

HARI PRIYA DASARI

• +1 (317) 551-2858 • haripriyadasari87@gmail.com

SUMMARY

- Java Developer with **3+ years of experience** building scalable backend systems and microservices across **retail and financial domains**, leveraging **Java, Spring Boot and REST APIs**.
- Proficient in **AWS deployment, Docker, Kubernetes** and **full-stack** integration with **React.js/Angular** and **MySQL**, ensuring high-performance and secure application delivery. Skilled in **CI/CD pipelines, unit testing (JUnit, Mockito)**
- Able to work overtime, learn new technologies and create innovative solutions for the digital world, always striving for best possible result.
- Quick learner and has the motivation to take independent responsibility and be a productive team member.
- Collaborated with cross-functional stakeholders to automate complex business workflows and deliver secure, scalable software solutions.
- Proficient in building cloud-native applications on **AWS** and familiar with **Azure DevOps (ADO), AKS, Redis Cache**.

PROFESSIONAL EXPERIENCE

Accenture Pvt Ltd - Hyderabad, India

Java Full Stack Analyst, August 2021 – August 2023

Worked as a Full Stack Developer in Accenture's global technology team, contributing to multiple enterprise-scale projects across **retail and finance domains**. Delivered secure, high-performing microservices and full-stack solutions using **Java, Spring Boot, React.js** and **AWS-based cloud deployments**.

Project 1: Sainsbury's Argos System (Retail Domain)

- Participated in the full **SDLC**, gathering requirements, designing backend solutions, and writing optimized **PL/SQL procedures** and Java logic for large-scale inventory and order management modules.
- Improved API response times through **SQL tuning** and backend validation enhancements in Java.
- Automated backend batch data pipelines using **Unix scripting**, streamlining data processing workflows.
- Developed and enhanced **Angular**-based frontend components for inventory and order tracking dashboards, integrating them with **REST APIs** to provide real-time data visibility for store managers and warehouse staff.
- Collaborated with UX designers to ensure responsive layouts and WCAG-compliant UI elements for better accessibility.
- Contributed to Agile sprint activities, peer reviews, and ensured compliance with **enterprise coding standards**.

Project 2: Full-Stack E-commerce Platform – Spring Boot + React (Microservices)

- Developed secure, modular **RESTful** microservices using **Spring Boot** for Product, Order, and Payment modules, implementing JWT-based user authentication.
- Built dynamic and responsive user interfaces using **React.js** and **React Hooks** with integrated state management for seamless user interactions.
- Designed interactive, data-driven dashboards and components that enabled users to query and visualize transactional data in real-time.
- Integrated frontend and backend layers via well-documented **REST APIs**, tested using **Postman** and documented with **Swagger**.

- Configured **Maven** build automation for backend services, managing dependencies, packaging, and integration with **CI/CD** pipelines
- Containerized application components using **Docker** and orchestrated deployments on **AWS EC2** and **RDS** via **Kubernetes** for scalable, cloud-native performance.
- Monitored application health and performance using **Prometheus** and **Grafana**, resulting in improved system uptime and proactive alerting.
- Delivered an end-to-end full-stack solution, managing development, deployment, and operations to ensure a production-ready, highly available architecture.

Project 3: National Australian Bank (Finance Domain) – Backend Java Developer

- Developed and secured **Spring Boot** microservices for customer account and transaction management, ensuring compliance with financial regulations.
- Implemented and maintained **CI/CD pipelines** using **Docker** and **Git**, streamlining continuous integration and reducing manual deployment effort.
- Increased code quality and reliability by 80% through comprehensive unit testing with **JUnit** and **Mockito**.
- Contributed to stable cloud-native production environments by deploying containerized backend services to **AWS**.
- Collaborated with cross-functional teams to ensure system reliability, scalability, and secure API integration.

Environment: Java, Spring Boot, React.js, Angular, REST APIs, MySQL, MongoDB, AWS (EC2, RDS), Docker, Kubernetes, Postman, Swagger, Prometheus, Grafana, Unix Shell, Git, JIRA, Agile, JWT, HTML, CSS, Bootstrap, JavaScript, jQuery, Notepad++

ACADEMIC & PERSONAL PROJECTS

AI-powered automatic resume screening system for HR analytics, January 2025 – April 2025

- Developed a modular, AI-enabled system to automate resume screening using **Python**, **NLP**, and **web scraping** tools.
- Parsed resumes (PDF, DOCX, TXT) and dynamically extracted job descriptions via URL using **BeautifulSoup**.
- Implemented keyword-based skill extraction and semantic matching to score resumes against job requirements.
- Built an interpretable matching algorithm that outputs scores and rationales for each resume.
- Ensured fairness and transparency by integrating explainable AI (XAI) concepts using **SHAP/LIME**.
- Designed an upgrade plan to incorporate **BERT-based NLP**, **Machine learning** classifiers, and **PostgreSQL**-backed user/session management.
- Delivered a functional prototype with a web-based UI, significantly reducing manual HR workload and bias in candidate shortlisting.

Inventory management system platform, October 2024 – December 2024

- Designed and implemented three Spring-based applications: two using Spring Boot and one using Spring MVC, ensuring modularity and scalability.
- Developed and consumed **RESTful APIs** to enable seamless data exchange between **Spring Boot** backends and **JSP views** in the MVC module.
- Conducted **unit** and **system testing** to ensure reliability and performance of the platform.
- Contributed to sprint planning, stand-ups, and iterative cycles in a **SAFe Agile** environment.

Backend issue management and support – (ServiceNow platform), February 2024 – April 2024

- Integrated ServiceNow with internal banking systems to automate incident and change management workflows.
- Developed **Java-based middleware services** using **Spring Boot** to facilitate seamless REST API communication between ServiceNow and enterprise applications.
- Enabled real-time ticket creation, status updates, and resolution tracking through secure API endpoints.
- Implemented **error handling, logging, and audit trails** to support compliance with financial regulations.
- Improved operational efficiency by automating routine service desk tasks, reducing manual intervention by 40%.
- Collaborated with ServiceNow administrators to map backend data models with ServiceNow schema for accurate synchronization.

EDUCATION

Purdue University, Indianapolis City, IN *Master's in computer & information science, May 2025*

Aditya Institute of Technology and Management, Srikakulam, India
Bachelor's in computer science, June 2021

TECHNICAL SKILLS

Languages: Java, J2EE, Python, SQL, C++, JavaScript, HTML, CSS, XML

Frameworks & Libraries: Spring Boot, Spring MVC, Spring Security, Hibernate, React.js, REST APIs, JSP, Servlet

Databases: MySQL, MongoDB, PostgreSQL, SQLite

Tools & Platforms: Git, Docker, Kubernetes, Jenkins, Postman, Swagger, JIRA, IntelliJ, Eclipse, Microsoft Office Suite (Excel, Word, PowerPoint)

Cloud & DevOps: AWS (Certified Developer – Associate), CI/CD Pipelines, Linux, Azure DevOps

Testing & Monitoring: JUnit, Mockito, Selenium, Prometheus, Grafana

Other: Agile Methodology, API Development, Microservices Architecture, Data Structures & Algorithms, NLP, OCR, Kafka, Maven

CERTIFICATIONS

Accenture Technology School Program: Completed a structured training program covering foundational concepts in software development and IT services.

SQL for Data Analysis: Covered data wrangling, aggregation, subqueries, window functions, and advanced joins using SQL.

Skill Assessment – Java (Top 30%): Demonstrated advanced Java programming knowledge and industry- relevant coding skills.
