Cloud Computing
