PROFESSIONAL SUMMARY

Backend Java Developer with hands-on experience delivering secure and scalable backend systems across client contracts and academic projects. Strong foundation in Java, Spring Boot, SQL, and JUnit, with a track record of improving performance, user retention, and reliability through optimized API design and feature development. Skilled in translating product needs into technical solutions that drive measurable impact. Currently seeking a backend-focused engineering role to continue building production-ready systems in a collaborative team environment.

PROFESSIONAL EXPERIENCE

Frontend Software Engineer - Responsive Web & SEO Optimization

May 2024 - Aug 2024

Auto Rocket

Covington, WA

- Developed and launched a fully responsive customer-facing website using HTML, CSS, and JavaScript, increasing customer engagement by 40% and boosting mobile traffic by 50%.
- Improved organic search traffic by 30% in the first month through SEO best practices including meta tagging, image optimization, and structured content formatting.
- Customized site templates and integrated performance-focused plugins, improving user satisfaction by 20% and reducing page load time by 35%.

Backend Software Engineer - Java, SQL

Mar 2023 - Jun 2024

The Empire Barbershop

Federal Way, WA

- Built and deployed core backend features in Java including account management, session handling, and password-hashed authentication, increasing user retention by 30%.
- Collaborated with frontend contributors to align backend functionality with cohesive UI components, leading to a 25% improvement in user satisfaction scores.
- Enhanced application security and performance by encrypting sensitive data, caching state fragments, and reducing redundant API calls, resulting in a 40% performance boost.

TECHNICAL SKILLS

Programming Languages

Java, Python, SQL, JavaScript, Typescript, C

Frameworks and Libraries

Spring Boot, JUnit, RESTful APIs

Technical Tools

Git/GitHub, Docker, Heroku, Apache, IntelliJ IDE, Eclipse, VS Code

EDUCATION

B.S. in Computer Science and Systems, University of Washington, Tacoma

2022 - 2024

O.M.S in Computer Science: Machine Learning, Georgia Institute of Technology

Expected 2027

PROGRAMMING PROJECTS

Dungeon Adventure Maze Game - Java, SQLite

- Led development of an immersive maze-based game using Java and SQLite. Applied MVC and Factory Method patterns to structure gameplay logic and improve code maintainability.

Student Streamz - React.js, Node.js

- Built a full-stack streaming platform with React and Node.js, delivering free access to 66,000+ movies and 320,000+ episodes. Led 85% of development across frontend and backend systems.
