## PROFESSIONAL SUMMARY:

- **Over 5+ years of experience in full-stack development**, specializing in Java (Java SE, Java EE), JavaScript (ES6+), TypeScript, Python, and PL/SQL for building scalable web applications.
- Expertise in front-end technologies, including React.js, Angular, Vue.js, HTML5, CSS3, Bootstrap, Material-UI, Tailwind CSS, JSP, JSTL, Webpack, Babel, and RxJS, to create dynamic and responsive UIs.
- Strong back-end development skills using Spring Boot, Spring MVC, Spring Security, Struts, Hibernate, JPA, Spring Data, Microservices, Node.js, Express.js, RESTful APIs, SOAP-based Web Services, GraphQL, and WebSockets.
- Database management proficiency, working with MySQL, PostgreSQL, SQL Server, Oracle, MongoDB, Cassandra, and Firebase, integrating ORM frameworks like Hibernate and JPA.
- Hands-on experience in cloud & DevOps, including AWS (EC2, S3, Lambda, RDS, CloudWatch), Azure, CI/CD Pipelines (Jenkins, GitHub Actions, GitLab CI/CD), Docker, Kubernetes, Terraform, Ansible, and CloudFormation.
- Security and authentication implementation, leveraging JWT, OAuth2, CSRF Protection, and securing RESTful and SOAP-based web services.
- Software development best practices, applying design patterns (Singleton, Factory, Observer), Agile methodologies (Scrum, Kanban), and Infrastructure as Code (IaC) principles.
- Proficiency in testing & debugging, utilizing JUnit, TestNG, Selenium, Cypress, Mockito, PowerMock, Mocha, and Postman for ensuring application reliability.
- Experience in monitoring & logging, using AWS CloudWatch, ELK Stack, and Log4j for tracking system performance and issue resolution.
- Strong problem-solving and architectural skills, with expertise in Data Structures, Algorithms, System Design, messaging services (JMS, Apache Kafka), and reporting tools (BIRT, Jasper Reports).

## TECHNICAL SKILLS:

- **Programming Languages:** Java (Java SE, Java EE), JavaScript (ES6+), TypeScript, C, Python, PL/SQL
- **Front-End Technologies:** HTML5, CSS3, JavaScript, React.js, Angular, Vue.js, Bootstrap, Material-UI, Tailwind CSS, AJAX, jQuery, JSP, JSTL, Webpack, Babel, RxJS
- **Back-End Technologies:** Java (Spring Boot, Spring MVC, Spring Security, Struts), Hibernate, JPA, Spring Data, Microservices, Node.js, Express.js, RESTful Web Services, SOAP-based Web Services, GraphQL, WebSockets
- **Agile Methodologies:** Scrum, Kanban
- **Design Patterns:** Singleton, Factory, Observer
- **Data Structures & Algorithms (DSA) & System Design:** Data Structures, Algorithms, System Design & Architecture
- **Security & Authentication:** JWT, OAuth2, CSRF Protection
- **Messaging Services:** JMS, Apache Kafka
- **Databases & ORM:** MySQL, PostgreSQL, SQL Server, Oracle, MongoDB, Cassandra, Firebase, Hibernate, JPA
- **Cloud & DevOps:** AWS (EC2, S3, Lambda, RDS, CloudWatch), Azure, CI/CD Pipelines (Jenkins, GitHub Actions, GitLab CI/CD), Docker, Kubernetes, Terraform, Ansible, CloudFormation
- **Development & Build Tools:** Maven, Gradle, Jenkins, GitHub Actions, Git, GitHub, Bitbucket, IntelliJ IDEA, Eclipse, VS Code
- **Infrastructure as Code (IaC):** CloudFormation, Terraform
- **Monitoring & Logging:** AWS CloudWatch, ELK Stack, Log4j
- **Testing Frameworks:** JUnit, TestNG, Selenium, Cypress, Mockito, PowerMock, Mocha, Postman
- **Web Servers:** Apache HTTP Server, WebLogic
- **APIs & Web Services:** RESTful APIs, SOAP-based Web Services
- **Data Formats & Transformation:** JSON, XML, XSL
- **Reporting Tools:** BIRT, Jasper Reports

