ABOUT ME

As a Senior Business System Analyst with over 4 years of experience, I have worked across multiple domains, and gained expertise in various SDLC methodologies including Waterfall, Agile (Scrum), and SAFe. I am proficient in all phases of SDLC, including requirement gathering, analyzing, designing, detailing, and tracking requirements. My experience includes directing and working in Agile and Scrum environments, facilitating sprint planning, daily scrum, and sprint demos, retrospective and cross-team coordination, and using requirement management tools such as JIRA, HP ALM, and Trello Board. I have extensive experience in creating Business Requirements Document (BRD), Functional Requirements Document (FRD), and Software Requirement Specification (SRS) and maintaining Requirements Traceability matrix (RTM). I am skilled in conducting User Acceptance Testing (UAT) and documenting test cases. Additionally, I have experience working in the post-production environment, identifying, analyzing, and resolving issues and enhancement. I am proficient in requirement elicitation techniques, using business modeling tools such as MS Visio and Unified Modeling Language (UML), creating Use Case Diagrams, ERD, and Business Process Models, and have significant experience of working on Application Programming Interface (API) Documentation. I have exceptional skills in influencing, teaming, and delivering solutions in a highly complex, always changing, and nebulous environment.

WORK EXPERIENCE

Senior Business Systems Analyst

C Solutions [07/2018 – 12/2023]

Responsibilities:

1. Involved in all phases of Software development life cycle (SDLC) using Agile Scrum methodology.