## EXPERIENCE:

### Ameri Source Inc

Aug 2023 – Current

#### Java Full-Stack Developer

- Developed and maintained 20+ banking microservices using Spring Boot, Spring MVC, and RESTful APIs, ensuring secure and efficient transaction processing.
- Built 10+ dynamic and responsive banking portals using React.js, Material-UI, and Tailwind CSS, enhancing user experience and reducing load time by 2 seconds.
- Deployed banking applications on AWS, leveraging EC2, S3, Lambda, and RDS, optimizing resource allocation and reducing infrastructure costs by \$1,000 annually.
- Implemented secure authentication mechanisms using OAuth2 and JWT, ensuring compliance with banking security standards (PCI DSS) and mitigating 100+ security vulnerabilities.
- Optimized backend performance through multi-threading and caching strategies, reducing API response time from 700ms to 400ms, improving real-time transaction processing.
- Developed a Kafka-based event-driven architecture to enable real-time fraud detection and transaction monitoring, reducing processing delays by 5 seconds per transaction.
- Managed CI/CD pipelines using GitHub Actions and Jenkins, automating deployments and reducing release cycle time from 2 weeks to 1 week.

- Designed and optimized 100+ complex SQL queries for PostgreSQL and MongoDB, improving data retrieval and reporting efficiency for regulatory compliance.
- Conducted unit and integration testing using JUnit, Mockito, Cypress, and Selenium, executing 1,500+ test cases to ensure system reliability.
- Led 50+ Agile Scrum ceremonies, collaborating with cross-functional teams, ensuring timely sprint deliveries and boosting overall project efficiency.

## Accenture

Feb 2021 – July 2022

### Java Full-Stack Developer

- Engaged in core Java development, implementing object-oriented principles (OOP), collections, and exception handling for backend efficiency.
- Designed and developed RESTful APIs using Spring Boot, Struts, and Hibernate, enhancing service reusability and reducing code complexity by 20%.
- Created intuitive UIs using Angular, Bootstrap, and JSP, improving user engagement and reducing bounce rates by 18%.
- Implemented multi-threading-based collector, parser, and distributor processes, improving data collection and processing efficiency by 30%.
- Utilized Azure cloud services, leveraging Azure Functions and Azure DevOps to automate deployments and improve application scalability.
- Worked extensively with database entities, optimizing SQL queries for Oracle and MySQL to reduce query execution time by 25%.
- Implemented NoSQL databases (Cassandra, Firebase) to support high-velocity data ingestion and scalable application architecture.
- Utilized Git for source code management, maintaining version control and ensuring seamless collaboration across teams.
- Used JIRA for issue tracking and project management, streamlining development workflows and improving task resolution time.
- Conducted code reviews and collaborated with QA teams to implement automated testing with Postman and Selenium, reducing defects by 35%.

## YNR Infotech

Jan 2019 – Jan 2021

### Java Developer

- Developed Java-based web applications using Spring MVC, Struts, and JSP, improving performance by 30%.
- Designed interactive front-end interfaces using Vue.js, AJAX, and jQuery, enhancing user experience and responsiveness.
- Deployed applications on Azure, utilizing Azure Virtual Machines, Azure Blob Storage, and Azure SQL Database, leading to 99.9% uptime.
- Implemented SOAP-based APIs and RESTful Web Services, enabling seamless integration with third-party applications.
- Developed and optimized 100+ SQL queries for SQL Server, improving query performance and reducing response time by 25%.
- Integrated authentication mechanisms with OAuth2 and LDAP, improving application security and user access control.
- Managed CI/CD automation with Bitbucket Pipelines and Jenkins, reducing manual deployment effort by 40%.
- Assisted in transitioning applications from monolithic to microservices architecture, reducing server response time by 25%.
- Implemented logging and monitoring using ELK Stack and Log4j, improving error tracking and reducing downtime incidents by 40%.
- Mentored junior developers, improving team knowledge-sharing and productivity by 20%.

## EDUCATION:

---

- **Masters in computer science**  
University Central of Missouri- MO.
- **Bachelor of Technology in Computer Science**  
JNTU Hyderabad, India.
